Investment / Performance Objectives & policy

This Sub-Fund's net assets are invested mainly in high and medium quality ("investment grade") debt and debt-related instruments issued by public authorities from any country and denominated in Euro, as well as term deposits with credit institutions.
On an ancillary basis, the Sub-Fund's net assets may be invested in any other instruments, such as but not limited to UCITS (up to 10%) of any kind and cash.
The Sub-Fund may use derivatives financial instruments aiming at hedging risks, ensuring efficient portfolio management and/or investing according to the Investment Policy. The use of derivatives financial instruments for investment purposes may amplify the up and down fluctuations of the Sub-Fund's Net Asset Value per Unit.
For more information read the Prospectus or Key Information Document (KID).

Reference period: YTD (year to date) from 01/01/2024 to the date of this reporting. The returns calculations do not take into account taxes applicable to an average professional client in his or her country of residence. When the currency presented differs from yours, there is a currency risk that may result in a decrease in value.

Risk and Reward Profile

The risk indicator assumes you keep the product for 4 years.
The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.
We have classified this product as 3 out of 7, which is a medium-low risk class.
This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you.

For any further details on investment risks, please refer in particular to the Risks section of the Fund's Prospectus.

Data as of 03/31/2024

Sustainability characteristics

ESG score

The ESG score considers environmental, social and governance factors based on data on the individual issuer provided by MSCI ESG, which are then aggregated according to the underlying securities in the portfolio. The same methodology is also applied to the product benchmark.

SFDR Category

Article 8

The fund is qualified pursuant to Article 8 of Regulation (EU) 2019/2088; see the Sustainability Report for more details.

Percentage of issuers involved in controversial sectors

0.00% **0.00%**
Portfolio Benchmark

Percentage of critical issuers

0.00% **0.00%**
Portfolio Benchmark

Values other than zero may be due to (i) discontinued issuers, in the best interest of participants and in accordance with current legislation, (ii) issuers for which an engagement activity is in progress or (iii) indirect exposures.

Source: Internal processing of data provided by MSCI ESG Research
 Survey period: 12-month rolling average

Appendix

Percentage of issuers involved in controversial sectors

Issuers operating in sectors deemed controversial (not "socially responsible"), to which restrictions or exclusions apply with respect to the entirety of the individual assets under management, are companies (i) that have a clear direct involvement in the manufacture of unconventional weapons; (ii) at least 25% of whose turnover is generated from thermal coal mining or power generation activities; (iii) at least 10% of whose turnover is generated from the exploitation of oil sands.

More specifically, unconventional weapons are understood as: anti-personnel mines; cluster bombs; nuclear weapons*; impoverished uranium; biological weapons; chemical weapons; stealth cluster bombs; blinding lasers; incendiary weapons; white phosphorus.

These provisions do not apply to the activities permitted by the following treaties and/or conventions:

- The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines; the Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster bombs;
- The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons;
- The Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons;
- Regulation (EU) 2018/1542 concerning restrictive measures against the proliferation and use of chemical weapons;

These exclusions are also intended to comply with the requirements established by Law no. 220 of 9 December 2021 on measures to counter the financing of companies producing antipersonnel mines, cluster bombs and submunitions.

*With regard to exclusions on nuclear weapons, issuers based in states that have adhered to the "Nuclear Non-Proliferation Treaty" stipulated on 1 July 1968 are not considered.

Percentage of critical issuers

"Critical" issuers are those companies having a higher exposure to environmental, social and corporate governance risks, i.e. which have a lower ESG sustainability rating level (equal to "CCC" assigned by the specialized info-provider) in the equity and bond investment category and for which an escalation process has been activated, or is being assessed, which determines restrictions and/or exclusions with respect to the entirety of the individual assets under management ("ESG Binding screening").

Percentage of issuers selected on the basis of positive and negative criteria

The weighting of issuers that comply with the specific positive and negative selection criteria identified by the Product, i.e. (i) issuers of green/sustainable bonds and (ii) companies publicly engaged in the energy transition process, particularly through the progressive reduction in Scope 1 and Scope 2 emissions to reach climate neutrality by 2050 ("Net Zero" goal).

Percentage of assets in government issuers meeting the screening criteria

The weight of government issuers that meet the selection criteria defined on the basis of the indicators of the "Sustainable Development Report" and Regulation (EU) 2019/2088 to monitor the principal adverse impacts relating to government issuers.

Percentage of assets in ESG or sustainable investment type UCIs

This is understood as assets of UCITS that promote environmental and/or social characteristics pursuant to Article 8 of Regulation 2019/2088 or which pursue sustainable investment objectives pursuant to Article 9 of said Regulation.

Carbon footprint

The value represents tonnes of carbon dioxide (direct - Scope 1 and indirect - Scope 2) of the investee companies in relation to their turnover.

Sustainable investment

Weighting (i) of issuers with net positive alignment with at least 1 of the United Nations' 17 Sustainable Development Goals (SDG) and no misalignment with any of the SDGs and (ii) of green, social and sustainability bonds.

Data as of 03/31/2024

Investment Manager Commentary

Market Development

In March, economic data from the developed world continued to show solid growth, while consumer price inflation, despite still being on a downward path, continued to surprise to the upside. For their part, Central Banks have signalled confidence that the disinflation process may resume later this year, despite relatively solid economic growth. Investors have therefore revised their expectations for interest rate cuts in the near future, although the money market is still pricing in cuts starting in the first half of the year. Global government bond yields fell back somewhat, while riskier bond asset classes and the spread between Italian and German bonds narrowed further.

Performance and Investment Choices

The Fund dynamically managed duration exposure during the period and ended the month around 1.5 years above the benchmark. The overweight was maintained, mainly in German and Italian government bonds, with a preference for the middle of the European curve. It continued to favour an allocation towards “green” Investment Grade corporate bonds over semi-core European government bonds as a means of diversifying and improving the risk/return ratio and the ESG score. The Fund continued to show a relative preference for French and Italian government bonds. Positions in Belgium, Portugal and the Netherlands remained underweight relative to the benchmark, while the underweight in Spanish government bonds was reduced. Over the period, the Fund repositioned itself into green investment grade corporate bonds. The Fund maintained a short position on the Japanese 10-year bond via derivatives. In terms of currencies, the Fund continues to hold a marginally long position in the US dollar and Japanese yen as part of its hedging and diversification strategy. The Fund turned in a positive performance in March in absolute terms and outperformed its benchmark. Long duration exposure made a positive contributed. Marginally positive contributions also came from exposure to the curve, corporate bonds and currency exposure.

Outlook and Investment Strategy

In the coming months, the market will remain largely focused on future monetary policy moves and the auction cycle typical of the early part of the year. Rising interest rates in Europe continue to weigh on economic growth, particularly in the real estate and manufacturing sectors, leading to a decline in aggregate demand. In addition, the credit conditions offered by the banking system to households and companies, although improving, are still restrictive. All this will have an impact on economic growth, much of which is already happening. The Fund will continue to capitalise on and monitor market conditions, actively intervening to adjust the mix of investments.

IMPORTANT INFORMATION

Source of information and data related to the Unit of the Sub-Fund: Eurizon Capital SGR S.p.A, Società di gestione del risparmio, a public limited company (società per azioni) incorporated in Italy under number 15010 and having its registered office Via Melchiorre Gioia, 22 - 20124 Milan and authorized to act as investment manager under the supervision of CONSOB.

Morningstar Rating based on the Unit of this document. For more details about the methodology, please refer to the Glossary as well as the following link: https://www.morningstar.com/content/dam/marketing/shared/research/methodology/771945_Morningstar_Rating_for_Funds_Methodology.pdf. Morningstar The Morningstar rating is a quantitative assessment of past performance that takes into account risk and costs imputed. It does not take into account qualitative elements and is calculated on the basis of a (mathematical) formula. The classes are categorized and compared with similar UCITS classes, based on their score and they receive one to five stars. In each category, the top 10% receive 5 stars, the next 22.5% 4 stars, the next 35% 3 stars, the next 22.5% 2 stars, and the last 10% receive 1 star. The rating is calculated monthly on the basis of historical performance over 3, 5 and 10 years and does not take into account the future.
