Market and Credit Risks	
<p>The Fund may be subject to Risk Relating to Changing Interest Rates</p> <ul style="list-style-type: none"> The value of any fixed income security held by the Fund will rise or fall inversely with changes in interest rates. Interest rates typically vary from one country to the next, and may change for a number of reasons. Those reasons include rapid expansions or contractions of a country’s money supply, changes in demand by business and consumers to borrow money and actual or anticipated changes in the rate of inflation. <p>The Fund may be subject to Credit Risk</p> <ul style="list-style-type: none"> The issuer of any debt security acquired by the Fund may default on its financial obligations. <p>The Fund may be subject to Volatility Risk</p> <ul style="list-style-type: none"> The net asset value of the Fund may be subject to high volatility as a result of its investment policy and/or use of financial derivative instruments. <p>The Fund may be subject to Risk Relating to Geographic Concentration</p> <ul style="list-style-type: none"> The Fund may concentrate its investments in inflation-linked debt securities of issuers worldwide. Any geographic concentration of investments involves more risk than investing more broadly. As a result, the Fund may underperform funds investing in other parts of the world when economies of its investment area are experiencing difficulty or its stocks are otherwise out of favour. Moreover, economies of the Fund’s investment area may be significantly affected by adverse political, economic or regulatory developments.
