Investment risks

For complete information on risks, refer to the legal documents.

The value of investments, and any income from them, will fluctuate. This may partly be the result of changes in exchange rates. Investors may not get back the full amount invested.

The creditworthiness of the debt the Fund is exposed to may weaken and result in fluctuations in the value of the Fund. There is no guarantee the issuers of debt will repay the interest and capital on the redemption date. The risk is higher when the Fund is exposed to high yield debt securities.

Changes in interest rates will result in fluctuations in the value of the fund.

The Fund may be exposed to the risk of the borrower defaulting on its obligation to return the securities at the end of the loan period and of being unable to sell the collateral provided to it if the borrower defaults.

Past performance does not predict future returns.

Source: Invesco, Bloomberg L.P., FactSet. ETF performance shown is calculated with reference to the Net Asset Value, inclusive of net reinvested income and net of ongoing charges and portfolio transaction costs, in EUR. The figures do not reflect the actual share price, the impact of the bid/offer spread or broker commissions. Returns may increase or decrease as a result of currency fluctuations. ETF NAV performance differs from that of the index due to the ongoing charges and portfolio transaction costs and due to the fact that the ETF does not necessarily always hold all the securities in the index in their respective weighting. This ETF does not charge an entry fee. For share classes with fewer than ten 12 month periods since launch, performance data does not exist for some of the periods covered in the standardised 12 month performance table.

¹FTSE MTS Eurozone Government Bill 0-6 Month Capped Index: The Index only includes actively quoted eurozone countries sovereign bills (Selected Bills), but the weight of each bill reflects the total size of each country's bill market as listed on the MTS Platform (whether quoted or not) and falling in the correct maturity range. The FTSE MTS Government Bill Indices measure the total return of a portfolio of sovereign bills issued by eurozone countries and listed on the MTS bond platform. In the 0-6 months maturity bucket, each issuer within the Index is weighted by market capitalisation and capped to a maximum of 34.5%. Coupons paid out on any bond in an index portfolio are reinvested overnight in the index itself without deduction of any withholding tax. The Index is priced using live quotes from the MTS inter-dealer platform and rebalanced every calendar week.

Invesco's Commitment to ESG Investing

At Invesco, our commitment to ESG investing is a key element of our ambition to be the most client-centric asset manager.

Environmental, social, and governance (ESG) considerations are a critical part of our corporate culture, and we appreciate they also may be important in your own investment strategy.

Although not all of our ETFs follow an index with specific ESG characteristics, the information on this page provides transparency to help you identify long-term risks and opportunities in your investments.

Business involvement screens can help you gain better insights into potentially controversial business activities that a fund or index may be exposed to.

All ESG, carbon emissions, and business involvement data are sourced from MSCI ESG Research. In order to assess the ESG profile, the fund or index must have at least 10 securities or constituents, and 65% of the fund's weight must be covered by MSCI ESG Research. For more details, please see MSCI's methodology on www.msci.com

Article 6 SFDR

For the purposes of meeting the requirements of Article 6 SFDR, we have disclosed information on Sustainability Risks in the Prospectus Addendum found on etf.invesco.com

Important ESG Information

The above information is for illustrative purposes only. Providing this information is not indicative of how or whether ESG factors will be integrated into a fund. Unless otherwise stated in the legal offering documents (fund and share class specific Key Investor Information Document (KIID), prospectus, annual & semi-annual reports), the ESG information provided on this page does not change a fund's investment objective or policy or constrain the fund's investable universe. For more information regarding a fund's investment strategy, please see the fund's prospectus, available free of charge on our website etf.invesco.com and from the issuers. The rating may vary from one rating agency to another. The rating may change over time and is not a guarantee of future performance of the fund.

Glossary

MSCI ESG Fund Rating: Designed to measure the ESG risks and opportunities of a fund's underlying holdings, making it possible to rank or screen mutual funds and ETFs and on a AAA to CCC ratings scale. This rating aims to provide fund level transparency and measure the ESG characteristics of the total portfolio. It is calculated as a direct mapping of MSCI ESG Quality Scores to letter rating categories. ESG Leaders are companies with an ESG rating of AAA or AA (best in class), and ESG Laggards are companies with an ESG rating of B or CCC.

MSCI ESG Quality Score: Calculated as the weighted average of the underlying holding's ESG Scores. It is provided on a 0-10 scale, with 0 and 10 being the respective lowest and highest possible scores. MSCI scores underlying holdings according to their exposure to 20 industry specific material ESG risks and their ability to manage those risks relative to peers. These issuer-level ESG scores correspond to an issuer-level ESG rating. The scores are based on industry-adjusted company ratings from MSCI.

