

KEY DIFFERENTIATORS

- Quality comes first, we seek growth that can endure
- Team-based approach, rather than star-manager fund, which we believe leads to greater consistency
- ESG integrated into the investment process leveraging proprietary ESG research
- Culture matters. Comgest's broad partnership structure incentivises long-term thinking, an ESG mindset, teamwork and low employee turnover

INVESTMENT TEAM

Nicholas Morse, Slabbert Van Zyl, David Raper
Team may include advisors from affiliates within the Comgest Group.

RISK PROFILE

The indicator represents the risk profile presented in the PRIIPs Key Information Document. The indicator assumes you keep the product for 5 years otherwise the actual risk can vary significantly.

INVESTMENT POLICY

The objective of the Sub-Fund ("the Fund") is to increase the value of the Fund (capital appreciation) over the long term. The Fund intends to achieve this objective through investment in a portfolio of high-quality, long-term growth companies. The Fund will invest at least two-thirds of its assets in securities issued by companies quoted or traded on regulated markets and that have their headquarters in, or principally carry out their activities in Emerging Markets or in securities issued by governments of Emerging Market countries. Emerging Markets are predominantly located in Africa, Asia, Latin America, Eastern and Southern Europe.

The Fund is actively managed. The index is provided for comparative purposes only.

The Fund is aimed at investors with a long-term investment horizon (typically 5 years or more).

CUMULATIVE PAST PERFORMANCE (REBASED TO 100)**SFDR CLASSIFICATION: Article 8**

The Fund promotes environmental and/or social characteristics.

CARBON FOOTPRINT¹

Performance data expressed in USD. Returns may increase or decrease as a result of exchange rate fluctuations. Index: MSCI Emerging Markets - Net Return. The index is used for comparative purposes only and the Fund does not seek to replicate the index.

Past performance does not predict future returns.

Performance figures are calculated net of investment management fees, administrative fees and all other fees with the exception of sales charges. If taken into account, sales charges would have a negative impact on performance.

The cumulative graph and "Since Inception" data may refer to the last relaunch date of the share class which may differ from its actual inception date. Calendar year past performance is only shown for years for which a full calendar year of past performance is available.

30 April 2024

FUND COMMENTARY

The two principal themes in April determining market direction were US inflation and interest rates, and technology and AI. Emerging Market (EM) equities and currencies have risen since mid-January 2024 on the expectation that US interest rates would start to decline in mid-2024, while the technology sector has risen on the expectation that global growth would benefit from declining interest rates in Developed Markets, and that AI would lead to an increase in investment and demand. Consequently, valuations had become stretched in some cases and vulnerable to an increase in the cost of capital, which in April caused stocks to decline, particularly in the IT sector. This included large EM equities such as Samsung Electronics and Delta Electronics. Having said this, results from companies in the semiconductor chain have all been strong, while Samsung Electronics' Q1'24 results were ahead of expectations, with further strengthening of DRAM and NAND average selling prices. Additionally, it seems likely that Samsung will gain approval from Nvidia for HBM3e shipments in Q2'24.

Emerging currencies, especially those in Latin America, Indonesia and Korea, suffered from the stronger US dollar, thereby causing weakness from the portfolio's exposure to Mexico and Brazil in particular.

China rallied in April, with valuations attractive enough to stimulate investors to buy. The portfolio is underweight China, but stock positioning is defensive. This led to a negative contribution to performance from the portfolio's China position. The country's economic problems will not be easily or quickly resolved. These include large and ongoing declines in property prices, no inflation, overcapacity in many sectors and more capacity being added in export-orientated industries (which may face trade restrictions), weak consumer confidence and limited government stimulus.

Attribution in Korea was positive, although strong performances from value stocks such as industrial, auto and financial companies caused weak stock selection.

The portfolio further added to FPT in Vietnam, while continuing to sell down Vinamilk. FPT's Q1'24 results saw revenue and profit growth of 20%, while the company won a significant number of overseas contracts as well as announcing a USD200m investment in an AI data centre powered by the latest Nvidia chips.

The views expressed in this document are valid at the time of publication only, do not constitute independent investment research and should not be interpreted as investment advice. The reference to specific companies does not constitute a recommendation to invest directly in these securities. Allocation is subject to change without notice. Remember that past performance does not predict future returns.

RISKS

This Fund has the following core inherent risks (non-exhaustive list):

- Investing involves risk including possible loss of principal.
- The value of all investments and the income derived therefrom can decrease as well as increase.
- There is no assurance that the investment objective of the Fund will be achieved.
- To the extent that the Fund is invested in or denominated in a currency other than yours, the cost and return in your currency may increase or decrease due to exchange rate fluctuations.
- The Fund invests in emerging markets which tend to be more volatile than mature markets and the value of investments can therefore move sharply up or down.
- A more detailed description of the risk factors that apply to the Fund is set out in the Prospectus.

For more detailed information on ESG integration please consult our website: www.comgest.com/en/our-business/esg

Active Share: The percentage of fund holdings that is different from the reference index holdings. A fund that has no holdings in common with the reference index will have an active share of 100%, and a fund that has exactly the same holdings as the reference index considered will have an active share of 0%.

