|---|---|---|---|---|
| **174.3M€** | **1,732.55€** | **29 Jul 2008** | **FR0010565457** | **DORCONI FP EQUITY** |

**Fund managers:** Louis Bert • Stéphane Furet

**Country of registration**

## MANAGEMENT PHILOSOPHY

Dorval Convictions is a flexible fund, and equity exposure can vary from 0% to 100%.

The fund aims to take advantage of equity market momentum while seeking to limit capital losses during market downturns. The management aim is to outperform the benchmark, consisting of 50% €STR capitalized and 50% Euro Stoxx 50 NR (EUR) net dividends reinvested, over the recommended 3-year investment timeframe, by taking an active approach to asset allocation between fixed-income products and European Union equities.

The investment process involves four steps: determining the equity exposure rate to French and European stocks, identifying investment themes, determining the equity allocation per capitalisation and selecting individual companies. The remainder of the portfolio is invested in money market and fixed-income products in order to preserve capital and reduce the portfolio's overall volatility. The Fund does not seek to replicate this reference indicator and can therefore significantly diverge from it.

## FUND MANAGER'S COMMENT

Over the course of the month, the market continued to make gains by welcoming signs of global economic resilience, indicative of a soft landing in terms of economic activity. Moreover, inflation gradually levelled off, having overcome the bottlenecks linked to the economy reopening following the Covid crisis and as a result of the restrictive policies adopted by central banks. Nevertheless, the initial victories in the battle to control inflation are, by definition, the easiest to secure. Whether the monetary authorities accept the final inflation rate remains to be seen. However, at least for now, initial results from companies continue to support the upward trend of the market. A portion of our profits has been generated tactically, by reducing our exposure rate from over 80% to approximately 66%.

### SYNTHETIC RISK INDICATOR

Lowest risk — Highest risk

The Synthetic Risk Indicator (SRI) is an overall indicator of the risk of the product resulting from the combination of two risks: market risk and credit risk. It is on a scale of 1 (lowest risk but does not mean that there is no risk) to 7 (highest risk).

Label ISR

References to rankings, labels, awards or ratings are not an indicator of the future performance of the fund or the investment manager.

## FUND RISKS

Equity investments may undergo major share price fluctuations. Fixed-income investments are particularly exposed to changes in interest rates, and the fund can lose value in the event of interest rate hikes. The fund is exposed to certain specific risks, i.e. risk related to discretionary portfolio management, **risk of capital loss**, equity risk, risk related to market capitalization size, market risk, exchange rate risk, interest rate risk, credit risk, risk related to investment on the emerging markets, risk associated with the use of derivatives, sustainability risk. Capital invested is not guaranteed. You may recover less than you invested. Please refer to the fund's full prospectus for a full description of risks.

