

Raiffeisen 304 - ESG - Euro Corporates (I)

Current fund strategy

Raiffeisen 304 - ESG - Euro Corporates (I) is a bond fund. It invests predominantly in EUR-denominated corporate bonds with high ratings (investment grade), with broad diversification. The Fund promotes ecological/social characteristics and to this end it invests in bonds on the basis of ESG (environmental, social, governance) criteria. At least 51% of the Fund's investments are sustainable with social and environmental objectives; at this time, investment in line with the EU Taxonomy Regulation is not targeted. The Fund is particularly suitable for investors who wish to benefit from the earnings potential of a well-diversified investment in EUR-denominated corporate bonds with good ratings while at the same time supporting sustainable business practices and who are aware of the related higher risks, ranging from elevated price volatility to possible loss of capital.

The fund is actively managed with reference to a benchmark. Such reference to a benchmark does not restrict the fund management's scope of action.

Comments from fund management

The European bond market posted modest gains in March. In light of the diminishing inflationary pressure, the central banks in Europe and the USA signalled interest rate cuts over the remainder of the year. Corporate bonds once again performed noticeably better than comparable government bonds. Particularly financials and lower-rated companies were in high demand.

The average duration of the bonds in the fund was increased at the beginning of the month. Corporate bonds were bought on the primary market over the course of the month.

Provided that the price pressure in the service sector subsides, the ECB will implement its first key rate cut in June of this year. This should have a positive impact on the bond markets in 2024, and the decent economic data will also support corporate earnings. High-quality corporate bonds should thus develop positively. (21.03.2024)

Raiffeisen KAG calculates performance based on the published fund price, using the OeKB methodology. For more details on the calculation, please see the next page. ¹

The performance scenarios can be found in the key information document.

The benchmark is presented without costs and is not directly investable.

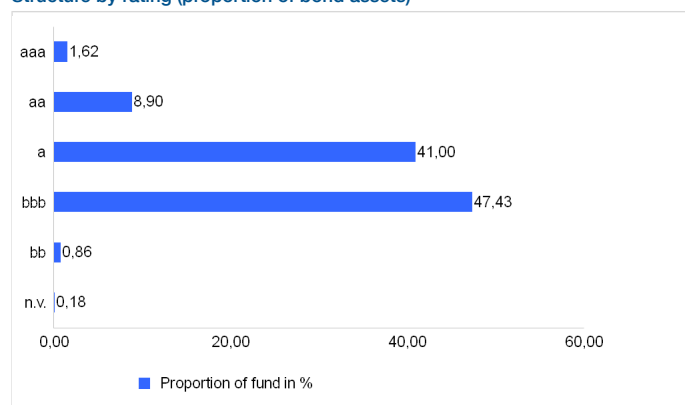

Presentation in accordance with the benchmark used in the past, which may deviate from the benchmark reported. We can also provide you with more detailed information free of charge on request.

The management company may change the benchmark in the interests of the unitholders. The respective current benchmark will be shown in the Key Investor Information Document, the prospectus or in the information pursuant to § 21 of the Austrian Alternative Investment Fund Managers Act (AIFMG).

This is a marketing notice. All of the data and information have been collected and assessed with great care; the sources used are considered to be reliable. The information is current as of the time of update. No liability or guaranty can be assumed for the accuracy or completeness of the information.

The English-language versions of the published prospectuses and the information for investors pursuant to § 21 of the Austrian Alternative Investment Fund Managers Act (Alternative Investmentfonds Manager-Gesetz, AIFMG) and the Spanish key information documents for the funds of Raiffeisen Kapitalanlage-Gesellschaft m.b.H. authorized for distribution in Spain may be downloaded from the "Prices and Documents" section of the website www.rcm-international.com/RCMES or obtained from Allfunds Bank S.A., Calle Estafeta, n° 6, Edificio 3, Complejo Plaza de la Fuente, La Moraleja, C.P. 28109, Alcobendas, Madrid, or Banco Inversis S.A., Avda. de la Hispanidad, 6, Edificio Plaza Aeropuerto, 28042 Madrid. A summary of investors' rights in German and English is available via the following link: <https://www.rcm.at/corporategovernance>. Please note that Raiffeisen Kapitalanlage-Gesellschaft m.b.H. has the right to terminate the arrangements made for the distribution of fund unit certificates outside of the fund's country of domicile, Austria.

¹ The performance is calculated by Raiffeisen KAG on the basis of published fund prices, using the method developed by OeKB (Österreichische Kontrollbank AG). Individual costs such as transaction fees, the subscription fee, the redemption fee, the custody charges of the investor and taxes are not included in the performance calculation. If included, these would lead to a lower performance. Past performance is not a reliable indicator of future performance. Markets could develop very differently in the future. Based on the illustration, you can assess how the fund was managed in the past and compare it to its benchmark. Notice for investors with a different functional currency than the fund currency: We expressly point out that returns may rise or fall due to currency fluctuations.

² The risk indicator assumes you keep the product for 5 years.

³ These are the ongoing costs incurred if you exit after 1 year. The ongoing costs are comprised of management fees and other administrative or operating costs (Estimate on the basis of the actual costs over the last year) as well as transaction costs (estimate of the costs incurred when the management company buys and sells the underlying investments for the fund. The actual amount will vary depending on how much the management company buys and sells.) Value pursuant to the key information document with updated transaction costs valid at the time of preparing this information.

⁴ For securities with an early call right, this is taken into account when calculating bond indicators. If issuers do not exercise the early call option, this results in a corresponding extension of the maturity structure and thus changes the above-mentioned indicators.
