Fact Sheet

MFS Meridian® Funds

Japan Equity Fund

Investment in the fund may involve a high degree of risk and may not be suitable for all investors. Past performance does not predict future returns and your capital is at risk. The value of the fund can be volatile and could decrease substantially in a short period of time. Investors should consider the risks, including lower returns, related to currency movements between their investing currency and the portfolio's base currency, if different. Investors should not rely on this document alone to make investment decisions and the sales prospectus and Key Information Documents (KIDs) should be carefully considered before making any investment in the fund. **The fund specific risks include: stock risk and geographic risk. These relevant risks, as associated with this fund, are highlighted and defined at the end of this document.**

Past performance is not a reliable indicator for future results. All financial investments involve an element of risk. The value of investments may rise and fall so you may get back less than originally invested.

Investors should consider the risks, including lower returns, related to currency movements between their investing currency and the portfolio's base currency, if different.

Other share classes are available for which performance and expenses will differ.

Returns would have been lower had sales charges, of up to 6% of the net asset value (NAV), or any commissions, fees or other charges that your financial intermediary may charge been reflected.

Please note that this is an actively managed product.

The Fund's benchmark is indicated for performance comparison only.

Performance results reflect ongoing charges and any applicable expense subsidies and waivers in effect during the periods shown. All historic results assume distributions within the fund and/or the share class are reinvested.

The source for all fund data is MFS. Source for benchmark performance: SPAR, FactSet Research Systems Inc.

Fund Inception Date: 01 August 2007

^ Results represent the percent change in NAV.

Periods less than one year are actual not annualized.

† Ongoing charges are expressed at an annual rate as a percentage of net assets and are based on expenses for the semi-annual period ending July 31 or annual period ending January 31. For a Class with less than the full period of data available, or where an adjustment is necessary to reflect current charges, the ongoing charges figure is an estimate. Ongoing charges may vary from year to year. Please see the KID of the relevant Class for the most recent expense information.

Class I shares are only available to certain qualifying institutional investors.

TRAILING 3-YEAR RISK MEASURES VS. BENCHMARK (A1USD)

Beta	0.98
Standard Deviation	16.11 vs. 15.62

Beta is a measure of the volatility of a portfolio relative to the overall market. A beta less than 1.0 indicates lower risk than the market; a beta greater than 1.0 indicates higher risk than the market. It is most reliable as a risk measure when the return fluctuations of the portfolio are highly correlated with the return fluctuations of the index chosen to represent the market.

Standard Deviation is an indicator of the portfolio's total return volatility, which is based on a minimum of 36 monthly returns. The larger the portfolio's standard deviation, the greater the portfolio's volatility.

RISK INDICATOR - CLASS A1USD

◄ Lower Risk (typically lower rewards) — Higher Risk ► (typically higher rewards)

1	2	3	**4**	5	6	7

The rating is based on past volatility of returns and may be different in the future or for other classes of the fund.

Important Data Methodologies

Portfolio characteristics are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. The portfolio is actively managed, and current holdings may be different.

Important risk considerations

The fund may not achieve its objective and/or you could lose money on your investment in the fund. ■ **Stock:** Stock markets and investments in individual stocks are volatile and can decline significantly in response to or investor perception of, issuer, market, economic, industry, political, regulatory, geopolitical, environmental, public health, and other conditions. ■ **Geographic:** Because the portfolio may invest a substantial amount of its assets in issuers located in a single country or in a limited number of countries, it may be more volatile than a portfolio that is more geographically diversified. ■ Please see the prospectus for further information on these and other risk considerations.