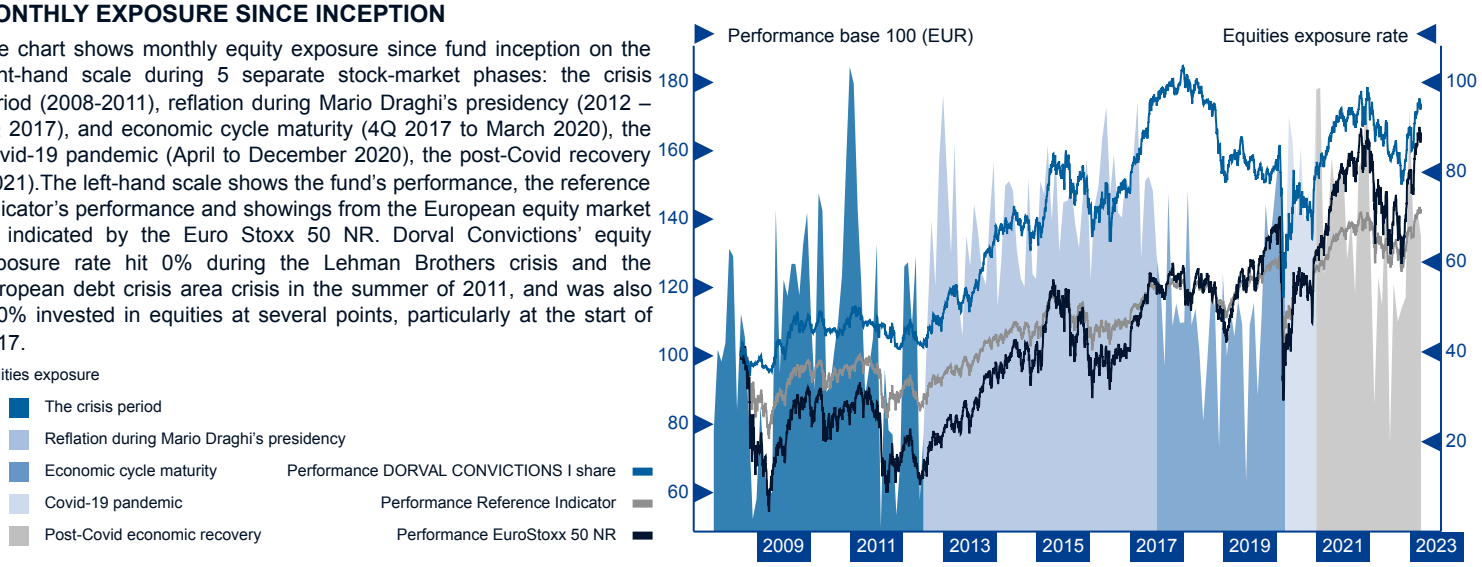

## NET PERFORMANCE SINCE INCEPTION (%)

Monthly report as at **28 February 2023**

Past performance is not a reliable indicator of future performance. Performance calculation takes into account net dividends re-invested for the fund and net dividends re-invested for the reference indicator since 1st January 2013. Since 12/31/2021, the reference indicator consists of 50% €STR capitalized and 50% Euro Stoxx 50 NR (EUR).

### MONTHLY EXPOSURE SINCE INCEPTION

The chart shows monthly equity exposure since fund inception on the right-hand scale during 5 separate stock-market phases: the crisis period (2008-2011), reflation during Mario Draghi's presidency (2012 – 3Q 2017), and economic cycle maturity (4Q 2017 to March 2020), the Covid-19 pandemic (April to December 2020), the post-Covid recovery (2021).The left-hand scale shows the fund's performance, the reference indicator's performance and showings from the European equity market as indicated by the Euro Stoxx 50 NR. Dorval Convictions' equity exposure rate hit 0% during the Lehman Brothers crisis and the European debt crisis area crisis in the summer of 2011, and was also 100% invested in equities at several points, particularly at the start of 2017.

**MORNINGSTAR METHODOLOGY** © 2022 Morningstar, Inc. All rights reserved. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. References to rankings, awards and/or ratings are not an indicator of future performance by the fund or the fund manager. The Morningstar rating applies to funds with a history of at least three years. It takes into account subscription fees, the risk-free return and the fund's volatility in order to calculate the MRAR (Morningstar Risk Adjust Return) ratio each month for each fund. The funds are then ranked by decreasing order of MRAR: the first 10% receive 5 stars, the next 22.5% 4 stars, the next 35% 3 stars, the next 22.5% 2 stars, and the last 10% receive 1 star. The funds are ranked within 180 European categories.

## ESG PERFORMANCE REPORT

Monthly report as at **28 February 2023**

### SRI APPROACH AND METHODOLOGY

Dorval Asset Management takes a long-term investment approach, and we firmly believe that we have a pivotal role to play in directing investment to build a more responsible and sustainable economy. We engage with real economy stakeholders to encourage them to adapt their environmental, social and governance practices to support this transition, acting as a responsible investor as we pledge to meet the highest standards with both our clients and partners, as well as with the companies we invest in.

Dorval Asset Management's approach since 2004 has consistently been built on shareholder dialogue, drawing on a practical and collaborative approach in our role as shareholder – further reinforced by our voting policy – as well as in our regular meetings with companies. This governance approach is resolutely grounded in the Manageurs range's philosophy, which includes the original Dorval Manageurs fund.

However, we also look beyond this aspect and include all Environmental, Social and Governance considerations in our extra-financial analysis for securities in our initial investment universe and our assessment of managers.

