INVESTMENT MANAGER

ARX Investimentos Ltda: Specialists in Brazilian multistrategy, equity long short, equity long only and fixed income investment strategies. The firm's philosophy is based on delivering quality risk-adjusted returns with an emphasis on capital preservation. The investment process combines fundamental bottom-up analysis with a detailed macro top-down overview whilst applying rigid risk controls with a preference for liquidity.

PERFORMANCE BENCHMARK

The Fund will measure its performance against MSCI Brazil 10/40 NR Index (the "Benchmark").
The Fund is actively managed, which means the Investment Manager has absolute discretion to invest outside the Benchmark subject to the investment objective and policies disclosed in the Prospectus. However, as the Benchmark covers a significant proportion of the investable universe, the majority of the Fund's holdings will be constituents of the Benchmark but the weightings in the portfolio are not influenced by those of the Benchmark. The investment strategy does not restrict the extent to which the Investment Manager may deviate from the Benchmark.

KEY RISKS ASSOCIATED WITH THIS FUND

- There is no guarantee that the Fund will achieve its objectives.
- This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.
- Where the Fund invests significantly in a single market, this may have a material impact on the value of the Fund.
- Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.
- Emerging Markets have additional risks due to less-developed market practices.
- Investments in the securities of small to medium-sized companies (by market capitalisation) may be riskier and less liquid (i.e. harder to sell) than large companies. This means that their share prices may have greater fluctuations.
- If this share class is denominated in a different currency from the base currency of the Fund. Changes in the exchange rate between the share class currency and the base currency may affect the value of your investment.
- For hedged share classes the hedging strategy is used to reduce the impact of exchange rate movements between the share class currency and the base currency. It may not completely achieve this due to factors such as interest rate differentials.
- The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.
- A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".
