Objectives and investment policy

This actively managed sub-fund aims to achieve the highest possible capital growth. It is categorized as Article 8 SFDR.

- The sub-fund mainly invests in equities and equity-like securities. The sub-fund may also hold cash.
- The sub-fund invests in a portfolio of stocks in companies around the world with high profit growth and high profitability.
- The sub-fund may use derivatives for hedging purposes.
- The currency of this class is continually hedged against the sub-fund's main currency. This hedging does not necessarily cover all currency risks. It entails costs which in turn reduce the share class' return.
- The sub-fund is not managed with reference to a benchmark. The portfolio manager has full investment discretion within the predefined investment limits.
- Any income generated will be reinvested and included in the value of your shares.
- Buying and selling securities entails transaction costs payable in addition to the charges listed.
- Redemption of shares: daily when banks in Luxembourg are open for normal business (see prospectus for details and exceptions).
- Other information: environmental, social and governance (ESG) criteria contribute to, but are not a determining factor in, the manager's decision making.

- Even the lowest risk category is not entirely free of risk.

When assigning a sub-fund's share class to a risk category, it may be the case that not all risks are taken into account. Such risks include risks in connection with exceptional market events, operational errors, legal and political events. You can find a detailed list of the risks in the "Notice regarding special risks" section in the general part of the sales prospectus. The following risks have no direct influence on this category, but may still be important:

- A company's stock price may be adversely affected by changes in the company, its industry or economic environment and prices can change quickly. Equities typically involve higher risks than bonds and money market instruments.