For more information on our methodologies, please refer to our Dorval AM website: https://www.dorval-am.com/en_FR/our-esg-approach

### ESG STRATEGIES

| Integration | Best in universe | Engagement | Exclusion |

| % difference | +13% | +18% | +28% | +3% | +0% |

Coverage: Calculated as a percentage of assets excluding cash investments

### PROPRIETARY RATING METHODOLOGY

Our proprietary ESG methodology draws on input from our partner MSCI as well as in-house research information to develop issuer ratings across each fund's investment universe.

Our approach is based on the following principles:

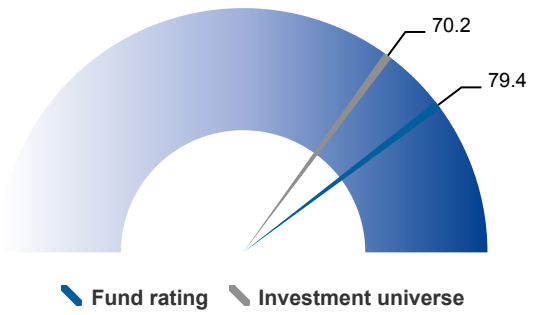

* We assess ESG challenges and allocate an in-house weighting after screening for sector-specific, geographical and market cap considerations;

* We assign an ESG rating for each issuer based on its exposure to the challenges set out, and the way they are managed by the company.

Our portfolio management teams and our financial and extra-financial analysts screen for 37 ESG challenges based on a range of qualitative and quantitative indicators, with a particular focus on 12 of these aspects.

The extra-financial score - from 0 to 100, with 100 being the top score - is based on each of the E, S and G dimensions. We exclude 20% of the investment universe comprising companies with the lowest scores and with an eliminatory score on at least one of the dimensions. Issuers with an environmental or social rating of less than 10 or a governance score of under 30 are excluded. Any issuer with an overall extra-financial rating of less than 40 is also excluded.

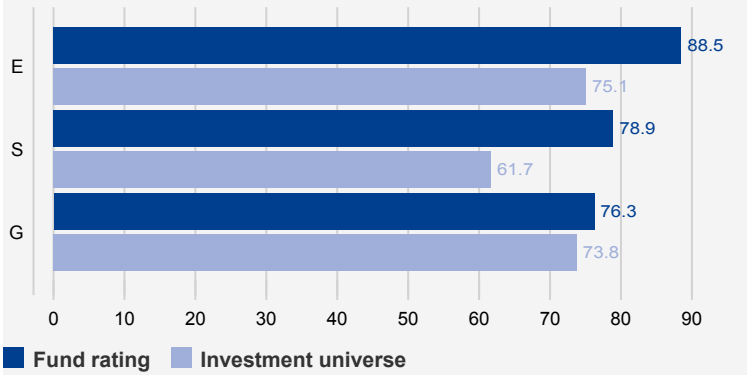

Our methodology draws partly on primary data from an external provider. Our approach places governance at the very center of our ESG analysis and can therefore minimize certain environmental or social risks and opportunities.

### RATING FOR FUNDS' FIVE LARGEST HOLDINGS

| | ESG | E | S | G | Weight |
|---|---|---|---|---|---|
| ASML HOLDING | 90.6 | 97.8 | 100.0 | 82.7 | 5.9% |

Coverage: Calculated as a percentage of total weighting for companies

## PORTFOLIO'S CONTRIBUTION TO SUSTAINABLE DEVELOPMENT GOALS

The Sustainable Development Goals (SDG) offer a blueprint to achieve a better and more sustainable future for all. They address the global challenges we face, including poverty, inequality, climate change, environmental degradation, prosperity, peace and justice.

The SDGs are interconnected and it is crucial to achieve both all these goals and their targets out to 2030 to ensure that no-one is left behind.

### FIVE MAIN CONTRIBUTIONS TO SDGs (AS % OF FUND)

| 79.4% | 44.3% | 39.3% | 38.9% | 36.6% |
|---|---|---|---|---|

The total for the SDGs may exceed 100%, as all stocks can contribute to one or several goals. Our calculations draw on MSCI data and are based on companies' alignment with the 17 SDGs, weighted for the proportion each company represents in our fund.

