INVESTMENT OBJECTIVE AND POLICY

The objective of the Fund is to preserve the invested capital and maximize the total investment return through an exposure to convertible bonds or other financial derivative instruments and equity related securities. The global net position of the Sub-fund will create a net long bias on average over time. The Fund mainly invests in convertible bonds, exchangeable bonds, mandatory convertible bonds and options and securities denominated in Euro. It may also invest on an ancillary basis in other bonds having an underlying exposure to equities, in participating shares and warrants and in short term money market instruments. Investments in equities or following the conversion will be less than 10% of the net asset. The Fund may also invest into "Rule 144A" and/or Regulation S securities, which in accordance with US Law are not registered with the US Securities and Exchange Commission (SEC). The Fund may use standardized credit default swaps ("CDS") and the total obligation may not exceed 25% of the net asset. The Fund may use financial instruments and derivatives for hedging for efficient portfolio management and for investment purposes.

KEY FEATURES

- Enhanced portfolio diversification to optimise asset allocation.
- Exposure to a multi-component underlying asset class. Convertible bonds parameters (Equity, Credit, Interest Rates, Volatility and Prospectus clauses) give us the possibility to exploit arbitrage opportunities.

Past performance is not a guide to future performance and may be misleading. The performances are shown net of fees and expenses over the relevant period. All performance figures reflect the reinvestment of dividends and do not take into account the commissions and costs incurred on the issue and redemption of shares/parts. Please see the important information at the end of this document. Investing in the fund/sub-fund involves risks including the possible loss of capital. Please read the KIIDs and the prospectus to find out about these risks. Legal information concerning the fund/sub-fund are available on the website: www.generali-investment.com

FUND MANAGER'S COMMENTS

In February, the world has been shocked by Russia's invasion of Ukraine. Markets have reacted violently to the incursion: the ruble and Russian equities plummeted on news of the aggression, and risk premia and energy prices soared on fears of new supply disruption threatening both the energy complex and the global recovery.

As the Ukraine crisis turned to the worse, equity market had another negative month. The MSCI World was down by 2.5%, the S&P500 by 3% and the Euro Stoxx 50 by 5.9%. Currently, earnings and margins remain safe, but risks are tilted to the downside given the chance to see lower GDP growth ahead, triggered by even higher energy prices and inflation hurting sentiment.

In the fixed income asset class, 10-year Bund yields have risen by 15 bps and 10-year US yields by 6 bps. The upward movement in yields has been more pronounced in peripherals countries. The Italian spread increased by 25 bps and the Spanish one by 26 bps. Both the European Investment Grade (IG) credit spread and the High Yield (HY) one widened by 41 and 78 bps, respectively.

EMEA convertibles posted negative returns, as a reference, the Exane Eurozone Index performed -2.91%. The sell-off was wide-spread with very few bonds/sectors immune. There were no primary issues.

Portfolio activity

Cash from maturities was reinvested in defensive and short term bonds. In general, fund's turnover was limited.

Outlook

Higher energy and commodity prices will keep inflation high in the next months challenging central banks' search of a smooth exit. We see no rush to buy the dips, waiting for more stability in the geopolitical and energy complexes.

We will plan to focus on balanced profiles, as delta/optionality will mitigate duration risk. On the other hand, long dated and low delta bonds are the most fragile if the increase in core rates persists.

Convertible bonds offer asymmetric exposure to equities with the benefit of enhanced downside protection.
