

Credit Suisse Portfolio Fund (Lux)

Investment fund under Luxembourg law

Simplified Prospectus

July 2009

This Simplified Prospectus contains a summary of the key information on Credit Suisse Portfolio Fund (Lux) (the "Fund"). Potential investors should consult the complete Sales Prospectus. Details on the Fund's assets can be found in the current annual and semi-annual reports. The rights and obligations of the Unitholders and the legal relationship to the Fund are set out in the complete Sales Prospectus. The complete Sales Prospectus, copies of the Management Regulations and the annual and semi-annual reports can be obtained free of charge from the Management Company, the Fund's representative in Switzerland and the Selling Agents, or on the Internet at www.credit-suisse.com.

Investment Objective

The investment objective of the individual Subfunds is described below.

Investment Policy

The assets of the Subfunds shall be invested in accordance with the principle of risk-spreading in securities and other investments in accordance with the first part of the law dated 20 December 2002.

Investment in Securities

In keeping with their investment policy, the Subfunds may invest worldwide in shares, other equity securities (shares in cooperatives, participation certificates), short-term debt securities, dividend right certificates, bonds, notes, similar fixed-interest or floating-rate securities, convertible bonds, convertible notes, warrant bonds and bonds with equity warrants attached, provided they are traded on stock exchanges or another regulated market.

Liquid Assets

The Subfunds may in addition hold ancillary liquid assets in the form of sight and time deposits with first-class financial institutions and money market instruments which do not qualify as transferable securities and have a term to maturity not exceeding 12 months, in any convertible currency.

Moreover, each Subfund may, on an ancillary basis, hold units and/or shares in undertakings for collective investment in securities that are permitted in accordance with Directive 85/611 EEC, which in turn invest in short-term time deposits and money market instruments and whose returns are comparable with those for direct investments in time deposits and money market instruments. These investments, together with any investments in other undertakings for collective investment in securities and/or other undertakings for collective investment, must not exceed 10% of the net assets of a Subfund.

Unless specified otherwise in the investment policy of a Subfund, such liquid assets, together with debt instruments which generate interest income within the meaning of European directive 2003/48/EC, may not exceed 40% of any Subfund's net assets.

Use of Derivatives

A significant proportion of the assets of the individual Subfunds may, within the scope of the investment restrictions set out below, be linked via derivative financial instruments (derivatives) to developments in the equity markets, interest rates or the product, commodity or real estate markets. Moreover, each Subfund may invest in derivatives relating to hedge fund indices, provided these are recognized and sufficiently diversified. The counterparties of unlisted derivatives must be first-class financial institutions specializing in this area.

In addition to direct investments, all Subfunds may engage in futures and options as well as swap transactions (interest-rate swaps, total return swaps) for the purpose of hedging and the efficient management of the portfolio, provided due account is taken of the investment restrictions set out in the Prospectus.

Furthermore, the Subfunds may actively manage their currency exposure through the use of currency futures and swap transactions.

The derivatives are allocated either to the equity exposure or to the exposure in fixed- and variable-income securities, depending on the underlying investment class. Derivatives on product, commodity, hedge fund and real estate fund indices each form a separate category.

Certificates on Product and Commodity Indices and on Real Estate Fund Indices

Each Subfund may invest up to 15% of its net assets in structured products (certificates) on product indices and/or commodity indices and/or real estate fund indices that are sufficiently liquid and were issued by a first-class financial institution. The valuation of these certificates must be reproducible at all times and be made regularly on the basis of the last available stock market price or, where this price does not accurately reflect the real market value, be conducted by an independent valuation agency (market maker).

In addition to the rules on risk diversification, the Fund must ensure that the risks arising from the underlying product and commodity indices are sufficiently well distributed.

Certificates on Hedge Fund Indices

Up to 15% of the net asset value of the relevant Subfunds may be invested in certificates on recognized hedge fund indices that are listed on an exchange and issued by a first-class financial institution. "Hedge funds" refer in particular to market neutral instruments, i.e. those that produce absolute returns without having any correlation with business or stockmarket trends. They do so, for example, by exploiting market inefficiency (entering into counter-trades involving undervalued or overvalued securities), by pursuing investment strategies which are based on incipient macroeconomic changes and have an influence on securities prices, or by making greater use of derivatives.

Certificates on hedge fund indices must be directly saleable at all times and without restriction, and must not entail any payment obligation. These certificates must be valued regularly on the basis of independent sources. In addition to the rules on risk diversification, the fund must ensure that the risks entailed in the underlying hedge fund indices are reasonable; in this connection, no single hedge fund represented in the respective hedge fund index may account for more than 20% of the index.