## DEFINITIONS

Monthly report as at **28 February 2023**

**Active position**: Position taken by the fund manager based on his/her conviction on the stock, creating both exposure and risk.
**Active share**: Active share measures the difference in breakdown of an equity portfolio as compared to its benchmark. We calculate: the sum of the absolute values of differences in weighting between the fund and the reference indicator, divided by two.
**Alpha**: Coefficient used to measure a fund's additional positive or negative performance as compared to levels its market risk – as measured by its reference indicator – would justify. We calculate: Alpha = Fund average (MoyenneFonds) - (Reference indicator average (MoyenneIndice) * Beta).
**Beta**: Measure of a fund's sensitivity to market movements (represented by its reference indicator). A beta higher than 1 indicates that the fund amplifies the trends of its reference market on the upside as well as on the downside. Conversely, a beta lower than 1 means that the fund tends to react less to movements in its reference market. We calculate: Beta = Fund-reference indicator covariance (CovarianceFondsIndice) / Reference indicator variance (VarianceIndice);
• Fund-reference indicator covariance (CovarianceFondsIndice): covariance for weekly fund and reference indicator performances
• Reference indicator variance (VarianceIndice): variance in the reference indicator's weekly performances
• Fund average (MoyenneFonds), Reference indicator average (MoyenneIndice): average of weekly performances for fund and reference indicator.
**Crisis period**: The subprime crisis (2007/08) followed by the European debt crisis (2011/12) meant great caution was required.
**Cycle maturity**: After years of economic recovery and stock-market rerating, upside decreases and the risk of disappointment increases.
**Draghi's reflation policy**: Mario Draghi's statement in July 2012 put an end to the European debt crisis and marked the start of massive long-term monetary stimulus.
**DNR**: Net dividends reinvested
**The €STR** (European Short Term Rate) is a new money market benchmark, calculated and published by its administrator, the European Central Bank (ECB), which has been gradually replacing another short-term rate, the EONIA, since 2 October 2019. The €STR is the market benchmark interbank interest rate in the eurozone. It is calculated every day using data collected from several European banks. Further information on the benchmark index is available on its administrator's website: www.ecb.europa.eu.
**Euro Stoxx 50 basket**: Companies in the Euro Stoxx 50 index, which is made up of the 50 largest companies in the euro area.
**Flexible fund**: Financial product for which the allocation between asset classes varies over time in order to adapt to new market configurations.
**Gain frequency**: Ratio of the number of positive observations to the total number of observations since fund inception.
**Gross equity investment rate**: The gross equity investment rate is the percentage of assets invested in equities as a proportion of the fund's total assets.
**Gross exposure**: Fund's direct ownership of shares or bonds issued by a listed (or unlisted) company or sovereign bonds.
**Information ratio**: The information ratio measures the fund's relative performance adjusted for each point of volatility compared to its reference indicator. We calculate: Information ratio (RatioInfo) = Average difference (MoyenneDiff) / Average standard deviation (StdDevDiff);
• Average difference (MoyenneDiff): The average of the performance differences between the fund and the reference indicator
• Average standard deviation (MoyenneStdDev): The standard deviation of performance differences between the fund and the reference indicator
**Maximum performance**: Maximum gain historically recorded by the fund.
**Maximum drawdown**: Maximum loss historically recorded by the fund.
**Net equity exposure rate**: The net equity exposure rate is the percentage of assets invested in equities, adjusted for derivatives strategies as a proportion of the fund's total assets.
**Recovery period**: Time expressed in number of days the fund takes to exceed the highest net asset value over the indicated period.
**Risks**: Risk data are calculated over a given timeframe based on weekly performances.
**Sharpe ratio**: Indicator of a fund's outperformance relative to a risk-free rate, divided by the risk taken (fund volatility). The Sharpe ratio measures the marginal performance per unit of risk. The higher the ratio, the higher the fund's risk-adjusted yield. We calculate: Information ratio (RatioInfo) = (Annualised fund performance (PerfsFondsAnnualise) - Risk-free rate (TauxSansRisque)) / (Fund standard deviation (FondsStdDev) * Sqrt (52));
• Annualised fund performance (PerfFondsAnnualise): the fund's annualised performance over the investment period
• Risk-free rate (TauxSansRisque): the annualised €STER performance over the investment period
• Fund standard deviation (FondsStdDev): the fund's performance standard deviation.
**Volatility**: Amplitude in the variation of a financial instrument over a given time period. High volatility means that the share price varies significantly and therefore that the risk associated with the share is high.

