R-CO

Open-ended umbrella investment fund (SICAV)

29, avenue de Messine 75008 PARIS

Statutory auditor's report on the annual financial statements

Financial year ended 30 December 2022	

To the General Meeting,

Opinion

Following our appointment as auditors by your board of directors, we have audited the financial statements of the R-CO investment fund, established in the form of an open-ended investment company (SICAV) for the financial year ended 30 December 2022, which are appended to this report.

In our opinion, the annual financial statements, in accordance with French accounting rules and principles, give a true and fair view of the financial position and assets and liabilities of the SICAV and of the results of its operations at the end of the financial year.

Basis for the opinion on the annual financial statements

Audit framework

We have conducted our audit in accordance with professional standards applicable in France. We consider that the evidence gathered is pertinent and sufficient to serve as a basis for our opinion.

Our responsibilities in light of these standards are described in this report in the section entitled "Responsibilities of the statutory auditor in relation to auditing the annual financial statements".

Deloitte.

Independence

We conducted our audit assignment in accordance with the rules of independence set out in the French Commercial Code and the statutory auditors' code of ethics, for the period from 1 January 2022 to the date on which our report was issued.

Justification of evaluations

In accordance with the provisions of articles L.823-9 and R.823-7 of the French Commercial Code regarding the justification of our evaluations, we hereby inform you that our most important evaluations, in our professional opinion, were focused on the appropriateness of the accounting principles applied, on whether material estimates used were reasonable, and on whether all accounts were presented as per the accounting standards applicable to openended investment funds, particularly as regards financial instruments held in the portfolio.

The evaluations were made in the context of the audit of the annual financial statements, taken as a whole, and the formation of the opinion expressed herein. We have not expressed an opinion regarding individual items in the annual financial statements.

Specific verifications

We have also carried out the specific verifications required by laws and regulations in accordance with the professional auditing standards applicable in France.

Information given in the management report and in the other documents sent to shareholders with respect to the financial position and annual financial statements

We have no matters to report regarding the fair presentation and consistency with the annual financial statements of the information given in the management report of the Board of Directors and in the other documents regarding the financial situation and the financial statements sent to the shareholders.

Corporate governance information

We certify the existence of the information required by Article L. 225-37-4 of the French Commercial Code in the corporate governance section of the management report of the Board of Directors.

Responsibilities of management and those charged with corporate governance for the annual financial statements

The management is responsible for drawing up annual financial statements that give a fair view in accordance with French accounting rules and standards, as well as implementing the internal control system it deems necessary for the drafting of annual financial statements free of material misstatements, whether as a result of fraud or error.

When drawing up the annual financial statements, it is incumbent upon the company's management to evaluate the ability of the SICAV to continue its operations, to present in these financial statements, where applicable, the necessary information regarding continuity of operations and to apply the going concern accounting principle, unless there is a plan to wind up the SICAV or end its activities.

The annual financial statements have been approved by the Board of Directors.

Responsibilities of the statutory auditor in relation to auditing the annual financial statements

It is our responsibility to draft a report on the annual financial statements. Our objective is to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with professional standards will always detect a material misstatement when it exists. Such misstatements may result from fraud or error and are considered to be material when it is reasonable to expect that they may, taken individually or collectively, influence economic decisions that readers of the financial statements may make based on them.

As stipulated in article L.823-10-1 of the French Commercial Code, our certification of the financial statements does not constitute a guarantee of the viability or quality of the management of your SICAV.

As part of an audit carried out in accordance with the standards of professional conduct applicable in France, the statutory auditor shall exercise its professional judgement throughout this audit. Furthermore:

- The statutory auditor identifies and assesses the risks that the annual financial statements contain material misstatements, whether due to fraud or error, and defines and implements audit procedures for such risks and collects evidence considered sufficient and appropriate to serve as the basis of its opinion. The risk of material misstatement not being detected is considerably higher when it is the result of fraud rather than error, since fraud may involve collusion, falsification, voluntary omissions, false declarations or the circumvention of the internal control system;
- The statutory auditor obtains an understanding of the internal controls of relevance to the audit in order to design audit procedures that are appropriate in the circumstances, but not to express an opinion on the effectiveness of the internal controls;
- It evaluates the appropriateness of the accounting methods used and the reasonableness of the accounting estimates made by the management, as well as the related information in the annual financial statements;
- The statutory auditor assesses whether the accounting convention of going concern applied by the company's management is appropriate and, according to the evidence gathered, whether there is any material uncertainty related to events or circumstances likely to call into question the SICAV's ability to continue its operation. This evaluation is based on the information gathered prior to the date of its report; however, it should be noted that subsequent circumstances or events may cast doubt on the continuity of its operations. If it concludes that significant uncertainty exists, it draws the attention of readers of its report to the information provided in the annual financial statements giving rise to this uncertainty or, if this information has not been provided or is not relevant, it certifies the annual financial statements with reservations or refuses to certify them;
- The statutory auditor assesses the overall presentation of the annual financial statements and assesses whether they reflect the underlying transactions and events so as to give a true and fair view.

