ODDO BHF Immobilier

(hereinafter the "Fund")

This Fund is managed by ODDO BHF Asset Management SAS

ISIN: DR-EUR units - FR0000989923 - EUR - Distribution

OBJECTIVES AND INVESTMENT POLICY

This Fund is classified as follows: International equities

Over a minimum investment period of five years, the Fund seeks to outperform its benchmark, the MSCI EMU IMI Core RE 10/40 Index, net dividends reinvested, after deduction of actual management fees, via exposure to Euro Zone real estate companies, while also taking ESG criteria into account.

The Fund manager chooses real estate stocks according to a selective investment process based on (i) geographical analysis of the various real estate markets, and (ii) sector analysis: offices, retail premises, residential property, industrial premises and logistics platforms, hotels and retirement homes.

The Fund is managed actively with reference to its benchmark. The Fund's composition may deviate significantly from that of the benchmark index.

The Fund may have exposure of:

- between 75% and 100% of its net assets in the shares of real estate companies and companies in the real estate sector or linked to real estate with their registered office located in the Euro Zone (with a limit of 25% (i) in the shares of companies not headquartered in the Euro Zone and (ii) to the currencies of countries which are not part of the Euro Zone in connection with investments in the securities of companies headquartered outside the Euro Zone) and of any capitalisation, though 95% of the equity portfolio shall be invested in mid and large caps (at least 150 million). Emerging countries are not permitted.

- between 0% and 20% of its net assets in fixed income products: corporate or government bonds, transferable debt securities or money market instruments with a maturity of less than three months rated at least A2, P2 or F2 Standard & Poor's or equivalent as assessed by the Management Company or according to its own internal rating), with up to 5% of net assets invested in investment grade, unrated or high yield convertible bonds (according to Standard & Poor's rating agency or deemed equivalent by the Management Company, or according to its own internal rating).

The Management Company does not use the ratings issued by ratings agencies automatically or in isolation, as it also applies its own internal analysis. In the event of a downgrade, the Management Company will take the interests of unitholders, market conditions and its own analysis of these fixed income products into account when respecting rating limits.

The Fund may use forward financial instruments traded on French or foreign regulated, organised or OTC markets for the purposes of hedging the portfolio and/or exposing it to equity and foreign exchange, up to the limit of 100% of its assets (futures, options, forward exchange contracts and currency swaps). The Fund may hold convertible bonds (maximum 5% of net assets), subscription certificates and warrants (securities with embedded derivatives) in order to generate exposure to equity risk, up to the limit of 100%.

The Fund's maximum exposure to the instruments (equities, debt securities, funds and derivatives) may not exceed 100% of net assets, it being understood that the maximum exposure is the sum of the net exposures to each of the markets (equity, fixed income, money) to which the Fund is exposed (the sum of long and hedging positions).

Other information:

The management team takes into account environmental, social and governance (ESG) criteria in its investment decisions but they are not the dominant factor. The investment decisions taken may therefore not be consistent with ESG criteria.

Subscription and redemption requests are centralised by the Depositary every Paris stock exchange trading day until 11:15 (Paris time, CET/CEST) and executed on the basis of the net asset value of the same day.

DR-EUR units distribute their income.

Recommended investment horizon: 5 years

This Fund may not be appropriate for investors who plan to withdraw their money within this period.

RISK AND REWARD PROFILE

Historical data, such as is used to calculate the synthetic indicator, may not be a reliable indication of the future risk profile of the Fund. The risk profile is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment. The capital initially invested is not guaranteed.

Why is the Fund placed in category 6?

The Fund presents a high level of risk due to its strategy of investing at least 80% of its assets in the shares of real estate companies and companies linked to real estate.

Material risks to the Fund that are not taken into account in the indicator:

Liquidity risk: the Fund invests in markets which may be affected by declines in liquidity. Low volumes of market transactions may have an impact on prices at which the manager opens or closes positions.

Credit risk: this is the risk of a downgrading of an issuer's credit rating or the risk of an issuer's insolvency.

Counterparty risk: the risk of a counterparty's collapse, causing it to default on payment. The Fund may be exposed to this risk resulting from the use of forward financial instruments or temporary purchases and sales of securities contracts negotiated over-the-counter with a credit institution if the latter is unable to honour its commitments.

If one of these risks were to materialise, the Fund's net asset value may fall.

CHARGES

Charges and fees paid are used to pay the costs of marketing and distributing units; these charges reduce the potential growth of the investment.

One-off charges taken before or after you invest

Entry charges	4.00%
Exit charges	None

This is the maximum that might be deducted from your capital before it is invested and/or before the proceeds of your investment are paid out. These charges are payable to the distributor. In some cases, investors may pay less.
