INVESTMENT OBJECTIVE

Santander Latin American Corporate Bond invests mainly in USD LatAm corporate debt across the rating spectrum. A bottom-up investment process screens for companies with improving credit metrics, while avoiding issuers that are vulnerable to default and impairments. Local and global teams of Analysts and Portfolio Managers offer close proximity to companies and a global view on trends that shape the corporate landscape. Up to 100% may be invested below investment grade bonds. Derivatives can be used for risk management or investment purposes.

MONTHLY STRATEGY

The fund performance in May was positive in both relative and absolute terms, largely due to the strong recovery in Argentinian credit where the fund maintains an OW position. The country's electric sector provided the majority of the positive contribution with Capex, Genneia and Pampa Energia the top three performers in the month. Elsewhere, there were relative gains made by not holding Digicel which once again sold off amidst ongoing financing and operational concerns while there was a relative loss in Mexico due to an UW in the long end
