Reason why the Sub-Fund is classified in this risk category

The following risks may not be fully captured by the risk indicator and may be materially relevant for this Sub-Fund:

Counterparty risk: The risk that an entity with which the fund does business becomes unwilling or unable to honour its obligations to the fund.

Liquidity risk: The risk that one or more of the funds investments could become hard to value, or to sell at a desired time and price.

Derivatives risk: The risk that certain derivatives could behave unexpectedly or could expose the fund to losses that are significantly greater than the cost of the derivative.

Further investment risks are set out in the risk section of the prospectus.
