Institutional "U.S. Dollar Hedged" Shares of Vanguard Global Bond Index Fund (the "Fund"), a subfund of Vanguard Investment Series Plc (ISIN: IE00B18GCB14)

The Fund is managed by Vanguard Group (Ireland) Limited ("VGIL"), part of the Vanguard group of companies.

Objectives and investment policy

Objective

The Fund seeks to provide returns consistent with the performance of the Barclays Global Aggregate Float Adjusted Bond Index (the "Index").

Investment policy

- The Index includes investment-grade and government bonds from around the world with maturities greater than one year, that pass screening for size and liquidity. Liquidity means the extent to which a bond may be bought and sold without significantly distorting its price. The Fund will normally maintain a weighted average maturity of between 5 and 10 years.
- The Fund attempts to:
 - Sample the Index, meaning that it holds a range of bonds that, in aggregate, approximate the full Index in terms of key risk factors and other characteristics.
 - Remain at least 90% invested in bonds held in the Index. The Fund may hold small amounts of cash and other securities except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy.
- The Fund may invest in financial derivative instruments that could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value. Some derivatives give rise to increased potential for loss where the Fund's counterparty defaults in meeting its payment obligations.

- The Fund invests in securities which are denominated in multiple currencies. The share class is hedged to reduce the risk of movement between the value of the currencies of the underlying securities and USD.
- The Fund may not be appropriate for investors who plan to withdraw their money within 5 years.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- Shares in the Fund can be sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus) by submitting an application in writing or by telephone before 12:00 (Irish time) on the relevant dealing day, or, where you hold shares with a platform, by submitting an application seeking the sale of your shares before the dealing cut-off time of the respective platform, provided this is before the dealing cut-off time for the Fund. A full list of the days on which Shares in the Fund cannot be sold is available on <https://global.vanguard.com/content/documents/-calendar.pdf>.

Risk and reward profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed to remain unchanged and may shift over time.
- This indicator does not measure the risk that you may lose the amount you have invested.
- The lowest category does not mean "risk free".
- The Fund is rated 3 as it invests in global bonds and is in a middle category as the values of those investments have experienced a moderate rate of change in the past.

The indicator opposite does not take account of the following risks of investing in the Fund:

- No investment guarantee risk. The value of investments may fall as well as rise, and you may not get back the money you invested.
- Bond risk. The Fund invests in bonds which may provide higher yields but as such may carry greater credit risk increasing the risk of default on repayment and erosion of the capital value of your investment. The level of income may fluctuate and movements in interest rates are likely to affect the capital value of bonds.
- Index sampling risk. As the Fund uses an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the Fund may not, in the aggregate, approximate the full Index.
- Index tracking risk. The Fund is not expected to track or replicate the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.

For further information on risks please see the "Risk Factors" section of the Prospectus on our website at <https://global.vanguard.com>.