Techniques and Instruments for Managing Credit Risk

Subject to the investment restrictions set out in the complete Sales Prospectus, the Management Company may use securities (credit linked notes) as well as techniques and instruments (credit default swaps) for the purpose of managing the credit risk of each Subfund.

Securities Lending

Subject to the investment restrictions set out in the complete Sales Prospectus, a Subfund may from time to time engage in securities lending transactions.

Collective Management of Assets

For the purpose of efficient management of the Fund and where the investment policies so permit, the Management Company may opt to manage all or part of the assets of certain Subfunds collectively. Assets so managed shall be referred to hereinafter as a "pool", irrespective of the fact that such pools are created solely for internal management purposes. Pools do not constitute a legal entity separate from the collectively managed Subfunds, nor are they directly accessible to investors. Each of the collectively managed Subfunds shall remain entitled to its own specific assets. The assets jointly managed in the pools may be divided and transferred to all the participating Subfunds at any time.

If the assets of several Subfunds are merged in order to be managed jointly, a written record is kept of that portion of the assets in the pool which can be ascribed to each of the Subfunds concerned, with reference to the Subfund's original share in this pool. The entitlements of each participating Subfund to the collectively managed assets shall relate to

each individual item in the pool. Additional investments made for the collectively managed Subfunds shall be allocated to these Subfunds in an amount proportionate to their entitlements. Assets which have been sold shall be deducted in like manner from each participating Subfund's entitlement.

Subfunds

At present, the following Subfunds are being offered:

- Credit Suisse Portfolio Fund (Lux) Income (Euro)
- Credit Suisse Portfolio Fund (Lux) Income (Sfr)
- Credit Suisse Portfolio Fund (Lux) Income (US\$)
- Credit Suisse Portfolio Fund (Lux) Reddito (Euro)
- Credit Suisse Portfolio Fund (Lux) Balanced (Euro)
- Credit Suisse Portfolio Fund (Lux) Balanced (Sfr)
- Credit Suisse Portfolio Fund (Lux) Balanced (US\$)
- Credit Suisse Portfolio Fund (Lux) Growth (Euro)
- Credit Suisse Portfolio Fund (Lux) Growth (Sfr)
- Credit Suisse Portfolio Fund (Lux) Growth (US\$)

The specific features of the investment policies of the individual Subfunds are set out below.

Risk Information

The value of the investments and the resulting income may rise or fall and cannot be guaranteed. There is no assurance that the investment objective of a particular Subfund will actually be achieved or that any appreciation in the value of the assets will occur. When redeeming Units, it is possible that the investor will not recoup the amount originally invested in the Fund. While the judicious use of derivatives can be beneficial, derivatives also involve specific risks. These risks relate specifically to market risk, management risk, credit risk, liquidity risk, the risk of mispricing or improper valuation of derivatives and the risk that derivatives may not correlate perfectly with underlying assets, interest rates and indices. For further details, please consult the complete Sales Prospectus.

Investments in Hedge Fund Indices

In addition to the risks entailed in traditional forms of investments (market, credit and liquidity risks), investments in hedge fund indices entail a number of specific risks that are set out below.

The hedge funds underlying the index in question, as well as their strategies, are distinguished from traditional investments primarily by the fact that their investment strategy may involve the short sale of securities and, on the other hand, by the fact that a leverage effect may ensue from taking up loans and using derivatives.

The consequence of the leverage effect is that the value of a fund's assets increases faster if capital gains arising from investments financed by borrowing exceed the related costs, notably the interest on borrowed monies and premiums payable on derivative instruments. A fall in prices, however, causes a faster decrease in the value of the fund's assets. The use of derivative instruments and especially of short selling can in extreme cases lead to the investment being written off altogether.

Most of the hedge funds underlying the respective index were issued in countries in which the legal framework, and especially supervision by the authorities, either does not exist or does not correspond to the standards applied in western Europe or other comparable countries. The success of hedge funds depends in particular on the competence of the fund managers and the suitability of the infrastructure available to them.

Investments in product and commodity indices

In addition to the risks entailed in traditional forms of investments (market, credit and liquidity risks), investments in product and commodity indices are subject to greater price fluctuations than those affecting traditional investments. When included in a broadly diversified portfolio, however, investments in product and commodity indices generally show only a low correlation to traditional investments.

