What is this product?

The Fund is a collective investment scheme (investment company), domiciled in Ireland and regulated by the Central Bank of Ireland.

Objective and Investment Strategy

To seek to achieve asset growth through investment in a well-diversified portfolio of fixed and variable rate debt securities issued in the emerging markets.

At least two thirds of the net asset value of the Fund shall be invested in debt securities issued or guaranteed by any government, state, local authority or other political sub-division of government (including any agency or instrumentality thereof), securities issued by supranational bodies and securities issued by corporate entities in the emerging markets of Asia, Africa, the Middle East, Latin America and the developing countries of Europe.

Investments may include debt securities, including convertible and non-convertible debt securities, fixed and floating rate bonds, zero coupon and discount bonds, debentures, mortgage-backed and asset-backed securities, certificates of deposit, bankers' acceptances, commercial paper, treasury bills and loan participation securities that reference bank loans and trade finance loans in these countries. The loan participation securities that the Fund may invest in are expected to be in the form of participations in, or assignment of, the loans, which may or may not be securitised. Such loan participation securities shall be liquid and will provide for interest rate adjustments at least every 397 days. The Fund may invest up to 10 per cent. of its net assets in such loan participation securities and will only purchase such loan participation securities through recognised, regulated dealers.

The Fund is likely to concentrate its investments in Asia, Africa, the Middle East, Latin America and the developing countries of Europe. The securities will be listed, traded or dealt in on any regulated market in these countries and in the US or the EU.

No more than 85 per cent. of the Fund's net asset value may be invested in securities which are rated below investment grade.

The Fund is permitted to invest in or hold other types of instruments as part of its investment policy including, but not limited to, short term securities such as commercial paper, bankers' acceptances, certificates of deposit and government securities issued by a member of the Organisation for Economic Co-operation and Development or by any supranational entity which are rated investment grade or better as well as collective investment schemes and REITs.

The Fund may invest in financial derivative instruments for hedging, efficient portfolio management and investment purposes. Derivatives will typically be used as a substitute for taking a position in the underlying asset and/or as part of a strategy designed to reduce exposure to other risks, such as currency risk and interest rate risk. Currently, the Fund will not use financial derivative instruments extensively. The use of such financial derivative instruments will result in minimal leverage of up to 10 per cent. of the net asset value of the Fund under the commitment approach. While the Fund does not intend to employ any specific strategy in respect of the use of financial derivative instruments, such instruments may be used in accordance with the Fund's investment objective and policy.

What are the key risks?

Investment involves risks. Please refer to the Hong Kong Offering Document for details including the risk factors.

1. Emerging market risk

- The Fund may invest in markets of a developing nature. Accordingly, these markets may be illiquid and levels of volatility in price movements may be greater than those experienced in more developed economics.
- The legal infrastructure and accounting, auditing and reporting standards in emerging markets may not provide the same degree of shareholder protection or information to investors as would generally apply internationally. In particular, valuation of assets, depreciation, exchange differences, deferred taxation, contingent liabilities and consolidation may be treated differently from international accounting standards.
- The value of the assets of the Fund may be affected by uncertainties, such as political developments, changes in government policies, taxation and currency repatriation and restrictions on foreign investment as well as under developed custodial/settlement systems in the markets where the Fund invests.

2. Below investment grade debt securities risk

- Investments in below investment grade securities are considered to have a higher risk exposure than securities which are investment grade with respect to payment of interest and the return of principal.
- Low rated debt securities involve higher risks and are more sensitive to adverse changes in general economic conditions and in the industries in which the issuers are engaged, as well as to changes in the financial condition of the issuers and changes to interest rates.
- The market for lower rated debt securities generally is less active than that for higher quality securities and the Fund's ability to liquidate its holdings in response to changes in the economy or the financial markets may be further limited by such factors as adverse publicity and investor perceptions.

3. Interest rates risk

- Changes in market interest rates will affect the value of debt securities held by the Fund. Generally, the market value of debt securities decreases when interest rates rise and increases when interest rates fall.
- Long-term debt securities are generally more sensitive to changes in interest rates and, therefore, are subject to a greater degree of market price volatility.

