

WisdomTree

Physical Palladium

Investment Objective

WisdomTree Physical Palladium is designed to offer security holders a secured, simple and cost-efficient way to access the palladium market by providing a return equivalent to the movements in the palladium spot price less the applicable management fee.

WisdomTree Physical Palladium is backed by physical allocated palladium held by HSBC Bank plc (the custodian). Only metal that conforms with the London Platinum and Palladium Association's (LPPM) rules for Good Delivery can be accepted by the custodian. Each physical bar is segregated, individually identified and allocated.

About Pricing

Each individual WisdomTree Physical Palladium security has an effective entitlement to palladium, and that entitlement changes daily to reflect the accrual of the management fee.

Authorised participants create and redeem WisdomTree Physical Palladium securities by delivering or receiving palladium that conforms to LPPM Good Delivery standards.

WisdomTree Physical Palladium securities are traded on exchange with a price that is based on the spot price of palladium multiplied by the applicable metal entitlement.

Potential Risks

An investment in this product involves a degree of risk. Any decision to invest should be based on the information contained in the relevant prospectus. Prospective investors should obtain independent accounting, tax and legal advice and should consult their professional advisers to ascertain the suitability of this product as an investment to their own circumstances.

This product is not a UCITS product.

Securities in this product are structured as debt securities and not as shares (equity).

The value of a security in this product may go up or down and a security holder may lose some or all of the amount invested.

The price of precious metals may fluctuate and may be affected by numerous factors including supply and demand, the global financial markets and other political, financial or economic events.

The price of precious metals is generally quoted in US Dollars. To the extent that a security holder values precious metals in another currency, the value will be affected by changes in the exchange rate.

At any time, the price at which metal securities trade on an exchange may not always accurately reflect the price of precious metals.

Product Information

Asset Class	Commodities
ISIN	JE00B1VS3002
Base Currency	USD
Since Fund Inception	24/04/2007

Glossary

Authorised participant Banks or other financial institutions that act as intermediaries between providers of securities and the ultimate investors. Authorised participants will liaise with providers to arrange for the creation and redemption of securities as requested by security holders. **ETC** Exchange-traded commodities are products that track the price of commodities, providing security holders with the opportunity to gain access to the commodities market without having to take delivery of the commodities in question. Securities in ETCs are generally structured as debt securities rather than as equity. **Good delivery** Rules for Good Delivery are issued by supervisory metals bodies in order to ensure that metals comply with a certain standard. **Physically backed** Physically backed ETCs hold the physical metal that the product is tracking. This physical metal is held in a vault by a custodian bank nominated by the provider and gives security holders a further level of security. **Trustee** The trustee is an independent entity that holds the physical metal on trust for the benefit of the security holders in proportion to each security holder's respective entitlement. **Spot Price** The price of a commodity or security at any given time.

For professional clients only. Past performance is not a reliable indicator of future performance. Any historical performance included in this document may be based on back testing. Back testing is the process of evaluating an investment strategy by applying it to historical data to simulate what the performance of such strategy would have been. Back tested performance is purely hypothetical and is provided in this document solely for informational purposes. Back tested data does not represent actual performance and should not be interpreted as an indication of actual or future performance. The value of any investment may be affected by exchange rate movements. Any decision to invest should be based on the information contained in the appropriate prospectus and after seeking independent investment, tax and legal advice. These products may not be available in your market or suitable for you. The content of this document does not constitute investment advice nor an offer for sale nor a solicitation of an offer to buy any product or make any investment.

An investment in exchange-traded products ("ETPs") is dependent on the performance of the underlying index, less costs, but it is not expected to match that performance precisely. ETPs involve numerous risks including among others, general market risks relating to the relevant underlying index, credit risks on the provider of index swaps utilised in the ETP, exchange rate risks, interest rate risks, inflationary risks, liquidity risks and legal and regulatory risks.
