

Edmond de Rothschild Goldsphere (EdR Goldsphere)

A unit – ISIN: FR0010657890

Management company: Edmond de Rothschild Asset Management (France), part of the Edmond de Rothschild Group

UCITS subject to French law

Objectives and investment policy

Management objective: The UCITS' objective, over a recommended investment period of more than 5 years, is to outperform the benchmark index, the FTSE Gold Mines, net dividends reinvested, by selecting stocks, on a discretionary basis, predominantly in the gold sector and linked to the exploration, extraction, transformation and/or marketing of gold.

The Fund is actively managed, which means that the manager shall make investment decisions with the aim of achieving the Fund's objective and investment policy. This active management includes taking decisions related to asset selection, regional allocation, sectoral views and overall market exposure. The manager is under no circumstances limited by the components of the benchmark index when positioning the portfolio and the Fund may hold all the components of the benchmark or none at all. The Sub-fund may diverge wholly or significantly from the benchmark index or, occasionally, very little.

Benchmark index: FTSE Gold Mines, net dividends reinvested

Investment policy: The UCITS employs an active stock-picking management strategy, selecting stocks listed on markets comprising mainly stocks issued in the gold sector, which shall represent a minimum of 70% of the net assets. Depending on the manager's expectations of developments on the equity markets, up to 30% of the UCITS' net assets may be exposed directly and/or on an ancillary basis via UCIs to debt securities and money market instruments traded on the international markets. Such securities, mainly rated investment grade (i.e. for which the issuer default risk is lowest), but with no maximum duration, are selected according to their expected yield.

A minimum of 70% and up to 110% of the UCITS' assets will be exposed to international equities directly and/or on an ancillary basis via UCIs and/or through the use of financial contracts.

Subject to a limit of 100% of its net assets, the UCITS may invest in financial contracts traded on international regulated, organised or over-the-counter markets. The ESG investment universe is composed of securities in the UCITS' benchmark index. The management company may select securities from outside its index. However, it will ensure that the chosen benchmark index offers a relevant comparison for the UCITS' ESG rating.

Furthermore, subject to a maximum limit of 10%, the UCITS may be invested in units or shares of UCIs. In order to manage its cash, the UCITS may use repurchase agreements, debt securities or bonds denominated in euros or US dollars, as well as fixed income and money market UCITS in particular, up to an overall limit of 10% of the net assets.

Other information: Environmental, social and governance (ESG) criteria are one of the components of the management; their weighting in the final decision is not defined in advance.

Recommended holding period: more than five years

Frequency of unit buying or selling: The net asset value is calculated daily, with the exception of public holidays in France and/or days on which the French markets (official calendar of Euronext Paris S.A.), US markets (official calendar of the NYSE) and Canadian markets (official calendar of the Toronto Stock Exchange) are closed, for all orders received by the transfer agent before 12.30 p.m. on each NAV calculation day, at that day's net asset value.

Allocation of income: Accumulation

Allocation of net realised gains: Accumulation

Risk and reward profile

The above indicator is calculated on the basis of historical data and may, therefore, not be a reliable indication of the future risk profile of the UCITS. It is not certain that the risk and reward category shown will remain unchanged and the classification may change over time. Category 1 does not mean that an investment is risk-free. Repayment of the initial investment is not guaranteed.

This UCITS is rated in category 7, in line with the type of securities and geographic regions detailed under the heading "Objectives and investment policy", as well as the currency of the unit.

Significant risks not taken into account in this indicator:

Credit risk: risk that the issuer of the bond or money market securities may not be able to meet its obligations or that its credit rating may be downgraded. It may also be the result of an issuer defaulting on repayment at maturity.

Liquidity risk: risk linked to the low level of liquidity on the underlying markets, which makes them sensitive to significant buy/sell trends.

Derivative risk: the use of derivatives may cause a greater drop in the value of net assets than that of the markets in which they are invested.

Counterparty risk: this is the risk that a market participant will default, preventing them from honouring their commitments in respect of your portfolio.

The occurrence of any of these risks may negatively impact the net asset value.

A written copy of the policy is available free of charge from the management company upon request.

The charges and fees you pay are used to cover the costs of running the UCITS, including the costs of marketing and distributing the units. These charges reduce the potential growth of your investment.

The entry and exit charges shown here are maximum figures; in some cases, investors may pay less. Investors can find out the actual entry and exit charges from their adviser or distributor.

The ongoing charges figure is based on the charges for the year ending in September 2021. This figure may vary from year to year.

It excludes intermediary fees with the exception of the entry and exit charges paid by the UCITS when buying or selling units and/or shares of other UCIs and investment funds.

The performance fee, excluding ongoing charges, was paid during the last financial year ended September 2021 and represents 0.39% of average net assets.

More detailed information on charges and fees can be found in the UCITS prospectus and on the website www.edram.fr.

Past performance is not an indication of future returns. Performance may vary over time.

Ongoing charges, intermediary fees and any performance fees charged are included in the performance calculation. Entry and exit charges are excluded.

Past performance has been calculated in USD, with net dividends reinvested.
