Global Impact Credit Fund

a sub-fund of T. Rowe Price Funds SICAV

Class Q (GBP) (ISIN: LU2564841539)

Management company: T. Rowe Price (Luxembourg) Management S.à r.l.

Objectives and Investment Policy

Objective To have a positive impact on the environment and society by investing primarily in sustainable investments, where the companies' current or future business activities are expected to generate a positive impact whilst at the same time seeking to increase the value of its shares through both growth in the value of, and income from, its investments.

Portfolio securities The fund is actively managed and invests mainly in a diversified portfolio of corporate bonds of all types from issuers around the world, including emerging markets.

The fund has sustainable investment as an objective that is achieved through the fund's commitment to maintain at least 70% of the value of its portfolio invested in Sustainable Investments. The investment manager implements the following investment strategies: impact exclusions and positive impact inclusion. Details of how E & S are promoted are further explained in the fund's Sustainability annex to the prospectus. <https://www.funds.troweprice.com/uk/en/>. The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may also use derivatives to create synthetic short positions in currencies, debt securities, credit indices and equities.

Investment process The investment manager will use T. Rowe Price's in-house proprietary impact screening process to select companies for its portfolio. Each company selected for inclusion in the fund's portfolio has current or future business activities that are expected to generate a material and measurable positive impact under one of the three impact pillars listed in the 'T. Rowe Price Impact Inclusion Criteria' section. In addition, the investment manager will invest in use-of-proceeds bonds that fund projects deemed to generate material and measurable impact, tied to one of the three impact pillars. The use of proceeds bonds includes green, social, and sustainability bonds where proceeds are dedicated to financing environmental or social projects. Use-of-proceeds bonds will be analysed through T. Rowe Price's in-house proprietary ESG bond model, which assesses the security's ESG's profile, sustainable finance framework, use of proceeds, and post-issuance reporting.

Impact Investment Framework The fund seeks to achieve its sustainable investment objective through the investment manager's impact inclusion criteria, investment process alignment with one or more of the UN Sustainable Development Goals (UN SDGs) and the application of its proprietary impact exclusion list which aims to avoid sectors and/or companies whose activities may be considered harmful to the environment and/or society.

Securities are screened first to exclude those whose activities may be considered harmful to the environment and/or society, through exposure to the categories outlined in the proprietary impact exclusion list. Securities are also screened with respect to conduct issues as determined through the

investment manager's ESG assessment. The investment manager then selects companies, from the remaining universe on the basis of the positive impact inclusion criteria. It is through this process that, in the investment manager's opinion, eligible securities meet the fund's sustainable investment objective, do not significantly harm any environmental or social objective and follow good governance practices.

The fund embeds governance analysis into the investment process and engages in active ownership, monitoring, and mutual engagement with the issuers of the securities in which it invests. This includes regular dialogue with issuers and active proxy voting. More information and the investment manager's engagement policy, proxy voting principles and other insights can be found on <https://www.troweprice.com/esg>.

Orders received and accepted by 13:00 Luxembourg time on a business day will generally be processed that day.

Risk and Reward Profile

Lower Risk ← Higher Risk
Typically Lower Rewards → Typically Higher Rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The value of an investment in the fund can go up and down. When you sell your shares, they may be worth less than what you paid for them. If your currency as an investor is different from the subscription currency of the fund, changes in currency exchange rates could reduce any investment gains or increase any investment losses.

The risk/reward rating above is based on medium-term volatility (actual or estimated variations in the fund's share price over five years) but is not a reliable indicator of future risk reward profile.

The lowest category does not mean a risk-free investment.

The fund is in the category shown because it invests in a segment of the market that is moderately volatile.

The fund's risk level reflects the following:

■ As a class, bonds carry higher risks than money market securities and lower risks than equities.

MAIN RISKS TYPICALLY ASSOCIATED WITH ORDINARY MARKET CONDITIONS

The fund's main risks are at least partially reflected in the risk/reward number. The most important of these risks are:

Asset-Backed Securities (ABS) and Mortgage-Backed Securities (MBS) may be subject to greater liquidity, credit, default and interest rate risk compared to other bonds. They are often exposed to extension and prepayment risk.

Distressed or defaulted debt securities may bear substantially higher degree of risks linked to recovery, liquidity and valuation.

Emerging markets are less established than developed markets and therefore involve higher risks.

ESG and Sustainability risk may result in a material negative impact on the value of an investment and performance of the fund.

High Yield Bond High yield debt securities are generally subject to greater risk of issuer debt restructuring or default, higher liquidity risk and greater sensitivity to market conditions.

Investment Fund involves certain risks an investor would not face if investing in markets directly.

MAIN RISKS TYPICALLY ASSOCIATED WITH UNUSUAL MARKET CONDITIONS

Unusual market conditions or large unpredictable events can amplify the fund's main risks. They can also trigger other risks, such as:

Contingent Convertible Bonds may be subject to additional risks linked to: capital structure inversion, trigger levels, coupon cancellations, call extensions, yield/valuation, conversions, write downs, industry concentration and liquidity, among others.

Counterparty risk may materialise if an entity with which the fund does business becomes unwilling or unable to meet its obligations to the fund.

Derivatives may be used to create leverage which could expose the fund to higher volatility and/or losses that are significantly greater than the cost of the derivative.

Liquidity risk may result in securities becoming hard to value or trade within a desired timeframe at a fair price.

Operational risk may cause losses as a result of incidents caused by people, systems, and/or processes.

A more detailed description of the risks that apply to the fund is set out in the section "Risk Descriptions" in the prospectus.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

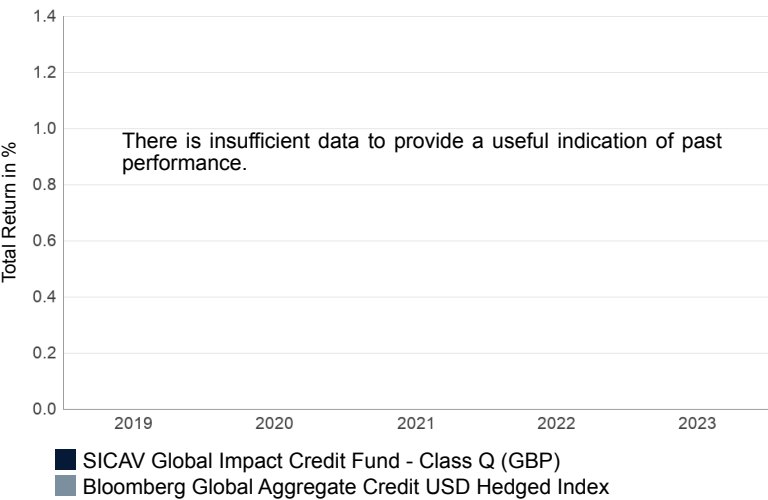

One-off charges taken before or after you invest
