The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

DJE - Agrar & Ernährung - XP (EUR)

ISIN: LU0350836341 WKN: A0NGGE
 The DJE - Agrar & Ernährung is a sub-fund of the DJE.
 The Fund is managed by DJE Investment S.A. ("management company").

Objectives and investment policy

The purpose is to generate a long-term value enhancement.

The DJE - Agrar & Ernährung ("sub-fund") is an equity fund. In order to achieve the investment objectives, the assets of the sub-fund are predominantly invested in equities of companies engaged directly or indirectly in one or more of the following sectors of the agricultural value chain: production, treatment and processing as well as marketing. In addition the sub-fund may also invest in shares of non-European issuers and bonds of all kinds that are listed on the stock exchange or traded on another regular market which operates regularly, is recognized and open to the public, including zero coupon bonds and floating rate securities, certificates as well as convertible and option bonds, whose warrants are denominated in securities. The investment in other funds is limited to a maximum of 10 per cent. Apart from the aforementioned constraints the composition of the portfolio will be performed actively and independently of any constraints regarding benchmarks, sectors, countries, duration, rating and market capitalization under consideration of ESG factors. The sub-fund may use financial instruments, whose value depends on future prices of other assets (derivatives) for hedging and capital appreciation purposes.

Detailed information on the aforementioned (and/or further) opportunities to invest in the Fund can be found in the current sales prospectus.

In principle, investors may redeem their units on any banking day in Luxembourg, with the exception of 24 and 31 December. The redemption of units may be suspended in extraordinary circumstances if this is deemed necessary in the interests of investors.

This Fund pays the rewards generated to investors.

The historical data used for calculating the synthetic indicator are not a reliable indication of the future risk and reward profile of the share class. The category shown is not guaranteed to remain unchanged and may shift over time. Even the category 1 does not mean a risk-free investment.

The unit class is classified in category 5 because its unit price typically fluctuated strongly and therefore both the risk of loss and the chance of profit may be rather high.

Because of the calculation model used, all risks may not be taken into consideration when placing the Fund in a risk class.

Detailed information can be found in the section entitled "Risks" of the prospectus. The following risks have no direct influence on this categorisation, but may be significant for the Fund:

Credit risks
 The Fund may invest part of its assets in bonds. The issuers of these bonds could become insolvent, causing the bonds to lose some or all of their value.

Liquidity risks
 The Fund may invest part of its assets in securities that are not traded on a stock exchange or similar market. It may be difficult to find a buyer for such securities in the short term. As a result, the risk that share redemptions will be suspended may increase.

Counterparty risks
 The Fund may enter into various transactions with counterparties. If a counterparty becomes insolvent, that party will not be able to meet some or all of its open obligations to the Fund.

Risks relating to the use of derivatives
 The Fund may enter into derivative transactions for the purposes listed above in the section "Investment policy". This means increased opportunities, but also increased risk of losses. The use of derivatives to hedge against losses may also reduce the profit opportunities of the Fund.

Operating risks and custodial risks
 The Fund may become a victim of fraud or other criminal acts. The Fund may also suffer losses due to misunderstandings or errors by employees of the Management Company, a depositary or external third parties. Finally, his management or the safekeeping of his assets may be adversely affected by external events such as fires, natural disasters or the like. The safekeeping of assets, in particular abroad, may entail a risk of loss resulting from insolvency, breaches of duty of care or improper conduct on the part of the custodian or a sub-custodian.

The charges you pay are used to pay the costs of running the sub-fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
