Objectives and investment policy

The fund seeks to achieve long-term growth of capital by investing in common stocks of companies with significant exposure to countries with developing economies and/or markets. Many of these countries may be referred to as emerging countries or emerging markets. The fund may also invest in debt securities of issuers with exposure to these countries.

Essential features

The fund invests in securities of issuers based primarily in qualified countries that have developing economies and/or markets. The list of

qualified countries is available on the website capitalgroup.com/international. The fund may invest its assets in equity securities of any company, regardless of where it is based, if the investment adviser determines that a significant portion of its assets or revenues is attributable to developing countries. The fund may also invest its assets in nonconvertible debt securities, including securities of issuers rated Ba1 or below and BB+ or below by credit rating agencies designated by the Investment Adviser or unrated but determined to be of equivalent quality.

Investors can buy and sell shares of the fund on a daily basis. This fund may only be appropriate for long-term investment.

This fund is an actively managed UCITS. It is not managed in reference to a benchmark. Any information in relation to the index is provided for context and illustration only.

Dividends

Dividends in this class will generally be paid at least once a year.

Risk and reward profile

Historical data, such as is used in calculating this indicator, may not be a reliable indication for the future. The risk category shown is not guaranteed and may shift over time. The lowest category does not mean risk free.

The fund is rated 5 due to the nature of its investments which include the risks listed below. These factors singularly or in combination may impact the value of the fund's investments or expose the fund to losses.

- **Equities risk:** The prices of equity securities may decline in response to certain events, including those directly involving the companies whose securities are owned by the fund, overall market changes, local, regional or global political, social or economic instability and currency fluctuations.
- **Bonds risk:** The market values of bonds generally vary inversely with the level of interest rates - when interest rates rise, their values will tend to decline and vice versa. Funds investing in bonds will be exposed to credit risk. Securities which have a lower credit rating are generally considered to have a higher credit risk and a greater possibility of default than more highly rated securities.
- **High yield bonds risk:** These bonds typically are subject to greater market fluctuations and to greater risk of loss of income and principal

due to default by the issuer than are higher-rated bonds. Lower-rated bonds' values tend to reflect short-term corporate, economic and market developments and investor perceptions of the issuer's credit quality to a greater extent than lower yielding higher-rated bonds.

- **Liquidity risk:** Some securities, primarily unlisted securities and/or those traded in OTC markets, under certain circumstances may not be traded quickly enough in the market to prevent a loss.
- **Operational risk:** This fund may invest in markets where settlement systems are less well organised than those of developed markets. Thus settlement may be delayed and cash or securities belonging to the fund may be in jeopardy.
- **Counterparty risk:** Other financial institutions provide services to the fund such as safekeeping of assets or may serve as a counterparty to financial contracts such as derivatives. There is a risk the counterparty will not meet their obligations.
- **Derivative instruments risk:** While the fund

intends to use derivative instruments in a prudent manner and primarily for hedging and/or efficient portfolio management purposes, derivative instruments may expose a fund to additional risks related to the credit risks of the counterparty and potential for increased volatility and reduced liquidity in comparison to the underlying security positions.

- **Shanghai-Hong Kong and Shenzhen-Hong Kong Stock Connect risk:** Investments in securities traded and cleared on these two programs are subject to various risks associated with the legal and technical framework of Stock Connect and/or may involve clearing and settlement, regulatory and counterparty risks.
- **China Interbank Bond Market risk:** Investments in Chinese onshore bonds traded directly via the China Interbank Bond Market are subject to various risks associated with clearing and settlement, liquidity, regulatory and counterparty risks.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. Entry and exit charges shown are the maximum that might be taken out of your money. In some cases, you might pay less and you should speak to your financial adviser or distributor about this.

The ongoing charges are based on expenses for the last 12 months. This figure may vary from year to year. It excludes portfolio transaction costs which do affect returns.

For more information about charges, including potential capping of expenses, please see the 'Expenses' section in the prospectus and the latest annual or semi-annual reports, available at capitalgroup.com/international.