Appropriation of Income

Capital-growth Units

At present, no distribution is envisaged for the capital-growth Unit Classes (Classes "B" and "I") of the Subfunds, and the income generated shall be used to increase the Net Asset Value of the Units after deduction of general costs (capital growth).

Distribution Units

The only Fund Units issued as Distribution Units are those of Class "A". The Management Company decides what distribution shall be made from the net investment income attributable to each class of distribution Units of each Subfund. In addition, gains made on the sale of assets belonging to the Fund may be stated in full or in part in the profit and loss account and distributed to investors. Further distributions may be made from the Fund's assets in order to achieve an appropriate distribution ratio.

Distributions are paid annually within three months of the close of each financial year.

Expenses

Charges to be Borne by the Unitholder

The maximum issuing fee for all Classes of Units is specified in the "Summary of Unit Classes" below. No redemption fees are charged.

Charges to be Debited to the Fund's Assets

The management fee and the total costs to be borne by each Subfund for each Unit Class on an annual basis (Total Expense Ratio – TER) are set out in the "Summary of Unit Classes" below. The TER comprises the management fee, the Custodian Bank's fee, the tax d'abonnement and all other expenses as listed in the full Sales Prospectus and is calculated according to the following formula:

TER % = total operating expenses in RC divided by average A in RC × 100

Explanation: RC = Units in the Fund's reference currency

A = assets of the Subfund

The Portfolio Turnover Rate (PTR) is calculated using the following formula:

$$\text{PTR} = \frac{(\text{sum 1} - \text{sum 2})}{\text{average net fund assets in RC}^*} \times 100$$

* RC = units of the subfund's reference currency

Sum 1 = sum of securities transactions = X + Y

Securities purchases in RC = X

Securities sales in RC = Y

Sum 2 in RC = sum of fund unit transactions = S + T

Issuance of fund units in RC = S

Redemption of fund units in RC = T

Taxes

The Fund's assets are subject to a tax ("taxe d'abonnement") in the Grand Duchy of Luxembourg of 0.05% p.a., payable from the management fee. The Fund's income is not taxable in Luxembourg. In accordance with the provisions of the Luxembourg law of 21 June 2005, withholding tax will in future be payable in accordance with the European Directive 2003/48/EC on interest income which – pursuant to said directive – accrues from distributions or from the transfer, exchange or redemption of units of a Subfund and is directly credited by a paying agent to a beneficial owner who is a natural person resident in another EU member state. The above shall only apply, however, if the investments of the Subfund which generate interest income as defined in European Council Directive 2003/48/EC exceed 15% of the Subfund's total net assets in the case of a distribution or 40% of total net assets in the case of the transfer, exchange or redemption of distribution or capital growth units. The tax consequences will vary for each investor in accordance with the laws and practices currently in force in a Unitholder's country of citizenship, residence or temporary domicile, and in accordance with his or her personal circumstances.

Net Asset Value

The Net Asset Value of the Units is determined by the Management Company on each Banking Day in Luxembourg.

Publication of Prices

The Net Asset Value is published daily on the Internet at www.credit-suisse.com and in various newspapers.

Subscription, Redemption and Conversion of Units

Units may be subscribed, redeemed or converted on any business day in Luxembourg until 3 p.m. at the Central Administration, the Main Distributor or at a Selling Agent authorized by the Management Company to accept applications to subscribe, redeem or convert Units. The fee charged for conversions shall not exceed half the initial sales charge of the Class into which the Units are converted.

Units of Class "B" are only sold to investors who have an account with Credit Suisse, Zurich, or one of its branches.

The minimum holdings of Units are set out in the "Summary of Unit Classes" below.

Additional Information

The Fund is an unincorporated open-ended undertaking for collective investment in securities ("FCP") and is admitted in accordance with the first part of the law of 20 December 2002. The Fund was established in Luxembourg on 19 March 1993 for an indefinite period. The accounting year of the Fund closes on 31 March of each year.

The latest version of the Sales Prospectus was made available in May 2008.

Information to Unitholders in Switzerland

All notices to Unitholders shall be published at least in the "Schweizerisches Handelsamtsblatt" and on the electronic platform "www.swissfunddata.ch". Prices shall be published daily on the electronic platform "www.swissfunddata.ch" as a minimum.

Distribution of Units in Germany

Deutsche Bank AG, Junghofstrasse 5-9, D-60311 Frankfurt am Main, is the Paying Agent for the Fund in Germany.