4. Credit risk

- Investment in bonds or other debt securities will expose the Fund to credit risk of the issuers.
- In the event that any issuer of debt securities in which the assets of the Fund are invested defaults, becomes insolvent or experiences financial or economic difficulties, this may affect the value of the relevant securities (which may be zero) and any amount paid on such securities (which may be zero). This may in turn affect the net

asset value per share of the Fund.

5. Concentration risk

- The Fund concentrates its investments in the emerging markets of Asia, Africa, the Middle East, Latin America and the developing countries of Europe and thus, may be subject to a greater degree of volatility and risk than a fund following a more diversified strategy. The Fund's investments may become more susceptible to fluctuations in value resulting from adverse economic or business conditions in these markets, and thus the aggregate return of the Fund may be adversely affected.

6. Derivatives risk

- The Fund may enter into transactions in over-the-counter markets that expose it to the credit risk of its counterparties and their ability to satisfy the terms of such contracts. In the event of the bankruptcy or insolvency of a counterparty, the Fund could experience delays in liquidating the position and may incur significant losses.

- Many derivative instruments have a leverage component, which means that adverse changes in the value or level of the underlying asset, rate or index can result in a loss substantially greater than the amount invested in the derivative itself.

- Liquidity risk exists when a particular derivative instrument is difficult to purchase or sell. If a derivative transaction is particularly large or if the relevant market is illiquid, it may not be possible to initiate a transaction or liquidate a position at an advantageous time or price.

- Derivatives are designed to track the value of the securities, rates or indices. This tracking is not always perfect and as a result the Fund's use of derivatives may not always be an effective means of, and sometimes could be counterproductive to, the Fund's investment objective.

7. Currency risk

- The Fund's investment in non-USD denominated securities may cause the value of the Fund's investments to fluctuate with changes in exchange rates.

8. **Investment risk**

- There can be no assurance that the Fund will achieve its investment objective. The price of the debt securities may fall as well as rise.

Is there any guarantee?

The Fund does not have any guarantees. You may not get back the full amount of money you invest.

What are the fees and charges?

Investors should refer to the Hong Kong Offering Document for details regarding the fees and expenses of the Fund.
Charges which may be payable by you
You may have to pay the following fees when dealing in the shares of the Fund.

Fees and charges	**What you pay**
Initial charge (subscription fee) (% of the net asset value per share)	Class A: up to 6.25% Class I: nil

Ongoing fees payable by the Fund
The following expenses will be paid out of the Fund. They affect you because they reduce the return you get on your investments.

	Annual rate (as a % of the net asset value of each class)
Investment management fee	Class A: 1.50% Class I: 0.75%

Custodian fee	Fiduciary fee of up to 0.02% per annum of the average net asset value of the Fund plus VAT (if any), subject to a minimum fee of EUR3,500.00 per annum. Custody fee of up to 0.05% per annum of the average net asset value of the Fund.
Performance fee	Nil
Administration fee	Up to 0.06% per annum of the average net asset value of the Fund, subject to a minimum fee of EUR15,000 per annum, plus additional annual fees at normal commercial rates for the second and each subsequent class of shares in the Fund.

Other fees

The intermediary you use may ask you to pay other fees and charges when dealing in the shares of the Fund.

Additional Information

- You generally buy and/or redeem shares of the Fund at the Fund's next-determined net asset value on the day the Hong Kong Representative receives your request, provided that it is received in good order on or before 5:00 p.m. (Hong Kong time) being the dealing deadline in Hong Kong.
- Intermediaries who sell the Fund may impose earlier dealing deadlines for receiving instructions for subscriptions, redemptions or switching. Investors should pay attention to the arrangements of the intermediary concerned.
- The net asset value per share of the Fund will be calculated and published in the South China Morning Post and the Hong Kong Economic Journal on each dealing day.
- The Hong Kong Representative, Old Mutual Global Investors (Asia Pacific) Ltd, can be contacted at 24/F Henley Building, 5 Queen's Road, Central, Hong Kong, telephone number +852 2810 8626.
