

# Allianz Enhanced Short Term Euro - I13 - EUR

Fund for ultra short-term EUR bonds enhanced by fixed-income and FX investments and SRI-approach

## Investment Objective

The fund aims at generating an above average return with regard to the euro money market. The fund promotes investments that take into consideration environmental, social and corporate governance criteria. To generate additional income the fund can take on exposure to bonds and foreign currencies or corresponding derivatives, even if it does not hold any assets denominated in the currencies concerned.

## Fund Manager

Lars Dahlhoff  
(since 12/01/2012)

## Performance

### Over 10 Years <sup>1</sup>

### Annual Performance (%) <sup>1</sup>

	Fund	Benchmark <sup>2</sup>
02/29/2012 - 02/28/2013	1.09	0.18
02/28/2013 - 02/28/2014	0.33	0.11
02/28/2014 - 02/28/2015	0.35	0.06
02/28/2015 - 02/29/2016	-0.06	-0.14
02/29/2016 - 02/28/2017	-0.16	-0.34
02/28/2017 - 02/28/2018	-0.08	-0.36
02/28/2018 - 02/28/2019	-0.34	-0.37
02/28/2019 - 02/29/2020	-0.28	-0.41
02/29/2020 - 02/28/2021	-0.14	-0.47
02/28/2021 - 02/28/2022	-0.79	-0.53

## Fee Structure

All-in fee in % p.a. <sup>7</sup>	0.23 + performance-related <sup>8</sup>
TER (%) <sup>9</sup>	0.24
Additional performance fee (%)	0.00

## Key Figures

Effective Duration (%)	0.62
Average nominal return (%)	0.92
Yield to worst (%) <sup>10</sup>	0.04
Average rating	A

## Opportunities

- + Potential excess return over money market
- + Relatively high degree of price stability
- + Focus on sustainable investments
- + Share classes in foreign currencies available
- + Possible extra returns through single security analysis and active management

## Risks

- Money market rates vary
- Short-term price declines cannot be ruled out
- Performance of share classes in foreign currencies may be weaker for euro investors
- Sustainability approach narrows the investment universe
- Success of single security analysis and active management not guaranteed

## FOR FUND DISTRIBUTORS AND PROFESSIONAL INVESTORS ONLY

- 1) Calculated at the net asset value, excl. front-end load, distributions reinvested. Calculation according to method as defined by BVI, the German Fund Companies Association. **Any front-end loads reduce the capital employed and the performance.**
- 2) Benchmark history: until 30/09/2021 EONIA (in EUR), until 30/11/2018 EURO OVERNIGHT INDEX AVERAGE (EONIA)
- 3) SFDR: EU Sustainable Finance Disclosure Regulation. Information accurate at time of publishing.
- 4) The Sharpe ratio states the relationship between the return generated by the fund and the investment risk. The fund's excess return versus the risk-free market rate is compared to volatility. Negative values are not meaningful.
- 5) Volatility measures the fluctuation range of the fund's performance over a specified period of time.
- 6) This is for guidance only and not indicative of future allocation.
- 7) The all-in fee includes the expenses previously called management, administration and distribution fees. Any payment of a trail fee by the management company to a distribution partner will be effected from the all-in fee.
- 8) Fee linked to the performance of the unit class (Outperformance Fee): up to 20% p.a. of any returns the unit class achieves above the benchmark, the EONIA. Please refer to the current prospectus for details on the calculation.
- 9) TER generally: Total cost (except transaction costs) charged to the fund during the last financial year. TER for funds-of-funds: The costs incurred by the fund itself (except transaction costs). Since the fund held other investment units ("target funds") in the reporting period, further costs, charges and fees may have been incurred at the level of the target fund.
- 10) Represents the lowest potential yield that an investor could theoretically receive on the bond up to maturity if bought at the current price (excluding the default case of the issuer). The yield to worst is determined by making worst-case scenario assumptions, calculating the returns that would be received if worst-case scenario provisions, including prepayment, call or sinking fund, are used by the issuer (excluding the default case). It is assumed that the bonds are held until maturity and interest income is reinvested on the same conditions. Calculation is before currency hedging. The yield to worst is a portfolio characteristic; in particular, it does not reflect the actual fund income. The expenses charged to the fund are not taken into account. As a result, the yield to worst is not suitable as an indicator of the future performance of a bond fund. Forecasts are not a reliable indicator of future results.

## Disclaimer

Investing involves risk. The value of an investment and the income from it may fall as well as rise and investors might not get back the full amount invested. Investing in fixed income instruments may expose investors to various risks, including but not limited to creditworthiness, interest rate, liquidity and restricted flexibility risks. Changes to the economic environment and market conditions may affect these risks, resulting in an adverse effect to the value of the investment. During periods of rising nominal interest rates, the values of fixed income instruments (including positions with respect to short-term fixed income instruments) are generally expected to decline. Conversely, during periods of declining interest rates, the values of these instruments are generally expected to rise. Liquidity risk may possibly delay or prevent account withdrawals or redemptions. Allianz Enhanced Short Term Euro is a sub-fund of Allianz Global Investors Fund SICAV, an open-ended investment company with variable share capital organised under the laws of Luxembourg. Past performance does not predict future returns. If the currency in which the past performance is displayed differs from the currency of the country in which the investor resides, then the investor should be aware that due to the exchange rate fluctuations the performance shown may be higher or lower if converted into the investor's local currency.
