### Objective and investment policy

The Fund aims to provide capital growth over the long term.

Performance target: To outperform the MSCI Zhong Hua 10/40 Index by 2.5% per annum, before the deduction of charges, over any 5 year period.

The Fund invests at least 80% of its assets in a concentrated portfolio of shares (equities) of companies, of any size, in any industry, in China or Hong Kong. Companies will have their registered office in or do most of their business (directly or through subsidiaries) in this region. The Fund may invest up to 50% of its assets in China A Shares.

The Fund is actively managed with reference to the MSCI Zhong Hua 10/40 Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the Fund's performance target. The investment manager has discretion to choose investments for the Fund with weightings different to the index or not in the index, but at times the Fund may hold investments similar to the index.

### Additional information

As of 7 December 2020 Lin Shi also manages this fund. From 1 July 2020, the fund name changed from Janus Henderson Horizon China Fund to Janus Henderson Horizon China Opportunities Fund, the Fund's investment policy, reference benchmark and performance target changed.

This is a Luxembourg SICAV Fund, regulated by the Commission de Surveillance du Secteur Financier (CSSF).

Note that any differences among portfolio securities currencies, share class currencies, and your home currency will expose you to currency risk. To obtain our prospectus and any additional information please visit our website on: [www.janus Henderson.com](http://www.janus Henderson.com).

## What are the risks specific to this fund?

- The Fund may invest in China A shares via a Stock Connect programme. This may introduce additional risks including operational, regulatory, liquidity and settlement risks.
- The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.
- Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.
- Emerging markets expose the Fund to higher volatility and greater risk of loss than developed markets; they are susceptible to adverse political and economic events, and may be less well regulated with less robust custody and settlement procedures.
- If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.
- This Fund may have a particularly concentrated portfolio relative to its investment universe or other funds in its sector. An adverse event impacting even a small number of holdings could create significant volatility or losses for the Fund.
- The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.
- If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share class of a different currency to the Fund (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates.
- Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.
- The Fund may incur a higher level of transaction costs as a result of investing in less actively traded or less developed markets compared to a fund that invests in more active/developed markets. These transaction costs are in addition to the Fund's Ongoing Charges.

## General risks

- Past performance is not a guide to future performance.
- The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested.
- Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change.

## Important information

**The investments underlying this financial product (referred to as the Fund) do not take into account the EU criteria for environmentally sustainable economic activities. While the analysis of ESG factors is an integral component across the Investment Manager's investment capabilities, the Investment Manager does not maximise portfolio alignment with sustainability risks as a separate goal in its own right nor does it precisely attribute the impact of ESG factors on returns for the Fund. The Investment Manager does not consider the adverse impacts of investment decisions on sustainability factors as set out under SFDR with respect to the Fund because it is not classified under either Article 9 or Article 8 of Regulation (EU) 2019/2088.** The exchanges table illustrates the financial exchanges where shares are purchased for the Fund. Shares in Chinese companies are often traded on exchanges outside of China even though they may relate to Chinese based companies. Many Chinese companies are listed on the Hong Kong exchange as this is the primary source of foreign capital. An A-share is a domestic Chinese share class. A B-share is a domestic share class that is traded in a currency other than the Chinese currency, such as the Hong Kong Dollar or US Dollar. An ADR is a stock listed in US stock markets to facilitate trading in shares of non-US companies. All ongoing charges stated are as per latest published report and accounts. \* Yields are shown net except for bond funds which are shown gross. The Historical Yield reflects distributions declared over the past 12 months as a percentage of the midmarket share price, at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions. Please note: due to rounding the figures in the holdings breakdowns may not add up to 100%.
