PART A: GENERAL INFORMATION

■ Introduction to the Indexed Equities Sub-Funds

The objective of the Indexed Equities Sub-Funds is to replicate the composition of the index referred to in the investment policy of each Sub-Fund while slightly outperforming this index and maintaining a very low tracking error.

To create this slight outperformance, the Investment Manager may use, among others, the following approaches:

- securities lending in order to create a steady income and/or to implement tax optimisation techniques allowing an efficient management of the dividends distribution received by the Sub-Fund;
- management of changes in index composition and of takeover bids: leveraging its markets knowledge and anticipations, the Investment manager aims to determine the best timing for the sale or purchase of shares to optimise prices and/or risks involved by those operations.

Each Sub-Fund may invest in financial derivative instruments for hedging purpose and for the purpose of efficient portfolio management, while following, on the level of the underlying values, the investment limit(s) laid down in the investment policy of each Sub-Fund.

Each Sub-Fund is also authorized to employ techniques and instruments relating to transferable securities and money market instruments under the conditions and within the limits laid down under Chapter XX "Further Information", B "Additional Investment Restrictions", points 1.4 to 1.6 of the full prospectus.

Indexed sub-funds are submitted to specific rules concerning the risk diversification: the Indexed Equities Sub-Funds may invest up to a maximum of 20% of its net assets in shares and/or debt securities issued by the same body; this limit is of 35% where that proves to be justified by exceptional markets conditions, in particular in regulated markets where certain transferable securities or money market instruments are highly dominant. The investment up to this 35% limit is only permitted for a single issuer.

■ Investment objective and policy

The objective of this Sub-fund is to replicate the MSCI North America Index composition while slightly outperforming the index and maintaining a very low tracking error.

The Sub-fund aims to achieve a level of tracking error whereby the annual variability of the difference in returns between the performance of the sub-fund and its index will not normally exceed 2%. On a daily basis, the manager aims to maintain the tracking error under 0.50%.

The exposure to the Index will be achieved either through direct investment or through the use of derivatives or through a combination of both.

In order to manage its liquidity, the Sub-fund may hold deposits, while keeping the full exposure on its index through derivatives.

The "MSCI North America" is the index of this Sub-fund. The MSCI North America is an equity index, representative of the large and mid cap Northern American stocks. Each stock of the index is weighted in function of the size of its capitalization, adjusted with its free float.

The base currency of the Sub-Fund is Euro.

■ Risk profile

In general the Indexed Sub-Funds may expose to Market, Exchange and Liquidity Risks.

The use of Derivative instruments by certain Sub-funds as part of their investment process and of specific investment strategies may lead to be exposed to Management and Investment Strategy Risk as well as Risks attached to transactions into derivatives.

Furthermore, as investments of a given Sub-Fund may be made or hedged in other currencies than its base currency, the acquisition of the Sub-Fund's Shares may lead to be exposed to an Exchange Risk.

Depending on market conditions, Investors should be prepared to bear an unrealised loss on their original investments over a period of time, or an actual loss should they decide to dispose of their investments in an unfavourable market. It should be noted that Shares are neither guaranteed nor principal protected and that there can be no assurance that Shares are redeemed at the price for which they have been subscribed.

■ Typical investor profile

The Sub-Fund may be appropriate for investors, who:

- seek capital appreciation over the long-term;
- do not seek regular income from their investments (exception made of investors subscribing for distribution Shares);

- are willing to take on the increased risks associated with investing in foreign securities; and
- can withstand volatility in the value of their Shares.

An investment in the Sub-Fund is not a deposit in a bank or other insured depository institution. Investment may not be appropriate for all investors. The Sub-Fund is not intended to be a complete investment programme and investors should consider their long-term investment goals and financial needs when making an investment decision about the Sub-Fund. An investment in the Sub-Fund is intended to be a long-term investment. The Sub-Fund should not be used as a trading vehicle.

■ Shares Classes/Allocation of earnings

Shares of the Sub-Fund are divided into several Classes available to investors according to their quality. Shares may be further sub-divided into Distribution and Accumulation Shares. Accumulation Shares automatically retain, and re-invest, all attributable incomes within the Sub-Fund when Distribution Shares pay any attributable income in the form of a dividend. This can either be paid by bank transfer into your bank account, or by cheque sent to your home address, in both cases in the currency specified (please note that bank transfer and foreign exchange costs will be borne by the investor).

Accumulation Shares in non-certificated registered form may appear as the most efficient way for investors to manage their account. Indeed they enable investors to give conversion and redemption instructions by letter, fax or telex with no need to return any Share certificates.

If timely settlement is not made an application may lapse and be cancelled. All applications will be duly confirmed by contract notes. Unless otherwise or clearly specified by the investor, shares will be purchased or redeemed at the Dealing Price calculated in the base currency of the Sub-Fund. In the absence of specific instructions, Shares will be issued as non-certificated accumulation Shares of the Classic class. If on any Dealing Day, the Fund receives request for redemptions (or conversions) of Shares equalling or exceeding 10 per cent of the number of Shares of the Sub-Fund, it may declare that such redemptions (or conversions) are deferred until a Dealing Date not more than seven Dealing Days following such time. Conversions from Shares of one Class of a Sub-Fund to Shares of another Class of either the same or different Sub-Fund are not permitted except if any investor complies with all the conditions required for the Class into which the conversion is made. Except in the case of a suspension of deferral or right to redeem or purchase Shares of the relevant Sub-Funds, a request for conversion, once made, may not be withdrawn. The Fund may temporarily suspend or restrict the issue, redemption and conversion shares if necessary in order to protect the Shareholders' interest.
