

# Key Investor Information

This document provides key information for investors in this Sub-fund. It is not marketing material. The information it contains is required by law to help you understand the features of the Sub-fund along with the risks and other related information, should you decide to invest. You are advised to read it so that you can make an informed decision about whether to invest.

## AZ Allocation - Dynamic FoF (the “Sub-fund”) is a sub-fund of AZ Fund 1 (the “Fund”)

A-INSTITUTIONAL CHF-Hedged (ACC) class - ISIN LU2242912058  
The Fund is managed by Azimut Investments S.A. (the Management Company).

### OBJECTIVES AND INVESTMENT POLICY

#### Objectives

The Sub-fund’s investment objective is moderate medium- and long-term capital growth.

#### Investment policy

The Sub-fund is a fund of funds and seeks to achieve its investment objective by actively managing a portfolio comprised primarily of units of UCITS and/or other UCIs. The Sub-fund actively manages the allocation between and among asset classes using a top-down approach.

The Sub-fund focuses primarily on actively managing exposure to equities, within a range of between 0% and 150% of its net assets, including up to 60% of net assets in equities in emerging countries.

For the fixed-income portion of securities, the Sub-fund invests up to 100% of its net assets indirectly through units of UCITS and/or other UCIs in debt securities issued by issuers in developed countries.

The Sub-fund may invest up to 50% of its net assets in units of UCITS and/or other UCIs investing in debt securities with a sub-investment grade rating and/or in debt securities issued by issuers in emerging countries.

The Sub-fund uses the main financial derivatives for investment purposes and/or to hedge against risks. Leverage calculated based on the sum of notionals method: maximum 350%.

The Sub-fund is actively managed and is not managed in relation to a benchmark index. For the purpose of calculating the performance fee, the following benchmark is used: 75% MSCI AC World Net TR EUR + 25% Bloomberg EUR Corporate TR 1-3 Year + CHF/EUR 3M Hedging Costs (FXHCEUCF).

#### Specific information on units

You may request the sale of your units on a daily basis, except in certain circumstances (see the prospectus).

Dividend payments are not expected. Any income from the portfolio is reinvested.

The CHF class is hedged against the Sub-fund’s currency, the euro.

This unit class is reserved for institutional investors.

Recommendation: this Sub-fund may not be appropriate for investors who plan to withdraw their money within five years.

#### Definitions

**Actively managed Sub-fund:** a Sub-fund for which the manager has the flexibility to select the securities that make up the portfolio, in line with the objectives and investment policy laid out.

### RISK AND REWARD PROFILE

#### Definition of the risk and reward indicator

The aim of the risk indicator is to provide you with an evaluation of changes in unit prices. Risk category 4 means that the unit price fluctuates averagely. As a result, the risk of loss and the expected return may also be average. However, even the lowest category does not mean that the investment is “risk free”.

Historical data may not provide reliable information about the future. The displayed risk indicator is not guaranteed and is likely to change over time. There is no capital guarantee and the value of the Sub-fund is not protected.

#### Reason why the Sub-fund is classified in this risk category

This Sub-fund’s risk level primarily reflects the indirect investment positions in equities and derivative instruments depending on market volatility within the predefined margin.

#### Particular risks for the Sub-fund not included in the indicator:

**Risks associated with equities:** this refers to the financial risk associated with the direct or indirect holding of financial assets that represent the shares of a company. The value of equities can increase or decrease depending on the particular characteristics of the issuer (profitability, financial capacity) and the general developments of the stock markets.

**Emerging market risk:** risk associated with investing in emerging markets. Due to their political instability, the volatility of the exchange rate of their currencies and the limited number of investment opportunities, the risk of these markets is greater than in countries considered as developed.

**Credit risk:** issuers of debt securities, even those with a very high rating, may not be able to make payments to investors, or the fear associated with this risk may result in a decrease in the value of their debt securities.

**Risks associated with leverage:** the Sub-fund may achieve some leverage by using derivative financial instruments to implement its investment strategy. The use of leverage creates particular risks and may significantly increase the Sub-fund’s investment risk.

Other investment risks are specified in the risks section of the prospectus.

## CHARGES

The charges you pay are used to cover the costs of running the Sub-fund, including marketing and distribution costs. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest:	
Entry charge	2.00% of the amount invested for subscriptions made in single solution.
Exit charge	None
The percentage indicated is the maximum that may be taken out of your capital before it is invested and/or before the proceeds of your investment are paid out. Please contact your financial advisor or distributor for the actual charges.	
Charges deducted from the Sub-fund over a year:	
Ongoing charges	2.83%
Charges deducted from the Sub-fund under specific conditions:	
Performance fee	The management fee is increased or reduced on a straight-line basis by a variable management fee, up to a maximum of 20% of the amount of the management fee, based on the difference between the performance of the class and the performance of the 75% MSCI AC World Net TR EUR + 25% Bloomberg EUR Corporate TR 1-3 Year + CHF/EUR 3M Hedging Costs (FXHCEUCF) benchmark index over the same performance period (so-called "fulcrum" variable management fee). The actual amount of fees charged to the Sub-fund during the last financial year was 0.20%. This amount was calculated using a calculation method that is no longer in force. Since 01/04/2022, a "fulcrum fee model" has been applied. <b>In some cases, a performance fee may be levied even when the performance of the Sub-fund is negative.</b>

The amount of ongoing charges indicated is an estimate because there has been a change in the charges. This amount may change from year to year.

Ongoing charges do not take into account the following:

- performance fees and
- costs of portfolio transactions, unless the Sub-fund pays entry or exit charges when it buys or sells units in another undertaking for collective investment.

To find out more about the charges, please refer to the prospectus available at [www.azimutinvestments.com](http://www.azimutinvestments.com).

## PAST PERFORMANCE

- The graph shown is not a reliable indication of future performance.
- The annual performance is calculated after deducting the fees charged to the Sub-fund.
- The Sub-fund was created in 2006.
- The A-INSTITUTIONAL CHF-Hedged (ACC) class was launched in 2020.
- Past performance is calculated in CHF.
- The performance of the Sub-fund is not linked to that of the benchmark index. The latter is intended to be used to calculate the performance fee (fulcrum).

A\*: Since 01/04/2022, a "fulcrum fee model" has been applied. Benchmark index up to 01/04/2022: 3M Euribor (EUR003M) + 4% + CHF/EUR 3M Hedging Costs (FXHCEUCF).
