Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. - Market conditions can change rapidly and a fund in any rank can lose you your investment.
- The Fund is classified as above as it invests in company shares.
- The indicator does not take into account the following relevant material risks.
- The Fund is actively managed meaning the Investment Manager selects investments of their own choosing with the aim of achieving the Fund's objectives. This is done without seeking to replicate any index in either of performance or portfolio composition. This investment style, selecting companies with perceived greater long-term growth potential ahead of any short-term returns, in combination with the relative concentration of the Fund, may lead to prolonged periods of underperformance in certain market conditions, both in relation to the Fund's index and in absolute terms.
- Over shorter time periods the Fund's share price can be volatile and returns can be much higher or lower than our target. There is no guarantee this objective will be achieved over any time period.
- Investing in China may harm your investment due to difficulties with market volatility, political and economic instability including the risk of market shutdown, trading, liquidity, settlement, corporate governance, regulation, legislation and taxation.
- The Fund's ESG investment policy limits the type of companies it can hold. The Fund may have different returns from funds with no such restrictions.
- The limitations of third party data, which may be backward looking or estimated, may impact on the Funds ability to achieve any non-financial considerations.

- In adverse market conditions it may be difficult to sell investments held by the fund in a timely manner and their value may fall significantly. This could affect how much money you receive and even delay the selling of your shares if dealing in the Fund is suspended.
- Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care.
- You could lose your investment due to global factors like natural disasters, pandemics, or through developments such as military conflict, or changes in government policies.
- For a more detailed explanation of the risks, please see the "Risk Factors" section of the prospectus.