Applications for the redemption and conversion of Units may be lodged with the Paying Agent.

All payments which are intended for Unitholders (including proceeds of the redemption of Units and any distributions) may be channelled, at their request, via the Paying Agent and/or paid out by the Paying Agent in cash in euros.

The Paying Agent is also the Information Agent for the Fund in Germany. Any correspondence with the Paying and Information Agent in Germany should be directed to Deutsche Bank AG, TSS/Global Equity Services, Post IPO Services.

Credit Suisse (Deutschland) AG, Junghofstrasse 16, D-60311 Frankfurt am Main, is an additional Information Agent (individually and collectively referred to as "Information Agent") for the Fund in Germany.

Investors may obtain hard copies of the Sales Prospectus, Simplified Prospectus, Management Regulations, audited annual report and unaudited semi-annual report, together with the issue, redemption and conversion prices, are available free of charge from the Information Agent. Furthermore, the Management Company's articles of incorporation are available for inspection at the Information Agent.

Any required notices to Unitholders and pricing announcements shall be published in the "Börsen-Zeitung", as a minimum. The Management Company may also place announcements in other newspapers and periodicals of its choice.

Special risks arising from new taxation-related disclosure obligations in Germany:

The Management Company is required, if requested, to supply the German tax authorities with evidence demonstrating, for example, the correctness of the declared basis for taxation. The calculation of this basis may be interpreted in different ways, and it is not possible to guarantee that the German tax authorities will accept the Management Company's calculation method in every significant respect. Moreover, investors must be aware that, in the event that past errors come to light, corrections may not be generally made with retroactive effect but in principle are only applied to the current financial year. Consequently, such corrections may adversely affect or benefit those investors who receive a distribution or to whom capital growth accrues in the current financial year.

Investment Objective

The investment objective is to achieve an appropriate return (in terms of the reference currency) by taking advantage of the possibilities for international diversification.

Investment Policy

The assets shall be invested globally in equities and equity-type securities as well as in fixed-interest and floating-rate securities of any currency. Fixed-interest and floating-rate securities will as a rule account for a significantly larger proportion of the assets than equities and equity-type securities and will accordingly account for at least 50% of the Subfund's net assets at any time. In addition, up to 30% of net assets may be invested in certificates and/or derivatives in accordance with the requirements stated in the sections above on product, commodity, hedge fund and real estate fund indices. Investments in certificates on any single index in the aforementioned investment categories may not exceed 15% of net assets. In terms of currencies, the bulk of the investments is made in the reference currency. In this way, the risks associated with currency and price fluctuations are minimized in the long term.

Reference Currency

- Credit Suisse Portfolio Fund (Lux) Income (Euro): euro
- Credit Suisse Portfolio Fund (Lux) Income (Sfr): Swiss franc
- Credit Suisse Portfolio Fund (Lux) Income (US\$): US dollar

Risk Profile

Risk-acceptance rating: moderately conservative. The "Income" Subfunds can be expected to exhibit moderate but fairly steady growth. Slight price falls are possible over a one-year time horizon.

Profile of a Typical Investor

The "Income" Subfunds are suitable for investors who prefer security and a steady income and who also attach importance to having an internationally diversified portfolio with low-level diversification into equities and non-traditional investments.

Credit Suisse Portfolio Fund (Lux) Reddito (Euro)

Investment Objective

The objective of the investment policy is to generate an appropriate return (in terms of the reference currency) on the capital invested, while taking advantage of the opportunities provided by international diversification.

Investment Policy

The assets shall be invested globally in equities and equity-type securities as well as in fixed-interest and floating-rate securities of any currency. The fixed-interest and floating-rate instruments are given a significantly higher weighting than equities and equity-type securities and will accordingly account for at least 50% of the net assets of the Subfund at any time. In addition, up to 30% of net assets may be invested in certificates and/or derivatives in accordance with the requirements stated in the sections above on product, commodity, hedge fund and real estate fund indices. Investments in certificates on any single index in the aforementioned investment categories may not exceed 15% of net assets. In terms of currencies, the main emphasis is placed on the reference currency. In this way, the risks associated with currency and price fluctuations are minimized in the long term. The investment policy is geared to the needs of income-oriented Italian investors; investments in shares and similar equity instruments of entities domiciled in Italy will thus account for a larger proportion of the assets than of similar instruments issued by other issuers.

Reference Currency

Euro

Risk Profile

Risk-acceptance rating: moderately conservative. The Subfund can be expected to see moderate but fairly steady growth. Slight price falls are possible over a one-year time horizon.

