Key Investor Information Document

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Global Convertibles (the "Fund"), Share class : C EUR (LU0418546858) is a sub-fund of iMGP (the "SICAV") managed by iM Global Partner Asset Management S.A. (the "Management Company") and whose sub-management has been delegated to Advent Capital Management LLC.

Objectives and investment policy

The Sub-fund's objective is to obtain long-term capital growth in euros through bonds convertible into the shares of private companies. The Sub-fund may, to a lesser extent, invest in other fixed income securities, including ABS (Asset Backed Securities). The Index Thomson Reuters Global Defensive Hedged EUR is used for comparison only, incl. for performance comparison. The Sub-fund is actively managed and the manager's discretionary powers are not constrained by the Index. Although the manager may take into consideration the Index composition, the Sub-fund may bear little resemblance to the Index.

The manager may use techniques to partially or fully protect the Sub-fund from its exposure to currencies other than the base currency. You may sell your shares in the Sub-fund upon request, on a daily basis. Profits are not distributed but are accumulated by the Sub-fund. Recommendation: this Sub-fund may not be appropriate for investors who plan to withdraw their money in less than 4 years.

Risk and reward profile

The Synthetic Risk & Reward Indicator (SRRI) is assigned due to the past or expected share class price variations resulting from its currency and the nature of the Fund's investments and strategy.

The SRRI is based on historical data and may not be a valid indication for the future risk profile of the Share Class. It is not a target or a guarantee and may change over time.

The lowest risk category is not assimilated to a risk-free investment.

The Fund does not offer capital guarantee or asset protection measures.

The Fund may be exposed to the following risks which are not satisfactorily captured by the SRRI and may negatively impact its assets:

Operational risk: Human or technical issues or errors during the processing of the transactions and/or the calculation of the NAV of the Fund may result in losses.

Liquidity risk: selling securities in low volume markets may imply a negative impact on the valuation which result in losses.

Financial Derivatives risk: Derivative transactions generate leverage which may emphasize losses whether the strategy (such as hedging, exposure, efficient portfolio management) does not react as expected under certain market conditions.

Counterparty risk: When a counterparty does not respect its obligation related to contracts such as term deposits or over-the-counter derivatives losses may occur.

Credit risk: When issuers default on their payment obligations, unexpected losses may occur on any type of assets linked to them.

Structured/Complex Product risk: Those products are constructed over a specific scenario and/or may react atypically to each individual risk (among others, those mentioned in this section). In case of extreme and/or specific market conditions, products may become valueless.

For further information about the risks associated to this Fund, please see the full prospectus, available at the head office of the SICAV.