1. Accounting rules and methods

The annual financial statements are presented in accordance with the provisions of ANC Regulation 2014-01, as amended.

The general principles of accounting apply:

- true and fair view, comparability, going concern,
- accuracy, reliability,
- prudence,
- consistency of accounting methods from one period to the next.

Revenues from fixed income securities are recognised on the basis of interest actually received.

Acquisitions and disposals of securities are recorded excluding charges. The reference currency for the portfolio's accounting is the euro.

The R-CO SICAV has 16 sub-funds:

- R-CO THEMATIC GOLD MINING
- R-CO CONVICTION CREDIT EURO
- R-CO CONVICTION CREDIT SD EURO
- R-co 4CHANGE MODERATE ALLOCATION
- R-CO CONVICTION CLUB
- R-CO CONVICTION EQUITY VALUE EURO
- R-CO 4CHANGE GREEN BONDS

NOTES TO THE ANNUAL FINANCIAL STATEMENTS

1. Accounting rules and methods

The annual financial statements are presented in the form prescribed by ANC regulation 2014-01, as amended.

The general principles of accounting apply:

- true and fair view, comparability, going concern,
- accuracy, reliability,
- prudence,
- consistency of accounting methods from one period to the next.

Revenues from fixed income securities are recognised on the basis of interest actually received.

Acquisitions and disposals of securities are recorded excluding charges.

The reference currency for the portfolio's accounting is the euro.

The duration of the accounting period is 12 months.

Asset valuation rules

Financial instruments are recognised according to the historical cost method and included on the balance sheet at their current value, which is determined by the last-known market value or, if no market exists, by all external means or through the use of financial models.

Differences between the current values used during the calculation of the net asset value and the historical costs of the securities upon their entry into the portfolio are recorded in "valuation differentials" accounts. Values that are not in the portfolio's currency are measured in accordance with the principle set forth below then converted into the portfolio's currency according to the currency rates in effect on the day of the assessment.

Deposits:

Deposits with a remaining life of 3 months or less are valued according to the straight-line method.

Equities, bonds and other securities traded on a regulated or similar market:

For the calculation of the net asset value, equities and other securities traded on a regulated or similar market are valued on the basis of the day's last market price.

Bonds and similar securities are valued at the closing price relayed by various providers of financial services. Interest accrued on bonds and equivalent securities is calculated until the net asset value trading date.

Equities, bonds and other securities not traded on a regulated or similar market:

Securities not traded on a regulated market are valued under the responsibility of the Board of Directors using methods based on the asset value and the yield, taking into consideration the prices used in recent significant transactions.

Negotiable debt securities:

Negotiable debt securities and similar securities that are not the subject of significant transactions are valued on an actuarial basis based on a reference rate defined below, plus, where applicable, a differential representative of the issuer's intrinsic characteristics.

- Negotiable debt securities with a maturity of 1 year or less: Euro interbank offered rate (Euribor);
- Negotiable debt securities with a maturity of more than 1 year: rate of normalised annual interest treasury bonds (BTAN) or fungible treasury bonds (OAT) with similar maturity for the longest maturities.

Negotiable debt securities with a remaining life of 3 months or less may be valued according to the straight-line method.

Treasury bills are valued at the market rate reported daily by Banque de France or treasury bill specialists.

UCIs held:

Units or shares of UCIs will be valued at the last known net asset value.

Securities financing transactions:

Securities received under repurchase agreements are recorded in assets in "receivables representing securities received under repurchase agreements" for the amount provided for in the contract plus accrued interest receivable.

Securities delivered under repurchase agreements are recorded in the long portfolio for their current value. Debt representing securities delivered under repurchase agreements is recorded in the short portfolio at the value set in the contract plus accrued interest payable.

Loaned securities are valued at their current value and are recorded in assets in "receivables representing loaned securities" at the current value plus accrued interest receivable.

Borrowed securities are recorded in assets in "borrowed securities" for the amount specified in the contract and in liabilities in "debts representing borrowed securities" for the amount specified in the contract plus accrued interest payable.