Profile of a Typical Investor

The Subfund is suitable primarily for Italian investors who prefer security and a steady income and who also attach importance to having an internationally diversified portfolio with low-level diversification into equities and non-traditional investments focusing on Italian issuers.

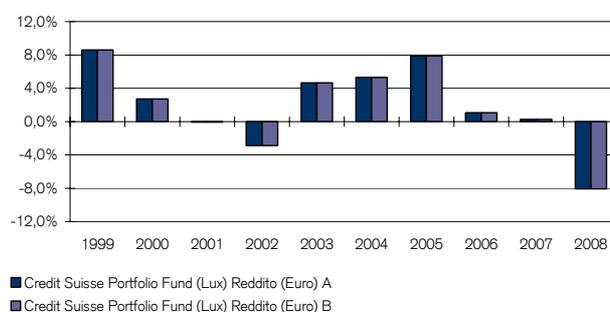

Performance

Credit Suisse Portfolio Fund (Lux) Balanced (Euro) Credit Suisse Portfolio Fund (Lux) Balanced (Sfr) Credit Suisse Portfolio Fund (Lux) Balanced (US\$)

Investment Objective

The investment objective is to achieve the highest possible overall performance, consisting of current income, price gains and currency gains (in terms of the reference currency) by taking advantage of the possibilities for international diversification.

Investment Policy

At least 30% of the assets must be invested in equities and equity-type securities (including units or shares of UCIs which themselves invest in equities and equity-type securities). At least 40% of the assets must be invested in fixed-interest and floating-rate securities (including corresponding units or shares of UCIs which themselves invest in fixed-interest and floating-rate securities). Investments in certificates and/or derivatives in accordance with the requirements stated in the sections above on product, commodity, hedge fund and real estate fund indices form an investment category in their own right and must not total more than 30% of net assets. Investments in certificates on any single index in the aforementioned investment categories may not exceed 15% of net assets. In terms of currencies, the bulk of the investment may at times be made in a currency other than the reference currency. Larger currency and price fluctuations are accepted than for the "Income" Subfunds.

- Credit Suisse Portfolio Fund (Lux) Balanced (US\$): US dollar

Risk Profile

Risk-acceptance rating: dynamic. The "Balanced" Subfunds have above-average growth potential. A drop in price is possible at any time.

Profile of a Typical Investor

The "Balanced" Subfunds are suitable for investors who would prefer a balanced and internationally diversified portfolio which is spread across all traditional investment classes but with low-level diversification into non-traditional investments.

Credit Suisse Portfolio Fund (Lux) Growth (Sfr)

Credit Suisse Portfolio Fund (Lux) Growth (US\$)

Investment Objective

The investment objective is to achieve the highest possible overall performance, consisting of current income, price gains and currency gains (in terms of the reference currency) by taking advantage of the possibilities for international diversification.

Investment Policy

The assets shall be invested globally in equities and equity-type securities as well as in fixed-interest and floating-rate securities of any currency. Investments in equities and equity-type securities will as a rule account for a significantly larger proportion of the assets than investment in fixed-interest and floating-rate securities and accordingly account for more than 60% of the Subfund's net assets at any time. The liquid assets held in the form of sight and time deposits, together with debt instruments which generate interest income within the meaning of EU directive 2003/48/EC, may not exceed 40% of the Subfund's net assets. In addition, up to 30% of net assets may be invested in certificates and/or derivatives in accordance with the requirements stated in the sections above on product, commodity, hedge fund and real estate fund indices. Investments in certificates on any single index in the aforementioned investment categories may not exceed 15% of net assets.

The bulk of the investment may be made in a currency other than the reference currency. For these Subfunds, larger currency and price fluctuations are accepted than is the case for the "Income" and "Balanced" Subfunds.

Reference Currency

- Credit Suisse Portfolio Fund (Lux) Growth (Euro): Euro
- Credit Suisse Portfolio Fund (Lux) Growth (Sfr): Swiss franc
- Credit Suisse Portfolio Fund (Lux) Growth (US\$): US dollar

Risk Profile

Risk-acceptance rating: very dynamic. The "Growth" Subfunds have exceptionally high growth potential. A sharp drop in price is possible at any time.

Profile of a Typical Investor

The "Growth" Subfunds are suitable for dynamic investors who attach importance to having an internationally diversified portfolio spread across all traditional investment categories and with a low-level diversification into non-traditional investments, in which the equity component is usually larger than the bond component.