ESG % Coverage: The percentage of the fund and benchmark where MSCI ESG Research is available.

CO₂ Scope 1 Emission: A company's Scope 1 direct emissions (tCO₂e) from operations. The direct emissions data represents the final, MSCI reviewed and approved value based on the MSCI methodology, which selects the accurate value from available sources.

CO₂ Scope 2 Emission: A company's Scope 2 energy indirect emissions (tCO₂e) from operations. The energy indirect emissions data represents the final, MSCI reviewed and approved value based on the MSCI methodology, which selects the accurate value from available sources.

Total Carbon Intensity: Measures the fund or index's overall carbon intensity and carbon efficiency associated with its holdings, based on carbon expertise and research provided by MSCI. It uses the carbon intensity metrics at the company level (Scope 1 + Scope 2) per US\$1 million of revenue. For government bonds, it uses total country carbon emissions per US\$1 million GDP.

Wtd Avg (Weighted Average) Carbon Intensity: Measures the fund or index exposure to the carbon emissions and intensity associated with its holdings, based on carbon expertise and research provided by MSCI. It uses the carbon intensity metrics at the company level (Scope 1 + Scope 2) per US\$1 million of revenue (for government bonds, it uses total country carbon emissions per US\$1 million GDP), calculated as the weighted average by fund or index weight.

Board Independence: Weighted average percentage of board members that meet the MSCI criteria for independence.

Female Directors: Weighted average percentage of female board members.

SFDR: Part of the EU's Sustainable Finance Action Plan, the Sustainable Finance Disclosure Regulation (SFDR, also known as Disclosure Regulation) aims to promote transparency on sustainability by ensuring that participants in the financial services sector provide consistent information to clients in relation to the sustainability of the products and services they provide. The supplement of the fund and the management company website contain further information on compliance with SFDR.

Article 6: The requirement under SFDR to describe the manner in which sustainability risks are integrated into investment decisions, or to provide an explanation of reasons why sustainability risks are deemed not to be relevant.

Article 8 Fund: A fund that, in accordance with the criteria outlined in Article 8 of SFDR, promotes, among other characteristics, environmental or social characteristics, or a combination of those characteristics and provided that the companies that the fund invests in follow good governance practices.

Article 9 Fund: A fund that, in accordance with the criteria outlined in Article 9 of SFDR has sustainable investment as its objective.

Data Availability: N/A indicates insufficient MSCI ESG data coverage. Government Bond ETF's (including US Treasury and UK Gilts) do not have scope 1 or scope 2 emissions, corporate governance, business screening or sector analysis data.

¹ The ESG rating distribution table does not include cash positions and therefore may not total 100%.

MSCI ESG Business Involvement Screening Research: Provides research on company involvement in products and services, which allow investors to screen companies according to specific criteria motivated by ethical, impact, compliance or ESG risk considerations.

Summary definitions of each business screening are as follows:

UN Global Compact (UNGC) Violations: Percentage of companies in the fund or index that have been identified to have violated United Nations Global Compact principles. Data is based on MSCI ESG Controversies Research and MSCI ESG Global Norms Screening.

Controversial Weapons: Percentage of companies in the fund or index that have been identified to have ties to controversial weapons, including cluster munitions, land mines, biological and chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non detectable fragments.

Conventional Weapons: Percentage of companies in the fund or index that have been identified to have ties to conventional weapons, weapons systems, component. and support systems and services.

Nuclear Weapons: Percentage of companies in the fund or index that have been identified to have ties to production of nuclear warheads and/or whole nuclear missiles, manufacture components that were developed or are significantly modified for exclusive use in nuclear weapons (warheads and missiles), manufacture or assemble delivery platforms that were developed or significantly modified for the exclusive delivery of nuclear weapons, provide auxiliary services related to nuclear weapons.

Civilian Firearms: Percentage of companies in the fund or index that have been identified to have ties to firearms, small-arms ammunitions including automatic and semi-automatic for the civilian market. The research excludes products exclusively sold for the military, government. and law enforcement markets.

Tobacco: Percentage of companies in the fund or index that have been identified to have ties to tobacco products, such as cigars, kreteks, smokeless tobacco, snuff, snus, dissolvable and chewing tobacco. This also includes companies that grow or process raw tobacco leaves.

Thermal Coal: Percentage of companies in the fund or index that have been identified to have ties to power from coal or derive revenue from thermal coal mining.

Oil Sands: Percentage of companies in the fund or index that have been identified to have ties to oil sands, in particular, reserve ownership and production activities.

Recreational Cannabis: Percentage of companies in the fund or index that have been identified to have ties to or derive revenue from recreational cannabis.