### DEFINITIONS OF SRI STRATEGIES (ESG REPORTING)

**Best-in-Universe**: The best-in-universe approach focuses on companies carrying the highest non-financial scores, independently of their business sector. Sectors that are broadly deemed to be most virtuous will be more heavily represented, so this approach can lead to sector bias, which we fully recognize.
**Engagement**: Our engagement strategy comprises both individual shareholder engagement – exercising our voting rights, conducting direct and constructive dialogue with companies as part of a relationship established over the long term – and collaborative shareholder engagement via various influential financial market bodies: these policies are rolled out to encourage companies and/or policymakers to take on board non-financial criteria.
**Exclusion**: Our exclusion strategy covers both sector exclusion – ruling out sectors deemed to be harmful to society – and exclusion based on compliance with standards, whereby we exclude companies that do not comply with the United Nations Global Compact and companies subject to controversies that we feel are incompatible with our values.
**Integration**: Environmental, social and governance criteria (ESG) are directly integrated or embedded in the fund management process via an ESG score developed for each stock in the investment universe. The ESG score is used both to ascertain the eligible investment universe and as a building block for the portfolio construction and management process.
**SRI Label**: Created by the French Ministry of Finance, this public label aims at giving Sustainable Responsible Investment (SRI) management an extra visibility with savers. To obtain the SRI Label, the certification body conducts an audit to ensure the funds meet a set of labelling criteria. For further information on the methodology, visit www.lelabelisr.fr. References to rankings, labels, awards or ratings are not an indicator of the future performance of the fund or the investment manager.

### OUTPERFORMANCE FEE

The Management Company ensures that over a performance period of 5 years maximum, any underperformance of the UCITS compared to the benchmark index is compensated before performance fees become due.

## LEGAL NOTICES - DISCLAIMER AND PRODUCT RISKS

The tax treatment for the shares or fund units held, acquired or sold depends on the status or the tax treatment of each investor, and may change. Please contact your financial advisor if you have any questions. Your financial advisor is responsible for ensuring that the offer and the sale of the shares in the fund comply with the governing national laws. **The fund may not be offered or sold in the USA, to citizens or residents of the USA, or in any other country or jurisdiction where it would be unlawful to offer or sell the fund.**

This material has been provided for information purposes only to investment service providers or other Professional Clients, Qualified or Institutional Investors and, when required by local regulation, only at their written request. This material must not be used with Retail Investors. It is the responsibility of each investment service provider to ensure that the offering or sale of fund shares or third party investment services to its clients complies with the relevant national law.

The investment processes and themes as well as the portfolio characteristics and interests are valid on the specified date and may be modified. References to a ranking, rating or award are not a guarantee of future performance and fluctuate over time. This document is not a prospectus and does not constitute an offer of shares. The information contained in this document may be updated occasionally and may differ from the information in the earlier or future versions of this document.

For more detailed information about this fund, as well as the charges, expenditure and risks, please contact your financial advisor to obtain, free of charge, a full prospectus, a Key Investor Information Document, a copy of the articles of association, half-yearly and annual reports and/or other documents and translations required in your jurisdiction. To find a financial advisory in your jurisdiction, please contact ClientServicingAM@natixis.com

If the fund is registered in your jurisdiction, these documents may also be obtained free of charge from the Natixis Investment Managers International offices (www.im.natixis.com) and the payer agents/ representatives mentioned here below. **Please read the prospectus and Key Investor Information carefully before investing.**

To obtain a summary of investor rights in the official language of your jurisdiction, please consult the legal documentation section of the website (im.natixis.com/intl/intl-fund-documents)