Forward financial instruments:

Forward financial instruments traded on a regulated or similar market:

Forward financial instruments traded on regulated markets are valued at the day's settlement price.

Forward financial instruments not traded on a regulated or similar market:

Swaps:

Interest rate and/or currency swaps are valued at their market value based on the price calculated by discounting future interest flows at the market interest and/or currency rates. This price is corrected for the risk of non-repayment.

Index swaps are valued on an actuarial basis based on a reference rate provided by the counterparty.

Other swaps are valued at their market value or at a value estimated according to the methods established by the Board of Directors.

Off-balance sheet commitments:

Forward contracts appear in off-balance sheet commitments for their market value at the price used in the portfolio.

Options are converted into the underlying equivalent.

Commitments on swaps are presented at their nominal value or, in the absence of a nominal value, for an equivalent amount.

Management fees

Management fees and running costs cover all costs related to the UCI: financial, administrative and accounting management, custodianship, distribution, audit fees, etc.

These fees are charged to the income statement of the UCI.

Management fees do not include transaction costs. Further details on the fees actually invoiced to the UCI can be obtained from the prospectus.

The fees are recorded prorata temporis each time the net asset value is calculated.

The total of these fees is within the maximum net asset fee rate specified in the prospectus or fund regulations:

FR0013367356 - Share class R-co Valor Balanced R EUR: Maximum rate of 2.15% incl. taxes FR0013367349 - Share class R-co Valor Balanced P USD H: Maximum rate of 0.80% incl. taxes FR0013367331 - Share class R-co Valor Balanced P USD: Maximum rate of 0.80% incl. taxes FR0013367299 - Share class R-co Valor Balanced P EUR: Maximum rate of 0.80% incl. taxes FR0013367281 - Share class R-co Valor Balanced F EUR: Maximum rate of 1.65% incl. taxes FR0013367265 - Share class R-co Valor Balanced C EUR: Maximum rate of 1.30% incl. taxes FR0013367315 - Share class R-co Valor Balanced PB EUR: Maximum rate of 0.80% incl. taxes FR0013367273 - Share class R-co Valor Balanced D EUR: Maximum rate of 1.30% incl. taxes

Appropriation of distributable amounts

Definition of distributable amounts

Distributable amounts consist of the following:

Income:

The net income for the period is equal to the amount of interest, arrears, premiums and prizes, dividends, attendance fees, and any other income related to the securities comprising the portfolio, plus the income from any amounts temporarily available and minus management fees and borrowing costs.

The net income is increased by retained earnings and increased or reduced by the balance of the income equalisation account.

Capital gains and losses:

Capital gains, net of charges, minus capital losses, net of charges, recorded during the period, plus net capital gains of the same type recorded during earlier periods that have not been paid out or accumulated and minus or plus the balance of the capital gains equalisation account.

Methods for appropriating distributable amounts:

Share class(es)	Appropriation of net income	Appropriation of realised net capital gains or losses
Share class R-co Valor Balanced C EUR	Accumulation	Accumulation
Share class R-co Valor Balanced D EUR	Paid out	Accumulated and/or distributed and/or carried forward by decision of the SICAV management
Share class R-co Valor Balanced F EUR	Accumulation	Accumulation
Share class R-co Valor Balanced PB EUR	Paid out	Accumulated and/or distributed and/or carried forward by decision of the SICAV management
Share class R-co Valor Balanced P EUR	Accumulation	Accumulation
Share class R-co Valor Balanced R EUR	Accumulation	Accumulation

NOTES TO THE ANNUAL FINANCIAL STATEMENTS

1. Accounting rules and methods

The annual financial statements are presented in the form prescribed by ANC regulation 2014-01, as amended.

The general principles of accounting apply:

- true and fair view, comparability, going concern,
- accuracy, reliability,
- prudence,
- consistency of accounting methods from one period to the next.

Revenues from fixed-income securities are recognised on the basis of accrued interest.

Acquisitions and disposals of securities are recorded excluding charges.

The reference currency for the portfolio's accounting is the euro.

The duration of the accounting period is 12 months.

Asset valuation rules

Financial instruments are recognised according to the historical cost method and included on the balance sheet at their current value, which is determined by the last-known market value or, if no market exists, by all external means or through the use of financial models.

Differences between the current values used during the calculation of the net asset value and the historical costs of the securities upon their entry into the portfolio are recorded in "valuation differentials" accounts. Values that are not in the portfolio's currency are measured in accordance with the principle set forth below then converted into the portfolio's currency according to the currency rates in effect on the day of the

Deposits:

assessment.

