

Pictet - Short-Term Money Market JPY - P

Investment overview

OBJECTIVE

To preserve the value of your investment, while achieving a return in line with money market rates.

REFERENCE INDEX

FTSE JPY 1-Month Eurodeposit (JPY), an index that does not take into account environmental, social and governance (ESG) factors. Used for performance measurement.

PORTFOLIO ASSETS

The Compartment mainly invests in short-term money market instruments that are issued by highly rated issuers and are either denominated in Japanese yen (JPY) or systematically hedged to this currency (meaning investments have little or no exposure to currency risk).

INVESTMENT PROCESS

In actively managing the Compartment, the investment manager uses a combination of market and issuer analysis to identify those securities that offer the best performance in

light of interest rate trends. The Compartment's management approach uses strict risk controls. The investment manager considers ESG factors a core element of its strategy by adopting a tilted approach which seeks to increase the weight of securities with low sustainability risks and/or to decrease the weight of securities with high sustainability risks, subject to good governance practices. Activities that adversely affect society or the environment are also avoided. Voting rights are methodically exercised and there may be engagement with companies to positively influence ESG practices. For further information, please refer to our exclusion framework in the Responsible Investment policy*, SFDR product category Article 8. The portfolio composition is not constrained relative to the benchmark, so the similarity of the Compartment's performance to that of the benchmark may vary.

Risk considerations

The Share Class is assigned to this risk category because of the price variations resulting from its currency and the nature of the Compartment's investments and strategy. The risk category shown is based on historical data and may not be a reliable indication for the future risk profile of the Share Class. It is not a target or a guarantee and may change over time. The lowest category does not mean a risk-free investment. The Compartment offers no capital guarantee or asset protection measures. The Compartment may be exposed to the

following risks which are not adequately captured by the synthetic risk indicator and may negatively impact its value:

- **Operational risk:** losses resulting from human errors, system failures, incorrect valuation and safekeeping of assets.
- **Counterparty risk:** losses occur when a counterparty does not honour its obligations related to contracts such as over-the-counter derivatives.

- **Financial Derivatives risk:** the leverage resulting from derivatives amplifies losses in certain market conditions.
- **Credit risk:** sudden losses may occur when issuers of debt securities default on their payment obligations.
- **Sustainability risk:** ESG related risk events or conditions could cause a material negative impact on the value of the investment if they were to occur.

Further information can be found in the prospectus.

In addition, potential account keeping costs (by your custodian) may reduce the performance. Indices do not include fees or operating expenses and you cannot invest in them.
