Minimum initial investment	ISIN	SEDOL	Bloomberg	Investment structure	SRRI†	Index ticker	Domicile	Settlement	Trading frequency (cut-off)
100,000	IE00B1GHC616	B1GHC61	VANGUOG	UCITS	6	RAYNP	Ireland	T+2	Daily (16:00 Irish Time)

**Ongoing Charges Figure†** 0.95 %

†The Ongoing Charges Figure (OCF) covers administration, audit, depository, legal, registration and regulatory expenses incurred in respect of the Funds.

### Objectives and investment policy

- The Fund seeks to provide long-term capital growth.
- The Fund employs an "active management" strategy to invest mainly in U.S. stocks, with an emphasis on companies that are considered to have prospects for rapid earnings growth. The Fund is not managed with reference to a benchmark index. The Fund's Sub-Investment Manager, PRIMECAP Management Company ("PRIMECAP"), uses fundamental research to identify stocks that are expected to outperform the market over a three to five-year time horizon and that are available at attractive prices relative to their fundamental values. The Fund has the flexibility to invest in companies of any size, but it mostly invests in small- and mid-cap stocks.
- The Fund's policy is to remain substantially invested in common stocks that are listed or traded on exchanges or markets in the United States.

Performance summary\*\*

GBP—Vanguard U.S. Opportunities Fund  
Benchmark — Russell 3000 Index

	01 Mar 2017 28 Feb 2018	01 Mar 2018 28 Feb 2019	01 Mar 2019 29 Feb 2020	01 Mar 2020 28 Feb 2021	01 Mar 2021 28 Feb 2022
Fund (Net of expenses)	19.23%	5.71%	0.75%	32.44%	2.27%
Benchmark	4.39%	8.21%	10.71%	23.03%	16.55%

Performance**	1 month	Quarter	Year to date	1 year	3 years	5 years	10 years	Since inception
Fund (Net of expenses)	-1.22%	-6.31%	-7.38%	2.27%	10.91%	11.45%	17.88%	14.93%
Benchmark	-2.57%	-6.07%	-7.45%	16.55%	16.66%	12.39%	15.64%	11.95%

\*\*In this document the performance displayed for the Fund(s) and therefore relative performance to the benchmark index may be impacted by swing pricing. The NAV of a Fund may swing according to subscription/redemption activity so that transaction costs caused by these cashflows are not borne by the existing holders in a Fund. The benchmark index is not affected by swing pricing and therefore you may see tracking difference between the performance of the Fund and the benchmark.

Performance and Data is calculated on closing NAV as at 28 February 2022.

Past performance is not a reliable indicator of future results.

Key investment risks

The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events. Movements in currency exchange rates can adversely affect the return of your investment.

Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Please also read the risk factors section in the prospectus and the Key Investor Information Document, both of which are available on the Vanguard website.

This document is for professional investors only (as defined under the MiFID II Directive) investing for their own account (including management companies (fund of funds) and professional clients investing on behalf of their discretionary clients). Not to be distributed to the public.

### Investment risk information

The value of investments, and the income from them, may fall or rise and investors may get back less than they invested.

Some funds invest in emerging markets which can be more volatile than more established markets. As a result the value of your investment may rise or fall.

Investments in smaller companies may be more volatile than investments in well-established blue chip companies.

The Funds may use derivatives in order to reduce risk or cost and/or generate extra income or growth. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.

Some funds invest in securities which are denominated in different currencies. Movements in currency exchange rates can affect the return of investments.

For further information on risks, please see the 'Risk Factors' section of the prospectus on our website at <https://global.vanguard.com>.

### Glossary for fund characteristics

The fund characteristics section above contains a number of metrics that professional investors use to value individual stocks against a market or index average. These metrics can also be used to value and compare funds to the market by taking the average of all the stocks held in the fund and comparing them to those of the fund's benchmark index. We've provided a definition of the terms used for your convenience.

**Median market cap (capitalisation)** looks at all companies in a mutual fund portfolio and calculates the mid point market capitalisation. Market capitalisation represents the aggregate value of a company's stock.

**Price earnings ratio (P/E ratio)** of a stock is the price paid for a share divided by the annual profit earned by the firm per share. A stock with a price of £10 a share, and earnings last year of £1 a share, would have a P/E ratio of 10.

**Price book ratio** compares a stock's market value to its book value (the accounting value of a stock). It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share.

**Return on equity** is a measure of a company's profitability that reveals how much profit a company generates with the money shareholders have invested.

**Earnings growth rate** is a measure of growth in a company's net income (what remains after subtracting all the costs from a company's revenues) over a specific period (often one year). Earnings growth can apply to previous periods or estimated data for future periods.

**Turnover rate** is the total value of sales and purchases of stocks by a fund, less any subscriptions and redemptions monies into or out of a fund, expressed as a percentage of the fund's average value, over a specified period (usually one year).

**Equity yield characteristics** reflects distributions declared over the past twelve months as a percentage of the mid-market unit price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions.
