KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

You are investing in a sub-fund of Schroder International Selection Fund (the “Company”). The Company is an umbrella structured open-ended investment company with limited liability in Luxembourg, organised as a “société anonyme” and qualifies as a Société d’Investissement à Capital Variable (“SICAV”) under Part I of the law on undertakings for collective investment dated 17 December 2010.

The Fund aims to provide capital growth primarily through investment in a portfolio of convertible securities and other similar transferable securities, such as convertible preference securities, exchangeable bonds or exchangeable medium term notes, issued by corporate issuers in Asia excluding Japan. The Fund may also, to a limited extent, seek exposure to fixed and floating rate securities, equity securities and equity linked notes.

Hedged Classes aim to provide you with the performance returns of the Fund’s investments in the Fund’s base currency by reducing the effects of exchange rate fluctuations between the relevant Class currency and the Fund’s base currency.

Refer to the “Important Information” section and Para 1 and 4 on page 7 and 33-99 of the Prospectus for further information on features of the product.

¹ The Prospectus is available for collection from Schroder Investment Management (Singapore) Ltd or any of its approved distributors during usual office hours.

Investment Strategy

At least two-thirds of the Fund (excluding cash) will be invested in convertible bonds issued by companies in Asia excluding Japan.

Refer to Para 4 on page 33-99 of the Prospectus for further information on the investment strategy of the Fund.

The Fund provides investors with diversified exposure to the exciting Asian growth story. Convertible bonds are simply corporate bonds that can be converted into shares at a given price. As such, investors can gain exposure to Asian (ex Japan) equity markets, but with the defensive benefits and less volatile characteristics of a bond investment. The Fund aims to maximise these opportunities by rigorously evaluating the range of economic, regional, equity and corporate bond market considerations.

The Fund may also invest in other financial instruments and hold cash on deposit. **Financial derivative instruments may be used to achieve the investment objective and to reduce risk or manage the Fund more efficiently.**

HOW CAN YOU EXIT FROM THIS INVESTMENT AND WHAT ARE THE RISKS AND COSTS IN DOING SO?

You may redeem Shares by completing a share redemption form ("Redemption Request") and submitting it to the relevant distributor through whom you originally purchased the Shares.

The directors of the Company reserve the right not to accept instructions to redeem (or switch) of more than 10% of the total value of the Shares in issue of the Fund on a Dealing Day. In these circumstances, the redemption of part or all Shares in excess of 10% will be deferred until the next Dealing Day.

The redemption proceeds are usually paid to you within 6 Business Days following the receipt of the Redemption Request by the Management Company or its administrative agent provided that the directors of the Company reserve the right to extend the period of payment of the redemption proceeds to such period, not exceeding 30 Business Days.

Your exit price is determined as follows:

- If you submit the Redemption Request by 5 pm Singapore time on a Singapore Business Day and such Redemption Request is accepted by the Management Company or its administrative agent by 1 pm Luxembourg time of the relevant Dealing Day, you will be paid a price based on the net asset value per Share on that Dealing Day.
- If you submit the Redemption Request after 5 pm Singapore time on a Singapore Business Day and such Redemption Request is accepted by the Management Company or its administrative agent by 1 pm Luxembourg time of the next relevant Dealing Day, you will be paid a price based on the net asset value per Share on the next relevant Dealing Day.

The redemption proceeds that you will receive will be the exit price multiplied by the number of Shares redeemed. An example is as follows:
