MORNINGSTAR OVERALL RATING™†

Among 73 Convertible Bond - Global Funds

The fund's risk-adjusted returns based on Class Z GBP Accumulating shares had 5 stars for 3 years and 5 stars for 5 years out of 73 and 61 Convertible Bond - Global Funds, respectively, for the period ended 30/4/21.

OVERVIEW

The fund invests in global convertible securities with the aim of balancing risk/reward while providing growth and income.

KEY FEATURES

- » Provides broadly diversified exposure to the global convertible bond universe.
- » Leverages more than 40 years of research in convertible security investing.
- » Seeks to provide upside participation in equity markets with less exposure to downside than an equity-only portfolio over a full market cycle
- » Blends global investment themes and fundamental research via active management

PORTFOLIO FIT

Consisting of convertible securities that can participate in upside equity movements with potentially limited downside exposure, the fund can provide a means to manage risk in conjunction with an equity allocation. The fund can also serve a role within a fixed-income allocation, as convertibles have performed well during periods of rising interest rates and inflation.

Calamos Active Management and Global Perspective Seek to Maximize the Potential Benefits of Convertibles

Defensive Equity. For more than 40 years, Calamos has advocated convertible securities for investors seeking upside participation in equity markets with less downside exposure than an equity-only portfolio over a full market cycle.

Enhanced Fixed Income. Convertibles can diversify fixed income and hedge the risk of rising rates.

Global Diversification. Because the opportunity sets differ across economies, global convertibles can provide improved prospects for alpha generation, downside protection and income.

Important Information. Portfolios are managed according to their respective strategies which may differ significantly in terms of security holdings, industry weightings, and asset allocation from those of the benchmark(s). Portfolio performance, characteristics and volatility may differ from the benchmark(s) shown. Average annual total return measures net investment income and capital gain or loss from portfolio investments as an annualised average. All performance shown assumes reinvestment of dividends and capital gains distributions. The Fund also offers Class C and X shares, the performance of which may vary. Performance shown reflects the management fee.

Returns greater than 12 months are annualised. All performance shown assumes reinvestment of dividends and capital gains distributions. Sources for performance data: Calamos Advisors LLC, RBC Investor Services Ireland Limited ("RBC") and Mellon Analytical Solutions, LLC.

Morningstar Ratings™ are based on risk-adjusted returns for Class Z shares and will differ for other share classes. Morningstar Ratings are based on a risk-adjusted return measure that accounts for variation in a fund's monthly historical performance (reflecting sales charges), placing more emphasis on downward variations and rewarding consistent performance. Within each asset class, the top 10%, the next 22.5%, 35%, 22.5%, and the bottom 10% receive 5, 4, 3, 2, or 1 star, respectively. The Refinitiv Global Convertible Bond Index is designed to broadly represent the global convertible bond market. The MSCI World Index is a market capitalisation weighted index representative of the market structure of developed market countries in North America, Europe, and the Asia/Pacific region. **Morningstar Convertible Bond – Global** funds invest principally in convertible securities of issuers from around the world. Unmanaged index returns assume reinvestment of any and all distributions and, unlike fund returns, do not reflect fees, expenses or sales charges. Investors cannot invest directly in an index.

Alpha is the measurement of performance on a risk adjusted basis. A positive alpha shows that performance of a portfolio was higher than expected given the risk. A negative alpha shows that the performance was less than expected given the risk. **Beta** is a historic measure of a fund's relative volatility, which is one of the measures of risk; a beta of
