Management Report

Dear Sir/Madam,
Dear Investors,

2009 was another active year for ETFlab. We added 22 new ETFs to our portfolio during the financial year.

These include six "iBoxx € Liquid Sovereign Diversified" ETFs on European government bonds with various maturity ranges and five bond ETFs and one money-market ETF, all of which invest in Federal Republic of Germany government bonds.
In addition, with ETFlab iBoxx € Liquid Germany Covered Diversified, we provide access to the segment of the largest and most liquid German mortgage bonds, allowing investors to achieve a yield differential over German government bonds. With the first swap-based ETF from our Company, the ETFlab DJ EURO STOXX 50 Short, investors can participate inversely in the movements of the Dow Jones EURO STOXX 50 and profit from falling markets.
Our strategy, whenever possible, of complete replication using the original securities of the index remains in place, of course, as it corresponds with our philosophy.

Whatever method is used, our aim is to avoid unnecessary risk when structuring investment products, to guarantee a precise replication of the index and keep administrative costs as low as possible for investors.
This is the principle we will continue to use to develop funds for our investors.

This Annual Report contains detailed information on the performance of our index funds.
Thank you for your confidence in us. We hope that you will continue to include ETFlab ETFs in your financial planning.