ADR - American Depositary Receipt: A negotiable security that represents securities of a foreign company and allows that company's shares to trade in the financial markets of the United States.

Annualised: A figure converted into an annual rate. Figures covering a period of more than one year are averaged to present a figure for a 12-month period.

Bp(s) - Basis point(s): One basis point is equal to one hundredth of 1% (i.e. 0.01%).

BV - Book Value: The value of the company assets minus its liabilities.

CAGR - Compound Annual Growth Rate: The rate of return that would be required for an investment to grow from its beginning balance to its ending balance, assuming the profits were reinvested at the end of each year of the investment's lifespan.

CapEx - Capital Expenditure: The money invested by a company to acquire or upgrade fixed, physical, non-consumable assets such as property, plants, buildings, technology, or equipment.

Cash Flow: The net amount of cash and cash equivalents being transferred in and out of a company. Cash received signifies inflows, and cash spent signifies outflows.

CPI - Consumer Price Index: An index that measures the overall change in consumer prices based on a representative basket of goods and services over time. It is the metric often used to measure inflation.

DY - Dividend Yield: A ratio that shows how much a company pays out in dividends each year relative to its share price.

EBITDA - Earnings Before Interest, Taxes, Depreciation and Amortisation: Used to measure a company's core profitability and is calculated by adding interest, tax, depreciation and amortisation expenses to net income.

EBIT - Earnings Before Interest and Taxes: Used to measure a company's core profitability and is calculated by adding interest and tax expenses to net income.

EPS - Earnings Per Share: The profits of a company attributed to each share, calculated by dividing profits after tax by the number of shares. EPS serves as an indicator of a company's profitability.

FCF - Free Cash Flow: The cash generated by a company from its normal business operations after subtracting any money spent on capital expenditures.

GDP - Gross Domestic Product: The total market value of all the finished goods and services produced within a country's border in a specific time period.

GDR - Global Depositary Receipt: A certificate issued by a bank that represents shares in a foreign stock on two or more global markets. A GDR is similar to an American depositary receipt (ADR), except an ADR only lists shares of a foreign country in the markets of the United States.

LTM - Last 12 Months: LTM multiples are backward-looking and are based on historical performance.

Market Cap(italisation): A measure of a company's size, calculated by multiplying the total number of shares in issue by the current share price. Companies are commonly grouped according to size, such as small cap, mid cap, large cap or all cap. There is no consensus on the definition of these groupings and they may vary from portfolio to portfolio depending on the country of investment.

NAV - Net Asset Value: The current market value of the portfolio's assets minus the portfolio's liabilities.

NTM - Next 12 Months: NTM multiples are forward-looking and are based on projected performance.

Ongoing Charges: A fund's operational costs over a year. Ongoing Charges are calculated as a percentage of the average fund size over the year and include, for example, investment manager's fees, administration fees and custody costs.

Operating Margin: Measures how much profit a company makes on a dollar (or relevant currency) of sales after paying for variable costs of production, such as wages and raw materials, but before paying interest or tax.

Operating Profit: A company's gross income less operating expenses and other business-related expenses, such as wages, cost of goods sold (COGS) and depreciation.

Organic Growth: Growth a company achieves by increasing output and enhancing sales through the business' own operations and internal processes. This does not include profits or growth attributable to mergers, acquisitions, divestitures and foreign exchange but rather an increase in sales and expansion through the company's own resources.

Organic Sales: Sales generated from within a company that are a direct result of the company's existing operations and internal processes. Organic sales do not include the impacts of mergers, acquisitions, divestitures and foreign exchange.

P/B or P/BV - Price-to-Book Value Ratio: Measures the market's valuation of a company relative to its book value. P/B or P/BV is calculated by dividing the company's stock price per share by its book value per share.

P/E - Price-to-Earnings Ratio: A ratio used to value a company's shares. It is calculated by dividing the current market price by the earnings per share.

P/S - Price-to-Sales Ratio: A valuation ratio that compares a company's stock price to its revenues. It is an indicator of the value that financial markets have placed on each dollar of a company's sales or revenues.

PEG - Price/Earnings-To-Growth Ratio: A stock's price-to-earnings (P/E) ratio divided by the growth rate of its earnings for a specified time period. The PEG ratio is used to determine a stock's value while also factoring in the company's expected earnings growth.

PMI - Purchasing Managers' Index: An index of the prevailing direction of economic trends in the manufacturing and service sectors.

Reference Index: Index against which a fund's performance is compared.

ROE - Return On Equity: Measures financial performance and is calculated by dividing net income by shareholders' equity. ROE is a gauge of a company's profitability and how efficiently it generates those profits.

ROIC - Return On Invested Capital: Calculation used to assess a company's efficiency at allocating the capital under its control to profitable investments.

SME - Small- Or Medium-Sized Enterprise: A company, or companies considered as a group, that are neither very small nor very large and which employ fewer than a given number of employees. This number varies across countries.

Volatility: Measures the movements of an asset up and down over time. Volatility is generally considered to be a measure of risk.
