Investment Objective:

The Fund seeks to provide long-term growth of capital by tracking the performance of the Morgan Stanley Capital International World Free Index (the “Index”), a market-capitalisation-weighted index of common stocks of companies in developed countries.

Investment Policy:

The Fund employs a “passive management” - or indexing - investment strategy designed to track the performance of the Index by investing all, or a representative sample, of the securities that make up the Index, holding each stock in approximate proportion to its weighting in the Index.

The Fund’s investment policy is to remain substantially fully invested in common stocks. At least two-thirds of the net assets of the Fund (without taking into account ancillary liquid assets) shall at all times be invested in equities contained in the Index. Up to one-third of the net assets of the Fund (without taking into account ancillary liquid assets) may, in the aggregate, be invested in convertible securities, equity-linked notes and short-term fixed income securities. These securities may originate from an issuer that may or may not be contained in the Index. Investments in convertible securities shall not exceed 25% of the net assets of the Fund.

The Fund also may invest in short-term fixed income securities due to its uncommitted cash balances and to maintain liquidity to meet Shareholder redemptions.

The Fund may use certain financial derivative instruments for the purpose of efficient portfolio management. In addition, the Fund will enter into forward currency contracts for the purpose of currency hedging.

Risk Profile:

The Fund is designed as a low-risk investment, but you could still lose money by investing in it. The value of the Shares, and the income from them, may go up or down, and the investors may not get back the amount they invested.

The Fund is subject to certain risks, namely country risk, currency risk, investment style risk and stock market risk, which could hurt its investment performance.

A more detailed description of the risk factors that apply to the Fund is set out in the Fund Supplement.
