Article 8 ■

Objective and Investment Policy

Seeks to increase the value of your investment over the recommended holding period, through investment in Sustainable Investments pursuant to Article 9 of the Disclosure Regulation. The Sub-Fund invests mainly in a broad range of equities of companies from anywhere in the world that offer products or technologies that promote a cleaner and healthier environment or are environmentally friendly. Examples include companies in the fields of air pollution control, alternative energy, recycling, water treatment and biotechnology. Whilst the investment manager aims to invest in ESG Rated securities not all investments of the Sub-Fund will have an ESG rating and in any event such investments will not be more than 10% of the Sub-Fund.

The Sub-Fund makes use of derivatives to reduce various risks, for efficient portfolio management and as a way to gain exposure (long or short) to various assets, markets or other investment opportunities (including derivatives which focus on equities and foreign exchange).

Benchmark : The Sub-Fund is actively managed. The Sub-Fund may use a benchmark a posteriori as an indicator for assessing the Sub-Fund's performance and, as regards the performance fee benchmark used by relevant share classes, for calculating the performance fees. There are no constraints relative to any such Benchmark restraining portfolio construction. The Sub-Fund has not designated the Benchmark as a reference benchmark for the purpose of the Disclosure Regulation.

Management Process : The Sub-Fund's sustainable investment is focused primarily on investing in securities that contribute to an environmental objective. The investment process identifies the best opportunities both in terms of financial prospects as well as their ESG, in particular environmental, characteristics. The Sub-Fund integrates Sustainability Factors in its investment process as outlined in more detail in section "Sustainable Investment" of the Prospectus. The Sub-Fund allocates investment to securities having environment, social or governance characteristics diversified across ten ESG sectors/themes (sustainable mobility, agriculture/forestry, healthy living, IT-efficiency, water, clean technology, pollution prevention, alternative energy, energy efficiency, ESG commitment) with each investment falling into one of these sectors/themes. This diversification offers investors an exposure across a range E, S, and G characteristics. Further, the Sub-Fund seeks to achieve an ESG score of its portfolio greater than that of the Benchmark. When analysing ESG score against the Benchmark, the Sub-Fund is compared with the ESG score of its Benchmark after 20% of the lowest ESG rated securities have been excluded from the Benchmark.

Risk Indicator (Source : Fund Admin)

Lower Risk

Higher Risk

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you. Additional risks: Market liquidity risk could amplify the variation of product performances. This product does not include any protection from future market performance so you could lose some or all of your investment. Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the Amundi Funds prospectus.

SRI Terminology

Socially Responsible Investment (SRI)

The SRI expresses sustainable development objectives in investment decisions by adding Environmental, Social and Governance (ESG) criteria in addition to the traditional financial criteria.

SRI thus aims to balance economic performance and social and environmental impact by financing companies and public entities which contribute to sustainable development whatever their business sector. By influencing the governance and behaviour of stakeholders, SRI promotes a responsible economy.

AVERAGE ESG RATING (source : Amundi)

Environmental, social and governance rating

ESG criteria

The criteria are extra-financial criteria used to assess the Environmental, Social and Governance practices of companies, states or local authorities:

"E" for Environment (energy and gas consumption levels, water and waste management, etc.).

"S" for Social/Society (respect for human rights, health and safety in the workplace, etc.).

"G" for Governance (independence of board of directors, respect for shareholders' rights, etc.)

SRI according to Amundi

Rating scale from A (best score) to G (worst score)

An SRI portfolio follows these rules :

- 1 - Exclusion of E, F and G scores¹
- 2 - Overall portfolio rating of C or above
- 3 - Overall portfolio rating above the benchmark index/investment universe rating
- 4 - ESG rating for 90% minimum of portfolio stock²

Sustainability Level (source : Morningstar)

The sustainability level is a rating produced by Morningstar that aims to independently measure the level of responsibility of a fund based on the values in the portfolio. The rating ranges from very low (1 Globe) to very high (5 Globes).

Source Morningstar ©

Sustainability Score - based on corporate ESG risk analysis provided by Sustainalytics used in the calculation of Morningstar's sustainability score.

¹ If an issuer's rating is downgraded to E, F or G, the manager has a period of three months in which to sell the security. A tolerance is authorized for buy and hold funds.

² Outstanding securities in terms of ESG criteria excluding cash assets.

