(Key Investor Information Document, KIID)

Credit Suisse Money Market Fund - EUR B (LI0037729428)

A sub-fund of Credit Suisse Funds SICAV
Management company: VP Fund Solutions (Liechtenstein) AG

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read this document so that you can make an informed decision about whether to invest.

Objectives and investment policy

- The objective is to achieve long-term asset growth.
- The compartment is actively managed.
- The sub-fund's assets are invested in accordance with the principle of diversification in securities and other investments. The sub-fund is a money market fund within the meaning of Regulation (EU) 2017/1131 on money market funds. The sub-fund's investment objective is to generate an adequate return in the respective reference currency while giving due consideration to the preservation of capital as well as the liquidity of the sub-fund's assets. The sub-fund invests at least two-thirds of its assets in debt securities and rights (bonds, fixed-income securities, debentures, notes and others) denominated in the reference currency and money market instruments issued by private and public borrowers worldwide as well as futures and time deposits held at banks in Liechtenstein, another EEA member state, Switzerland or United Kingdom (including Guernsey and Jersey) as well as units of other domestic or foreign UCITS that invest their assets in accordance with the investment policy of the respective sub-fund. The sub-fund may invest a maximum of 9.9 % of its assets in

other money market funds. This sub-fund promotes environmental or social characteristics and qualifies as a Fixed Income sub-fund applying Exclusions, ESG Integration and Active Ownership while ensuring that the portfolio companies follow good governance practices. For this sub-fund, the identification of the material ESG Factors is based on sector and geographical exposure.

The "FTSE 3-Month Euro Eurodeposit LCL" index is the reference benchmark to this sub-fund. It is not an ESG index and not used for the purpose of attaining the material ESG Factors.

- The compartment may use derivatives to reduce the effects of market fluctuations on fund assets.
- The compartment is compared to 'FTSE 3-Month Euro Eurodeposit LCL' as a benchmark. Investment selection and weighting depends on this.
- Units may be subscribed for and redeemed daily under the conditions set out in the fund documents.
- Net income and realised capital gains are reinvested.
- VNAV MMF, Standard MMF

Risk and return profile

This risk indicator is designed to illustrate the fund's risk/return profile. The higher the rating on the scale, the greater the earnings potential, but also the more significant the risk of suffering a loss. This risk indicator is based on historical data and therefore cannot predict future performance. The rating may change in future and does not represent a guarantee. A category 1 rating also does not represent a completely risk-free investment. The unit class is rated as category 1, because the unit class price has demonstrated low levels of variation in the past.

The following risk categories may be of significant importance and are not adequately encompassed in the risk indicator:

Liquidity risks: Where a significant level of investment is made in financial instruments, which by their nature are sufficiently liquid, but which under certain circumstances can have a relatively low level of liquidity, this may have an impact on the level of liquidity of the sub-fund as a whole.

Default risk: The fund transacts business with several counterparties. If a counterparty becomes insolvent, the fund's outstanding debts may not be paid or may only be partially paid.

Operational risks and risks relating to the custody of assets: The fund may fall victim to fraud and/or other criminal activities. It may incur losses due to external events, insufficient internal processes, system failures or human error on the part of the management company, depositary/sub-depositary or external third parties.

Derivative risks: The fund may use derivatives. These are instruments whose value is based on an underlying instrument. Minor changes in the value of the underlying instrument can lead to major fluctuations in the value of the derivative, meaning that the use of derivatives may entail additional risks.

Credit risks: The sub-fund invests directly or indirectly in bonds / convertible bonds. If the issuer of a bond / convertible bond does not pay interest on time or does not repay the nominal amount, the bond / convertible bond may suffer a significant or total loss of value. A downgrading of the issuer's credit rating may also cause the bond / convertible bond to suffer a significant or total loss of value.

Charges

Fund fees and other charges finance ongoing fund administration, the custody of fund assets and the distribution of fund units. Charges due reduce your earnings potential.

One-off charges payable before and after you invest	
Subscription commission	max. 1.50 %
