## Simplified Prospectus

### Robeco Capital Growth Funds - Robeco All Strategy Euro Bonds

<b>Important information</b>	<p>This simplified prospectus contains key information about the Sub-fund. If you would like more information before you invest, please consult the most recent full prospectus (hereinafter the "Full Prospectus"). Unless defined in this document, defined terms shall bear the same meaning as in the Full Prospectus. For details about the Sub-fund's holdings, please see the most recent report.</p> <p>Robeco Capital Growth Funds – Robeco All Strategy Euro Bonds (hereinafter the "Sub-fund ") is a Sub-fund of Robeco Capital Growth Funds (hereinafter the "Company"). The Company is a Luxembourg investment company with multiple compartments organised as a "<i>société anonyme</i>" incorporated on 2 May 1997. The Company is organised under Part I (UCITS) of the Luxembourg law of 20 December 2002 (as amended) as a "<i>Société d'Investissement à Capital Variable</i>", for an unlimited period. It comprises several Sub-funds which are described in the Full Prospectus.</p> <p>The rights and duties of the investor as well as the legal relationship with the Company are laid down in the Full Prospectus and the articles of incorporation of the Company. The Full Prospectus and the periodical reports may be obtained free of charge from the Company.</p>
<b>Investment objective and policy</b>	<p>The Sub-fund aims to provide long term capital growth. The Sub-fund invests at least two-thirds of its total assets in bonds, asset backed securities and similar fixed income securities denominated in the EURO currency.</p> <p>The Sub-fund invests internationally, which means that a substantial part of the portfolio can at any time be invested outside the Euro-area.</p> <p>Investors should consider that for investments in bonds and other marketable debt securities and debt instruments which are rated "BB+" or lower or equivalent by one of the recognized rating agencies, the factors giving security to principal and interest can be considered less than adequate over a great length of time.</p> <p>The Sub-fund will invest in financial derivative instruments for hedging and optimal portfolio management purposes but also to actively take positions in the global bond, money market and currency markets. In case the Sub-fund uses derivatives for other purposes than duration and/or currency adjustments and/or inflation adjustments, the underlying of such investments respects the investment policy. The buying or selling of exchange traded and over-the-counter derivatives are permitted, including but not limited to futures (including but not limited to interest rate futures, bond futures, swap note futures), options, swaps (including but not limited to interest rate swaps, credit default swaps ("CDS"), index swaps, CDS basket swaps and cross currency swaps) and currency forwards.</p> <p>The Sub-fund may not invest more than 10% of its total assets in equities or other participation rights, more than 25% of its total assets in convertible bonds and more than one third of its total assets in money market instruments.</p>

	<p>The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information, please consult Appendix III "Risk Management" of the Full Prospectus.</p> <p>The Sub-fund aims to obtain an optimal investment result in the currency in which it is denominated. The Sub-fund will use as benchmark a widely accepted external index hedged for currency risk. Efficient portfolio management may include currency hedges. The investments will be hedged towards their currency of denomination where appropriate. This active policy may cause the Sub-fund's currency positions to deviate from the weights of the respective currencies in the relevant benchmark. The Sub-fund is allowed to take active currency positions resulting in positive or negative currency exposure in currencies other than the currency of denomination of the Sub-fund.</p> <p>Further details are provided in the Full Prospectus.</p>																						
<p><b>Sub-fund's risk profile</b></p>	<p>The investments in bonds and debt instruments may involve risks (linked to the default of the issuers, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It can not be guaranteed either that the value of a share in the Sub-fund will not fall below its value at the time of acquisition.</p> <p><b>Risk considerations for the Sub-fund</b></p> <p><b>Investors should note that, in addition to the above mentioned risks, the investment strategy and risks inherent to the Sub-fund are not typically encountered in traditional fixed income long only funds. The Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. The Sub-fund may also use derivatives to take short positions in some investments. Should the value of such investment increase, it will have a negative effect on the Sub-fund's value. In extreme market conditions, the Sub-fund may be faced with the theoretically unlimited losses. Such extreme market conditions could mean that investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.</b></p> <p>For further details, please consult the Full Prospectus.</p>
