China Low Volatility Equity Portfolio

a sub-fund of AB FCP I

Class C Shares (LU0277860069)

This Fund is managed by AllianceBernstein (Luxembourg) S.à r.l., part of the AB Group

OBJECTIVES AND INVESTMENT POLICY

Investment objective

The Fund seeks to increase the value of your investment over the long term.

Investment policy

The Fund invests primarily in equities of companies that are based or conduct significant business activities in the China region. The Fund may invest in the equity securities of any company or industry in the China region with the potential for capital appreciation. In addition, the Fund may invest in domestic Chinese securities that are traded on the China A-share equity markets.

The Investment Manager will seek to deliver long-term capital growth while providing downside protection and limiting volatility relative to the MSCI China Index USD.

AllianceBernstein Hong Kong Limited has been granted a Renminbi Qualified Foreign Institutional Investor (RQFII) quota, which enables the Fund to make direct investments in Chinese equity securities. The Fund may also invest in China A-shares through the Hong Kong Stock Connect trading link with domestic Chinese markets.

The Fund may use derivatives (i) for efficient portfolio management and (ii) in seeking to reduce potential risks.

Responsible Investing

The Fund is classified as Article 8 under SFDR. For more information, please refer to sustainability-related disclosures in the prospectus.

Benchmark

MSCI China Index USD used for performance comparison and volatility measurement.

The Fund is actively managed and the Investment Manager is not constrained by its benchmark. Please see the Fund's prospectus for more information.

Fund currency

The reference currency of the Fund is USD.

Share class currency

The reference currency of the share class is USD.

Distribution policy

This share class is a non-distributing share class. Income and capital gains derived from the Fund are reinvested.

Redemption

Shares may be redeemed on any day when both the New York Stock Exchange and Luxembourg banks are open for business.

Terms to understand

China A-Shares: Shares in mainland China-based companies that trade on Chinese stock exchanges such as the Shanghai Stock Exchange and the Shenzhen Stock Exchange. A-shares are generally available for purchase by mainland citizens in China; foreign investment in A-shares is subject to significant regulatory restrictions.

China region: Region including the People's Republic of China and the Hong Kong Special Administrative Region.

Derivatives: Financial instruments whose value is linked to one or more rates, indices, share prices or other values.

Equities: Securities that represent an ownership stake in a company.

SFDR: Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector.

Volatility: Measure of the pricing behavior of a security.

RISK AND REWARD PROFILE

Lower risk

Higher risk

Potentially lower reward

Potentially higher reward

1	2	3	4	5	6	7
---	---	---	---	---	---	---

What does this risk indicator mean?

This synthetic risk and reward indicator (SRRI) scale rating indicates how the Fund may perform and the risk of losing some or all of your capital. Generally the potential for higher gains also means a larger risk of losses. The lowest category does not mean a risk free investment.

The above rating is an estimate, not a guarantee. It is calculated using industry-standard methods and is based on medium-term volatility (how sharply the Fund's actual or estimated share price has gone up and down over five years).

Historical data may not be a reliable indication of the future risk profile of this Fund. The risk and reward category for this Fund is not guaranteed to remain unchanged and may shift over time.

Why is this Fund in this category?

The Fund is not guaranteed in capital. The Fund is invested in equity securities that can face sharp variations up or down and that can generate significant gains or losses.

Risks materially relevant to the Fund but not adequately captured by the SRRI:

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events, which could amplify everyday risks and could trigger other risks, such as:

China Liquidity risk: The Fund invests in China through a RQFII quota and so is subject to the liquidity risks associated with investment under a state-supervised quota system. The Fund may additionally invest in domestic Chinese equity markets through the Shanghai-Hong Kong Stock Connect Scheme, and so is subject to the custody, execution and liquidity risks of investing in securities via this newly established market infrastructure.

Counterparty risk: If an entity with which the Fund does business becomes insolvent, payments owed to the Fund could be delayed, reduced, or eliminated.

Focus risk: The Fund may have significant exposure to a single industry sector or country, and could be more sensitive to events impacting that sector or country.

Liquidity risk: Certain securities could become hard to buy or to sell at a desired time or price.
