Use of Financial Derivative Instruments

This Fund may employ financial derivative instruments for hedging and investment purposes in accordance with its risk profile. Financial derivative instruments may be employed for instance to generate additional income from exposure to credit risk in purchasing or selling protection through credit default swaps, adjusting the Fund's duration through the tactical use of interest related financial derivative instruments, generating additional income through inflation or volatility linked financial derivative instruments or increasing its currency exposure through the use of currency related financial derivative instruments. Financial derivative instruments could also be employed to create synthetic instruments. Such financial derivative instruments include over-the-counter and/or exchange traded options, futures, warrants, swaps, forward contracts and/or a combination of the above.

Fund's Risk Profile

The Fund is a medium risk vehicle. However, the use of financial derivative instruments may lead to a higher volatility in the price of Shares and may increase the Fund's counterparty risk.
