WHAT IS THIS PRODUCT?

BNY Mellon Asian Equity Fund (the "Fund") is a sub-fund of BNY Mellon Global Funds, plc (the "Company") which is a fund constituted in the form of a mutual fund. It is domiciled in Ireland and its home regulator is Central Bank of Ireland.

OBJECTIVES AND INVESTMENT STRATEGY

OBJECTIVES

To achieve long term capital growth through investment primarily (meaning at least two-thirds of the Fund's assets) in a portfolio of equity and up to one-third of the Fund's assets in a portfolio of equity-related securities of companies located in Asia (excluding Japan) or deriving a preponderant part of their income therefrom.

STRATEGY

The Fund will invest primarily, meaning at least two-thirds of the Fund's assets, in a portfolio of equity and up to one-third of the Fund's assets in a portfolio of equity-related securities including convertible bonds (usually unrated), convertible preference shares and warrants (subject to a 10% limit of Net Asset Value of the Fund in the case of warrants) of companies located in Asia (excluding Japan) or deriving a preponderant part of their income from Asia (excluding Japan). Investment may be made in both developed and emerging Asian regions (excluding Japan).

Up to one-third of the Fund's assets may also be invested in equity and equity-related securities of companies neither located in Asia (excluding Japan) nor deriving a preponderant part of their income from Asia (excluding Japan).

The majority of the Fund's investment shall be listed or traded on Recognised Exchanges located in Asia and the Pacific Region.

The Fund may use financial derivatives instruments ("FDI") for efficient portfolio management purposes. However, FDI are not used extensively or primarily for investment purposes.

WHAT ARE THE KEY RISKS?

Investment involves risks. Please refer to the prospectus for details including the risk factors.

INVESTMENT RISK

The Fund is an investment fund. There is no guarantee of the repayment of principal. The Fund's investment portfolio may fall in value and therefore your investment in the Fund may suffer losses.

CURRENCY RISK

This Fund can invest in overseas securities, which may also generate profits overseas and pay dividends in foreign currencies, which means the Fund is exposed to changes in currency rates. Changes in the rates of exchange may affect the value of your investment.

EMERGING MARKET RISK

The Fund may invest in emerging markets. These markets have additional risks due to less developed market infrastructures. These investments may also experience fluctuations in their value. Risks include (i) greater risk of expropriation, confiscatory taxation, nationalisation and social, political and economic stability; (ii) the small current size of the markets for securities of emerging markets issuers and the currently low or non-existent volume of trading, resulting in lack of liquidity and in price volatility; (iii) certain national policies which may restrict the Fund's investment opportunities including restrictions on investing in issuers or industries deemed sensitive to relevant national interests; and (iv) the absence of developed legal structures governing private or foreign investment and private property.

DERIVATIVES RISK

Using derivatives can involve a higher level of risk. A small movement in the price of an underlying investment may result in a disproportionately large movement in the price of the derivative investments.

This Fund may use derivatives for efficient portfolio management (EPM) purposes. EPM restricts the use of derivatives for the reduction of risk, the reduction of cost and the generation of additional capital or income with no or an acceptable low level of risk. EPM transactions must be economically appropriate and the exposure fully covered.

CONCENTRATION RISK

The Fund may be managed as a concentrated portfolio due to investment being limited to Asia (excluding Japan) region, giving rise to concentration risk. A fall in the entire market of Asia (excluding Japan) region may have a greater impact on the Fund's value than if the Fund had a more diversified portfolio.

IS THERE ANY GUARANTEE?

This Fund does not have any guarantees. You may not get back the full amount of money you invest.
