

TT UK EQUITY FUND

SIMPLIFIED PROSPECTUS

This Simplified Prospectus contains key information in relation to TT UK Equity Fund (the Fund), a sub-fund of TT International Funds PLC (the Company). The Company is an umbrella fund with segregated liability between its sub-funds and an open-ended investment company with variable capital governed by the laws of Ireland which was incorporated on 13 August 2001 and authorised on 5 September 2001 by the Irish Financial Services Regulatory Authority under the European Communities (UCITS) Regulation, 2003. The information contained in this Simplified Prospectus has been derived from the Prospectus of the Company dated 8 July 2009 (the Prospectus) which alone contains full details of the Company, the offering of shares in the Fund and related matters. Details of the other sub-funds of the Company are set out in the relevant Supplements. In applying for Shares you will be treated as subscribing solely on the basis of the Prospectus and accordingly potential investors are advised to read the Prospectus before making an investment decision whether or not to invest in the Fund. For details about the Fund's holdings, please see the Fund's most recent annual or semi-annual report. The base currency of the Fund is Sterling.

The rights and duties of the investor as well as the legal relationship with the Fund are laid down in the Prospectus. The Prospectus and periodical reports may be obtained free of charge from TT International.

Investment objective	The objective of the Fund is to achieve absolute returns producing long term capital growth.
Investment policy	<p>The Fund seeks to achieve its investment objective by investing in a diversified portfolio of primarily equity and equity-related securities traded in the United Kingdom which the Investment Manager believes have sound prospects for sustainable growth and represent value in the form of assets and earnings. Under normal market conditions, the Fund will invest at least 80 per cent of its net assets in equity or equity-related securities traded on the exchanges included in the FTSE All Share Index, including common stocks, preferred stocks, warrants (not more than 5 per cent of the net assets of the Fund) and convertible debt securities including non-investment grade debt securities (not more than 5 per cent in total of the net assets of the Fund may be invested in such securities). At all times at least two thirds of the Fund's total assets will be invested in equity or equity-related securities (excluding convertible bonds or bonds with warrants attached) of companies which are domiciled in or exercising the predominant part of their economic activity in the United Kingdom. The remaining third of the Fund's total assets may be invested in equity or equity-related securities of issuers not predominantly operating or having their registered office in the United Kingdom as well as in convertible debt securities including non-investment grade debt securities (not more than 5 per cent in total of the net assets of the Fund may be invested in such debt securities) of corporate and non-corporate issuers worldwide. The Fund may participate in initial public offerings if the Investment Manager determines participation to be appropriate. The Fund may also invest (up to 5 per cent of its net assets) indirectly in such securities through holdings in open-ended collective investment schemes that satisfy Regulation 3(2) of the Regulations. The Fund may hold ancillary liquid assets, of which up to 10 per cent of the net assets of the Fund may be held in cash. Up to 5 per cent of the net assets of the Fund may be invested in equity securities that are listed or traded on level 1 or level 2 of the RTS stock exchange or MICEX.</p> <p>Subject to the restrictions in the Prospectus relating to investment restrictions and efficient portfolio management, the Fund may use certain financial derivative instruments including futures and foreign exchange rate contracts and contracts for differences for hedging and efficient portfolio management purposes. Foreign exchange contracts may be used for hedging the Fund's currency exposure into any currency in which investments are otherwise permitted and contracts for differences as a more cost effective way of gaining exposure to an equity rather than purchasing it directly.</p>
Risk profile	The Fund should be viewed as a medium risk investment. It will under normal market

	<p>conditions have at least 80 per cent of its net assets invested in equity or equity-related securities traded on the exchanges included in the FTSE All Share Index. Up to 5 per cent of the Fund's net assets may be invested in equity securities traded in Russia, accordingly such investment may be exposed to risks specific to the Russian market including political and economic risks, commercial and credit risks, liquidity risks and operational risks.</p> <p>The value of investments can go down as well as up and an investor may not get back the amount he invests. Some of the securities in which the Fund may invest may prove to be illiquid and this may affect the price at which the Fund may liquidate positions. Securities of small capitalisation companies are less liquid and this may result in fluctuation in the price of the shares in the Fund. The Fund may be subject to counterparty risk with respect to transactions whether due to insolvency of counterparties' brokers or other cause. The assets of the Fund may be exposed to liabilities of other funds within the Company.</p> <p>Further details of the risks disclosed may be found in the Prospectus.</p>
<p>Performance Data</p>	<p style="text-align: center;">TT UK Equity Fund — Performance since April 2004 Cumulative Performance</p> <p>Inception: 1 April 2004 Performance Year 2008: -31.5% Performance since inception to 28 February 2009: +15.9%</p> <div style="text-align: center;"> <p>The chart displays the cumulative performance of two investment indices over time. The green line represents the TT UK Net fund, and the orange line represents the FTSE AllShare index. Both start at 0% in April 2004. They both show a steady increase until late 2007, peaking around 80% for TT UK Net and 70% for FTSE AllShare. Following this, both indices experience a significant drop, with TT UK Net ending at approximately 16% and FTSE AllShare ending at approximately 5% by February 2009.</p> </div> <p>Source: BBH, FTSE Performance is net of fees and for Class A shares</p> <p>Please note that past performance is not necessarily a guide to the future performance of the Fund. The data is exclusive of subscription and redemption fees.</p>
<p>Profile of a Typical Investor</p>	<p>The Fund is suitable for investors seeking long-term capital growth through investment in a portfolio of UK equities and who are prepared to accept a degree of volatility particularly over short time periods.</p>
<p>Distribution Policy</p>	<p>The Directors intend to operate a distribution policy designed to enable the Company to apply for certification as a distributing fund for the purposes of United Kingdom taxation</p>

until the rules for obtaining certification as distributing funds are replaced with a reporting funds regime. The present intention of the Directors is to distribute sufficient surplus net income to enable the Fund to obtain certification as a distributing fund for the purposes of UK taxation including deemed income for accounting purposes represented by the dividends and interest received by the Fund to the Shareholders after charging expenses and various other items. The dividends (if any) will be paid within four months of the Company's year end (being 30 September in each year).

The rules on the taxation treatment of offshore funds in the UK are in the process of being changed. In particular there is currently a proposal to replace the regime under which funds can obtain certification as distributing funds with a regime for funds to obtain certification as reporting funds. It is currently intended that this new regime will have effect for accounting periods beginning on or after 1 December 2009 (with the option of deferring the application of the new rules and continuing to apply for distributing fund status for the first period of account beginning on or after that date). Under the proposed reporting funds regime there is no requirement to make distributions to investors, but instead the Company will be required, for any Share Class for which reporting status is sought, to report the net income attributable to each investor. The investor will then be taxed on reported net income, whether or not a distribution has been made from the Company.
