This Product Highlights Sheet ("PHS") is an important document.

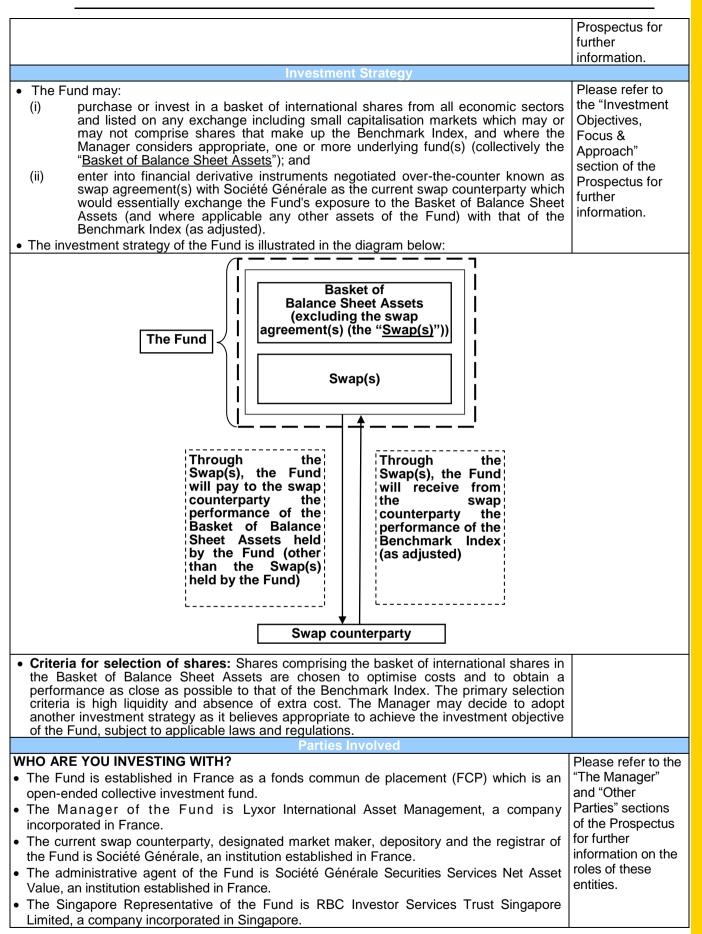

- It highlights the key terms and risks of this investment product and complements the prospectus of the Fund dated [●] 2013 (the "Prospectus")¹.
- It is important to read the Prospectus before deciding whether to purchase units in the Fund. If you do not have a copy, please contact us to ask for one.
- You should not invest in the Fund if you do not understand it or are not comfortable with the accompanying risks.
- If you wish to purchase the units in the Fund, you will need to make an application in the manner set out in the Prospectus. Units of the Fund can also be purchased or traded on the SGX-ST as set out in the Prospectus.

KEY RISKS	
WHAT ARE THE KEY RISKS OF THIS INVESTMENT?	Please refer to
The value of the Units and the price of the Units (and its dividends, if any) may rise or fall. These risk factors may cause you to lose some or all of your investment:	the "Risks" section of the Prospectus for
	further
Market and Gradit Disks	information.
Market and Credit Risks	
 Market prices for the Units may be different from their NAV Units are transacted on the SGX-ST on a willing-buyer-willing-seller basis at market prices throughout the trading day. The price of any Units traded on the SGX-ST will depend, amongst other things, on market supply and demand, movements in the value of the Benchmark Index, prevailing financial market, corporate, economic and political conditions. As market prices of Units may sometimes trade above or below the NAV of the Fund, there is a risk that Holders may not be able to buy or sell at a price close to the NAV. You are exposed to risk linked to the country in which the Fund invests or is exposed to 	
 Investment of the Fund in Japan or its exposure to this market mean that the NAV of the Fund and its trading prices will be affected by may amonto or downturns in this market. 	
Fund and its trading prices will be affected by movements or downturns in this market. Liquidity Risks	
 Units can be redeemed at NAV only through Participating Dealers Investors who wish to redeem their Units at NAV must approach a Participating Dealer to apply to the Manager to redeem the Units on their behalf. If they approach a broker or dealer who is not a Participating Dealer, that broker or dealer will have to place redemption orders through a Participating Dealer. In such a case there may be additional charges to such investor. Redemptions in-kind are subject to a minimum amount The minimum amount for redemption in-kind is the USD equivalent to EUR 100,000 (in whole number of Units). The secondary market may be illiquid You can sell your Units on the SGX-ST. However, you may not be able to find a buyer 	
 on the SGX-ST when you wish to sell your Units. While the Fund intends to appoint at least one market maker to assist in creating liquidity for investors, liquidity is not guaranteed and trading of Units on the SGX-ST may be suspended in various situations. If the Units are delisted from the SGX-ST or if the CDP is no longer able to act as the depository for the Units listed on the SGX-ST, the Units in the investors' securities accounts with the CDP or held by the CDP may be repurchased (compulsorily or otherwise) by the designated Market Maker or otherwise at a price calculated by reference to the NAV of the Fund calculated as of a certain number of day(s) following the last trading day of the Fund on the SGX-ST (or such other day as may be determined by the Manager in consultation with the SGX-ST and/or the CDP). 	
Product-Specific Risks	
 You are exposed to counterparty risk related to the swap agreement(s) entered into by the Fund and risks relating to swap agreement(s) The Fund currently enters into swap agreement(s) with a swap counterparty. There is a risk that the swap counterparty may default on its obligations under the swap agreement(s) which may cause the Fund to incur significant losses. However the Fund is subject to a maximum single counterparty risk exposure of 10% of its NAV under the UCITS directive. 	
 If the swap counterparty defaults on its obligations, the NAV of the Fund may be adversely affected by fluctuations in the Basket of Balance Sheet Assets (which may not comprise shares that make up the Benchmark Index) during the period where an alternative swap counterparty is being sought for the Fund. There is also a possibility that the swap transactions may be terminated under certain circumstances. You are exposed to foreign exchange risk and currency risk Currency risk related to the Fund and Benchmark Index: The NAV of the Fund could 	
decrease while the value of the Benchmark Index increases due to exchange rate fluctuations in the Japanese yen (being the currency of the Benchmark Index) and the USD (being the currency in which the NAV of the Units is denominated and the SGX-ST	

 listing currency of the Units). If your functional currency is in SGD, you will be exposed to further foreign exchange risks on your investment in the Fund. The Fund, Manager, Depository and the current swap counterparty are not constituted in Singapore and are governed by foreign laws. Certain investments by the Fund such as the swap(s) are also governed by foreign laws As a FCP in France registered as a UCITS IV scheme, the Fund is subject to the applicable laws and regulations in France and the relevant UCITS directives. The Manager, Depository and the current swap counterparty are established in France and governed by French laws. Any winding up of the investments of the Fund including the swap agreement(s) which are governed by foreign laws may involve delays and legal uncertainties for Singapore investors. You are exposed to risks associated with indirect costs of the swap(s) Under the swap(s) entered into between the Fund and the swap counterparty, the Fund shall receive the performance of the Benchmark Index adjusted by indirect costs (such as (a) market value adjustments comprising the hedging activities of the swap counterparty and other costs and/or incidental gain; and (b) tax provisions arising from the hedging activities of the swap counterparty). Such adjustments may affect the ability of the Fund to achieve its investment objective. You are exposed to risks associated with custodians The Fund to achieve its investment objective.