Deposits with a remaining life of 3 months or less are valued according to the straight-line method.

Equities, bonds and other securities traded on a regulated or similar market:

For the calculation of the net asset value, equities and other securities traded on a regulated or similar market are valued on the basis of the day's last market price.

Bonds and similar securities are valued at the closing price relayed by various providers of financial services. Interest accrued on bonds and equivalent securities is calculated until the net asset value trading date.

Equities, bonds and other securities not traded on a regulated or similar market:

Securities not traded on a regulated market are valued under the responsibility of the Board of Directors using methods based on the asset value and the yield, taking into consideration the prices used in recent significant transactions.

Negotiable debt securities:

Negotiable debt securities and similar securities that are not the subject of significant transactions are valued on an actuarial basis based on a reference rate defined below, plus, where applicable, a differential representative of the issuer's intrinsic characteristics.

- Negotiable debt securities with a maturity of 1 year or less: Euro interbank offered rate (Euribor);
- Negotiable debt securities with a maturity of more than 1 year: rate of normalised annual interest treasury bonds (BTAN) or fungible treasury bonds (OAT) with similar maturity for the longest maturities.

Negotiable debt securities with a remaining life of 3 months or less may be valued according to the straight-line method.

Treasury bills are valued at the market rate reported daily by Banque de France or treasury bill specialists.

UCIs held:

Units or shares of UCIs will be valued at the last known net asset value.

Securities financing transactions:

Securities received under repurchase agreements are recorded in assets in "receivables representing securities received under repurchase agreements" for the amount provided for in the contract plus accrued interest receivable.

Securities delivered under repurchase agreements are recorded in the long portfolio for their current value. Debt representing securities delivered under repurchase agreements is recorded in the short portfolio at the value set in the contract plus accrued interest payable.

Loaned securities are valued at their current value and are recorded in assets in "receivables representing loaned securities" at the current value plus accrued interest receivable.

Borrowed securities are recorded in assets in "borrowed securities" for the amount specified in the contract and in liabilities in "debts representing borrowed securities" for the amount specified in the contract plus accrued interest payable.

Forward financial instruments:

Forward financial instruments traded on a regulated or similar market:

Forward financial instruments traded on regulated markets are valued at the day's settlement price.

Forward financial instruments not traded on a regulated or similar market:

Swaps:

Interest rate and/or currency swaps are valued at their market value based on the price calculated by discounting future interest flows at the market interest and/or currency rates. This price is corrected for the risk of non-repayment.

Index swaps are valued on an actuarial basis based on a reference rate provided by the counterparty.

Other swaps are valued at their market value or at a value estimated according to the methods established by the Board of Directors.

Off-balance sheet commitments:

Forward contracts appear in off-balance sheet commitments for their market value at the price used in the portfolio.

Options are converted into the underlying equivalent.

Commitments on swaps are presented at their nominal value or, in the absence of a nominal value, for an equivalent amount.

Management fees

Management fees and running costs cover all costs related to the UCI: financial, administrative and accounting management, custodianship, distribution, audit fees, etc.

These fees are charged to the income statement of the UCI.

Management fees do not include transaction costs. Further details on the fees actually invoiced to the UCI can be obtained from the prospectus.

The fees are recorded prorata temporis each time the net asset value is calculated.

The total of these fees is within the maximum net asset fee rate specified in the prospectus or fund regulations:

FR0010680546 - Share class R-CO THEMATIC REAL ESTATE SS: Maximum rate of 1.50% incl. taxes

FR0013293925 - Share class R-CO THEMATIC REAL ESTATE P: Maximum rate of 0.95% incl. taxes

FR0011885797 - Share class R-CO THEMATIC REAL ESTATE F: Maximum rate of 2.10% incl. taxes

FR0007457890 - Share class R-CO THEMATIC REAL ESTATE C: Maximum rate of 1.50% incl. taxes

FR0010680553 - Share class R-CO THEMATIC REAL ESTATE I: Maximum rate of 0.75% incl. taxes

FR0011885789 - Share class R-CO THEMATIC REAL ESTATE I2: Maximum rate of 0.75% incl. taxes

FR0011361062 - Share class R-CO THEMATIC REAL ESTATE ID: Maximum rate of 0.75% incl. taxes FR0007474028 - Share class R-CO THEMATIC REAL ESTATE D: Maximum rate of 1.50% incl. taxes

Performance fee:

With effect from 1 January 2019, the method for calculating performance fees shall be as follows: The performance fee is calculated over a maximum of three years by comparing the change in the sub-fund's assets (coupon reinvested and excluding variable management fees) with the assets of a reference fund.

