

# Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

"N Class Accumulation Units", a unit class of Global Sustainable Listed Infrastructure Fund (the Fund), as sub-fund of Principal Global Investors Funds (the Trust) (ISIN: IE000FLLTES5)

This Fund is managed by Principal Global Investors (Ireland) Limited (the Manager), part of The Principal Financial Group of companies

## Objectives and investment policy

The objective of the Fund is to provide a total return that exceeds its benchmark while achieving positive, measurable social and environmental impact by investing in infrastructure companies that contribute to the United Nations Sustainable Development Goals.

The Fund seeks to achieve its sustainable investment objective by investing its assets in a diversified portfolio of equity or equity-related securities issued by Sustainable Infrastructure Companies. A "Sustainable Infrastructure Company" is a company engaged in the development, operation and management of infrastructure assets in a financially sustainable manner while also contributing, and expected to further contribute in the future, to the relevant environmental and social objectives identified in the SDGs.

While it is generally intended for the Fund to be fully invested at all times, there may be a portion of assets held in cash or deposits at any given time.

Any income received by the unit class will be reinvested.

You may buy and sell units on demand on each Dealing Day being a Business Day as defined in the Fund's supplement.

The Fund is actively managed with reference to the FTSE Global Core Infrastructure 50/50 Index (the "Index") on the basis that the Fund seeks to outperform the Index. The portfolio manager may reference the Index as part of the investment management process for performance comparison purposes and the investment risk monitoring process, however, maintains full discretion to select investments for the Fund in line with the above investment policy.

Please see the section entitled Investment Objective, Policies and Profile of a Typical Investor of the Prospectus where full details are disclosed.

## Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

This Fund is ranked at 6 because funds of this type have experienced high rises and falls in value in the past.

The following are risks materially relevant that are not captured by the SRRI:

- The Manager integrates sustainability risks into the investment processes for the Fund in relation to risk management and decision making. This means sustainability factors are considered as part of the investment process which may carry the risk that the Fund's performance may be negatively impacted due to restrictions placed on its exposure to certain sectors or types of investments as a result.
- There are specific risks associated with investments in emerging markets, resulting from potentially less developed market practices. These include legal, political and fiscal instability, settlement, liquidity, currency, accounting standards and custodial risk.
- The price of equity securities fluctuates based on changes in a company's financial condition, overall market and economic conditions and market sentiment, resulting in an increased potential for volatility.
- There are specific risks associated with investing in the securities of companies in the real estate industry such as declines in the value of real estate, risks related to general and local economic conditions, overbidding and increased competition, increases in property taxes and operating expenses, changes in zoning laws, casualty or condemnation losses, variations in rental income, changes in neighbourhood values, the appeal of properties to tenants and increases in interest rates.
- Due to the underlying real estate assets held in REITS, the liquidity of these securities is typically less than other equity securities.
- Investments in China A shares through Stock Connect may be more susceptible to certain additional risks including, local trading and quota limitations, delays in executing trades, suspension of Stock Exchange trading, failure or delay in clearing and settlement, beneficial ownership risk, non-protection by any investor compensation schemes.
- There may be increased risk associated with investment in China due to less stringent corporate governance standards and less regulated securities markets. Other risks may include governmental, economic and tax legislation risks and higher volatility.
- The Fund may utilise a number of derivative instruments in managing the Investment Objective of the Fund. The primary risks associated with the use of such instruments are credit risk, counterparty risk, liquidity risk, legal risk and collateral risk.

Please see the section entitled Special Investment Considerations and Risks of the Prospectus where full details are disclosed.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

### Charges taken from the Fund over a year

Ongoing charges	1.10%
-----------------	-------

### Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

Ongoing charges are based on the last year's expenses, for the year ended December 2023, and this figure may vary from year to year. It excludes:

- Portfolio transactions costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

- Whereas the entry charge will not normally be made on a conversion, the Manager is entitled to make any such charges at its discretion. In particular, if more than four conversions are made during a twelve month period, the Manager may impose a service fee for any subsequent conversions during the subsequent twelve month period.

For more information about charges, please see Charges and Expenses in the Prospectus which is available as set out below.
