(the "Compartment") is a compartment of Pictet (the "Fund")

I EUR (the "Share class") - ISIN LU0303494743

This Fund is managed by Pictet Asset Management (Europe) S.A., part of the Pictet group

Objectives and Investment Policy

- The Compartment's objective is to seek a revenue and capital growth by primarily offering investors exposure to debt securities of all kinds (including, but not limited to, bonds issued by governments or companies, convertible or non-convertible bonds, high yield bonds, inflation-linked bonds, ABSs, MBSs, etc.) and money market instruments.
- The eligible financial instruments are mainly bonds, money-market instruments and, to a lesser extent, derivatives.
- The Compartment may also invest up to 20% of its net assets in contingent convertible bonds ("CoCo Bonds").
- The Compartment may use financial derivative instruments for efficient portfolio management or hedging purposes. The Compartment may also invest in structured products.
- These investments may be made on all markets (including emerging markets) and in all currencies within the fixed income universe.
- The Compartment is actively managed by allocating its wealth to various fixed-income instruments and various currencies, within a strict risk control environment.
- This Share class does not distribute dividends.
- The price of the Share class is calculated on a daily basis. Investors may redeem shares of the Compartment on any business day in Luxembourg unless no underlying price is available (market closed).
- The price of the Share class may be adjusted to ensure that the costs caused by subscriptions or redemptions are borne by the investors responsible for those flows.
- Recommendation: this Compartment may not be appropriate for investors who plan to withdraw their money within 3 years.

Risk and Reward Profile

- Historical data, such as that used to calculate the synthetic indicator, might not be a reliable indication of the future risk profile of the Share class.
- The risk category shown is neither a target nor a guarantee and may change over time.
- The lowest risk category does not mean a risk-free investment.
- This Compartment is likely to use leverage and invests in fixed income assets that are mainly issued or guaranteed by governments, agencies, supra-nationals, which is why it is in this risk category.
- This value is affected by various factors, including:
 - This asset class is subject to political and economic risks which may have a significant impact on the Compartment's performance and volatility.
 - Because of our investment approach, the Compartment may be exposed to interest rate risk and to currency risk.

- The Compartment's performance should benefit from the yield offered by this asset class.
 - The Share class also bears the following risks that are not explained by the synthetic risk indicator:
 - Credit risk: given the investment approach, the Compartment bears some credit risk.
 - Liquidity risk: when market conditions are unusual or a market is characterised by particularly low volumes, the Compartment may encounter difficulties in valuing and/or trading some of its assets, particularly to satisfy large redemption requests.
 - Operational risk: the Compartment is subject to the risk of significant losses resulting from human error or system failures or incorrect valuation of the underlying securities.
 - Counterparty risk: the use of derivatives in the form of contracts with counterparties may imply significant losses if a counterparty defaults and cannot honour its liabilities.
- Contingent Convertible ('Coco') Bond Risk: Investment may result in material losses to the position based on certain trigger events specific to the issuer. CoCos typically allow an issuer to suspend interest payments or force conversion into equity shares when it runs into trouble.