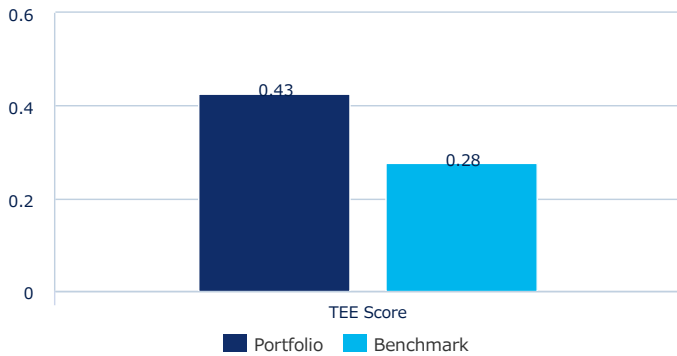

³ The investment universe is defined by the fund's reference indicator. If the fund does not have an indicator, it is defined by type of security, geographic zone and investment themes and business sectors.

EQUITY ■

Focus on Environmental, Social and Governance key performance indicators

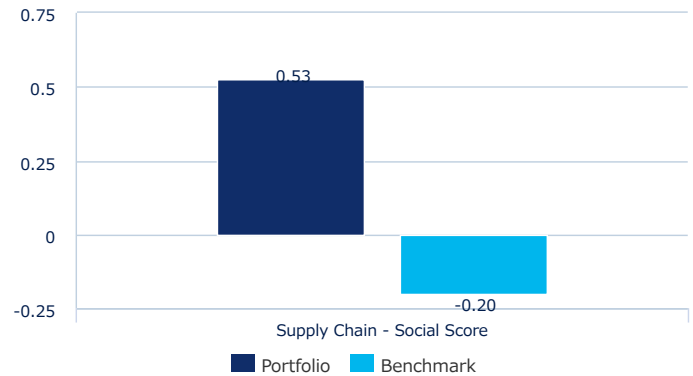

In addition to the overall ESG assessment of the portfolio and the E, S and G dimensions, the manager uses impact indicators to assess the ESG quality of his portfolio. Four representative indicators of Environment, Social, Human Rights and Governance have been identified. The manager's minimum objective is to deliver a quality score higher than that of the index on at least two of the indicators.

For these 4 indicators, the total for the portfolio/investment universe is equal to the companies' average for these indicators adjusted for their weight in the portfolio/investment universe.

Environment - Energy and Ecology Transition Score¹

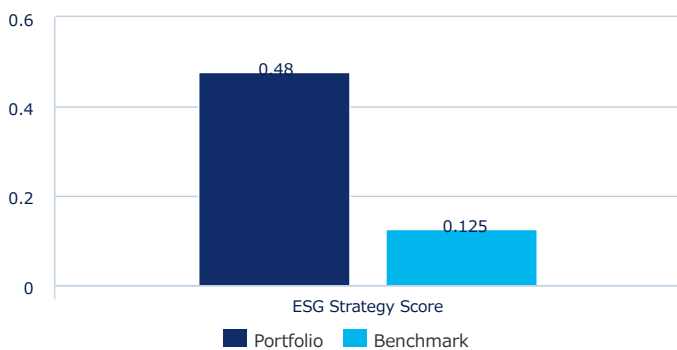

This rating evaluates the exposure of an issuer to transition risks and its ability to manage such risks. It is built on generic and sector-specific criteria extracted from Amundi's proprietary ESG methodology. Energy and Ecology Transition Score is aggregated from 2 ratings (source Amundi): - (1206) Emissions and Energy Use - (1207) Renewable Energy

Coverage rate Portfolio/Benchmark) : 99.32% 99.21%

Social - Supply chain & Customers²

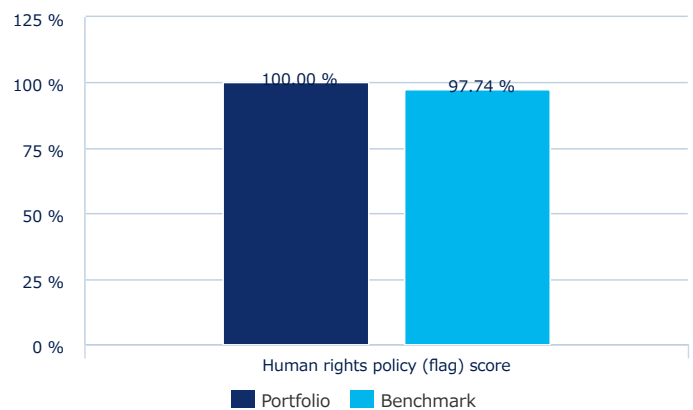

Take into consideration the interests of the company's stakeholders, i.e. customers and suppliers. Behave responsibly to suppliers, adopting a selection process that considers ESG issues.

Coverage rate 99.32% 96.94%

Governance - ESG Strategy³

Integrate environmental, social and governance factors into the company's strategy and the operating procedures of its management bodies. Ensure that its business is transparent and traceable by publishing an annual sustainable development report, ESG performance.

Coverage rate 99.32% 96.83%

Human Rights Compliance - Human Rights Policy⁴

Coverage rate (Portfolio/Index) 99.32% 99.62%
