**Past performance does not predict future returns.** Net performance figures reflect the reinvestment of all dividends and earnings, and the deduction of investment management and performance fees. In addition, the typical fees and expenses charged to a fund will offset the funds trading profits. The specific fee structure for BlueBay Funds - BlueBay Emerging Market Corporate Bond Fund R - USD is detailed in the Key Investor Information document or the Fund's prospectus.

## Investment Objective

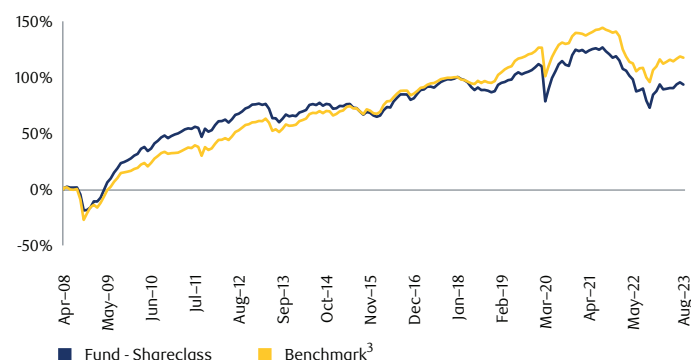

The fund aims to generate a return for you by generating income and increasing the amount you originally invested. It invests primarily in bonds that pay fixed interest.

## Investment Policy

The fund is actively managed and targets better returns than its benchmark, the JP Morgan Corporate Emerging Market Bond Index (CEMBI) Diversified, while taking into account Environmental, Social and Governance ("ESG") considerations. There are no restrictions on the extent to which the fund's portfolio and performance may deviate from the ones of the benchmark. As part of the investment process, the Investment Manager has full discretion over the composition of the fund's portfolio and may take exposure to companies, countries or sectors not included in the benchmark. At least two-thirds of the fund's investments will be in fixed income bonds of any rating, or unrated, issued by companies based in emerging market countries (which may include securities of issuers in financial distress) which may be denominated in any currency.

The fund meets the conditions set out in Article 8 of the Sustainable Finance Disclosure Regulation as it promotes environmental/social characteristics through binding requirements as a key feature. Full details of the Fund's ESG framework are available online [www.bluebay.com/en/investment-expertise/esg/approach/](http://www.bluebay.com/en/investment-expertise/esg/approach/)

## Cumulative Relative Performance Net of Fees (USD)<sup>2</sup>

## Risk Considerations

- At times, the market for emerging market bonds may dry up, which could make it difficult to sell these bonds, or the Fund may only be able to sell them at a discount
- There may be cases where an organisation with which we trade assets or derivatives (usually a financial institution such as a bank) may be unable to fulfil its obligations, which could cause losses to the Fund
- Investing in emerging market bonds offers you the chance to gain higher returns through growing your capital and generating income. Nevertheless, there is a greater risk that the organisation which issued the bond will fail, which would result in a loss of income to the fund along with its initial investment
- Emerging markets may be more volatile and it could be harder to sell or trade these bonds. There may be less government supervision, legal regulation and less well defined tax laws and procedures than in countries with more developed trading markets. Emerging markets can be particularly sensitive to political instability, which can result in greater volatility and uncertainty, subjecting the Fund to the risk of losses
- BlueBay could suffer from a failure of its processes, systems and controls – or from such a failure at an organisation on which we rely in order to deliver our services – which could lead to losses for the fund
