Objective and investment policy

The Fund aims to provide capital growth over the long term.

Performance target: To outperform the MSCI ACWI Technology Index by at least 2% per annum, before the deduction of charges, over any 5 year period.

The Fund invests at least 80% of its assets in a concentrated portfolio of shares (also known as equities) of companies, of any size, which are technology-related or derive profits from technology, in any country.

The Fund is actively managed with reference to the MSCI ACWI Technology Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the Fund's performance target. The investment manager has discretion to choose individual investments for the Fund with weightings different to the index or not in the index, but at times the Fund may hold investments similar to the index.

Additional information

From 30 June 2020 Garth C. Yettick no longer manages this fund. Denny Fish is now the sole fund manager. From 6 July 2020, the fund name changed from Janus Henderson Global Technology Fund to Janus Henderson Global Technology and Innovation Fund.

No Morningstar rating is shown if the fund is less than three years old or rating is below 3 stars. A short-term trading fee may be applied upon exiting the fund as per the prospectus. Note that any differences among portfolio securities currencies, share class currencies, and your home currency will expose you to currency risk. This is an Irish Investment Company regulated by the Central Bank of Ireland.

What are the risks specific to this fund?

- When the Fund, or a hedged share/unit class, seeks to mitigate exchange rate movements of a currency relative to the base currency, the hedging strategy itself may create a positive or negative impact to the value of the Fund due to differences in short-term interest rates between the currencies.
- The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.
- Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.
- Shares of small and mid-size companies can be more volatile than shares of larger companies, and at times it may be difficult to value or to sell shares at desired times and prices, increasing the risk of losses.
- If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.
- The Fund is focused towards particular industries or investment themes and may be heavily impacted by factors such as changes in government regulation, increased price competition, technological advancements and other adverse events.
- This Fund may have a particularly concentrated portfolio relative to its investment universe or other funds in its sector. An adverse event impacting even a small number of holdings could create significant volatility or losses for the Fund.
- The Fund may use derivatives towards the aim of achieving its investment objective. This can result in 'leverage', which can magnify an investment outcome and gains or losses to the Fund may be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.
- If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share class of a different currency to the Fund (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates.
- Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

General risks

- Past performance is not a guide to future performance.
- The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested.
- Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change.

Important information

The investments underlying this financial product (referred to as the Fund) do not take into account the EU criteria for environmentally sustainable economic activities. While the analysis of ESG factors is an integral component across the Investment Manager's investment capabilities, the Investment Manager does not maximise portfolio alignment with sustainability risks as a separate goal in its own right nor does it precisely attribute the impact of ESG factors on returns for the Fund. Source: Janus Henderson Investors. For hedged share classes the appropriate index is the hedged version of the mandated benchmark. Only share class returns are displayed as we do not currently subscribe to this index. Please note: due to rounding the figures in the holdings breakdowns may not add up to 100%. For Qualified investors, institutional, wholesale client use only.
