Convertible Bond

A compartment of Generali Investments SICAV

Class BX - Accumulation (LU0183829034)

This SICAV is managed by Generali Investments Luxembourg S.A.

Objectives and Investment Policy

The objective of the Fund is to outperform its Benchmark and preserve the invested capital and maximize the total investment return through an exposure to convertible bonds or other financial derivative instruments and equity related securities. The global net position of the Fund will create a net long bias on average over time.

The Fund shall invest at least 51% of its net assets in convertible bonds, exchangeable bonds, mandatory convertible bonds and options without credit rating constraints. Investment in contingent convertible bonds ("CoCos") is allowed up to 10% of the Fund's net assets.

The Fund shall invest at least 51% of its net assets in securities denominated in Euro.

It may also invest up to 30% of its net assets in other bonds having an underlying exposure to equities, in participating shares and warrants and in short term money market instruments. The Fund may also invest up to 30% of its net assets in money market instruments and bank deposits.

Investments in equities following the conversion or through direct investments will be less than 10% of the net asset value of the Fund.

The Fund may also invest into "Rule 144A" and/or Regulation S securities, which in accordance with US Law are not registered with the US Securities and Exchange Commission (SEC).

The Fund may invest up to 49% of its net assets in government and corporate debt securities (including senior bonds and subordinated bonds) with an Investment grade Rating and/or a Sub-Investment Grade Rating or, that are in the opinion of the Investment Manager, of comparable quality.

The Fund may also hold distressed/defaulted securities (being securities having a rating CCC+ or below from S&P or any equivalent grade of other credit rating agencies) as a result of the potential downgrading of the

issuers. Distressed/defaulted securities will be sold as soon as possible, under normal market circumstances, and in the best interest of shareholders. In any event, the proportion of distressed/defaulted securities due to a downgrade will not amount to more than 5% of the Fund's net assets. If no rating is available, then an equivalent credit rating, as deemed by the Investment Manager, may be used.

The Fund may use standardized credit default swaps ("CDS") and the total obligation may not exceed 25% of the Fund's net assets.

The Fund does not track the Benchmark but aims to outperform it. The Investment Manager will however have full discretion in choosing (i) which constituents of the Benchmark the Fund will be invested in, and (ii) the weightings of the selected issuers within the Fund's portfolio. There are no restrictions on the extent to which the Fund's performance may deviate from the ones of the Benchmark. The Investment Manager can also invest in instruments that are not constituents of the Benchmark.

The Fund may use financial instruments and derivatives for hedging purposes, for efficient portfolio management purposes and for investment purposes.

The Fund may also use TRS (and other FDI with the same characteristics) and securities lending techniques for the achievement of its investment objective.

The Fund is open-ended. You may redeem shares of the Fund on any Luxembourg business day.

The Share Class makes no dividend payment. Earned income is retained and reinvested.

The Benchmark of the Fund is the Refinitiv Eurozone Hedged CB EUR.

Risk and Reward profile

This indicator represents the annual historical volatility of the Fund over a 5-year period. Its aim is to help investors understand the uncertainties attached to gains and losses that may have an impact on their investment. The Fund's exposure to interest rate risk explains its classification in this category.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with the Fund is not guaranteed and may change over time. The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include

the following:

Credit Risk: The Fund invests a substantial portion of its assets in bonds. The issuers may become insolvent, whereby the bonds may lose a major part of their value or their value entirely.

Liquidity Risk: Risk related to a limited market activity that could not allow the Fund to sell or buy underlying investments in suitable conditions.

Counterparty Risk: The Fund primarily concludes derivatives trades with various contracting parties. There is a risk that counterparties may no longer be able to honour their payment or settlement obligations.

Derivative Risk: The Fund uses derivative instruments to achieve higher performance through speculation on rising or falling prices. Increased opportunities may lead to increased risk of losses.

Operational Risk and Depository Risk: The Fund may fall victim to fraud or other criminal acts. It may also incur losses due to misunderstandings or errors by employees of the management company, the depository or external third parties. Finally, its' management or the custody of its' assets can be adversely affected by external events such as fires, natural disasters etc.

Specific Securities-Related Risk: The Fund may invest in securities rated below investment grade, which present greater risk of loss to principal and interest than higher-quality securities and Contingent Capital Securities (CoCos).

For more information about the risks of the Fund, please refer to the risk section of the prospectus.