- The starting value of the reference fund is the sub-fund's assets (i) at the close of the previous financial year if performance fees were deducted at that date or, failing that, (ii) at the close of the most recent financial year in which performance fees were charged during the last three financial years if performance fees were charged in one of these financial years or, failing that, (iii) at the close of the previous financial year if no performance fees were charged in the last two financial years or, failing that, (iv) on 1 January 2018.
- The reference fund's value rises and falls in line with the daily performance of the benchmark, with the same inflows and outflows of funds from subscriptions and redemptions as the sub-fund.

If, at the close of the financial year, the sub-fund's assets (excluding variable management fees) are greater than the assets of the reference fund based on the starting value described above, a performance fee is charged that is equal to 15% (including taxes) of the difference in valuation between the sub-fund's assets and the reference fund.

A provision for these fees is made at each net asset value calculation and paid annually at the close of the financial year.

The provision is written back each time the difference between the two asset values decreases. In the event of underperformance (the sub-fund's assets are less than the reference fund's assets), the provision is written down to zero, excluding any accrued variable management fees.

At the end of the financial year, the provision for performance fees is paid to the Management Company, together with the proportion of fees derived from share redemptions during the financial year.

Securities lending or borrowing is charged on a pro rata temporis basis according to a fixed or variable rate depending on market conditions.

Research-related expenses within the meaning of Article 314-21 of the AMF's General Regulation can be charged to the sub-fund.

Appropriation of distributable amounts

Definition of distributable amounts

Distributable amounts consist of the following:

Income:

The net income for the period is equal to the amount of interest, arrears, premiums and prizes, dividends, attendance fees, and any other income related to the securities comprising the portfolio, plus the income from any amounts temporarily available and minus management fees and borrowing costs.

The net income is increased by retained earnings and increased or reduced by the balance of the income equalisation account.

Capital gains and losses:

Capital gains, net of charges, minus capital losses, net of charges, recorded during the period, plus net capital gains of the same type recorded during earlier periods that have not been paid out or accumulated and minus or plus the balance of the capital gains equalisation account.

Methods for appropriating distributable amounts:

NOTES TO THE ANNUAL FINANCIAL STATEMENTS

1. Accounting rules and methods

The annual financial statements are presented in the form prescribed by ANC regulation 2014-01, as amended.

The general principles of accounting apply:

- true and fair view, comparability, going concern,
- accuracy, reliability,
- prudence,
- consistency of accounting methods from one period to the next.

Revenues from fixed income securities are recognised on the basis of interest actually received.

Acquisitions and disposals of securities are recorded excluding charges.

The reference currency for the portfolio's accounting is the euro.

The duration of the accounting period is 12 months.

Asset valuation rules

Financial instruments are recognised according to the historical cost method and included on the balance sheet at their current value, which is determined by the last-known market value or, if no market exists, by all external means or through the use of financial models.

Differences between the current values used during the calculation of the net asset value and the historical costs of the securities upon their entry into the portfolio are recorded in "valuation differentials" accounts. Values that are not in the portfolio's currency are measured in accordance with the principle set forth below then converted into the portfolio's currency according to the currency rates in effect on the day of the

Deposits:

assessment.

Deposits with a remaining life of 3 months or less are valued according to the straight-line method.

Equities, bonds and other securities traded on a regulated or similar market:

For the calculation of the net asset value, equities and other securities traded on a regulated or similar market are valued on the basis of the day's last market price.

Bonds and similar securities are valued at the closing price relayed by various providers of financial services. Interest accrued on bonds and equivalent securities is calculated until the net asset value trading date.

Equities, bonds and other securities not traded on a regulated or similar market:

Securities not traded on a regulated market are valued under the responsibility of the Board of Directors using methods based on the asset value and the yield, taking into consideration the prices used in recent significant transactions.

Negotiable debt securities:

Negotiable debt securities and similar securities that are not the subject of significant transactions are valued on an actuarial basis based on a reference rate defined below, plus, where applicable, a differential representative of the issuer's intrinsic characteristics.

- Negotiable debt securities with a maturity of 1 year or less: Euro interbank offered rate (Euribor);
- Negotiable debt securities with a maturity of more than 1 year: rate of normalised annual interest treasury bonds (BTAN) or fungible treasury bonds (OAT) with similar maturity for the longest maturities.

Negotiable debt securities with a remaining life of 3 months or less may be valued according to the straight-line method.

Treasury bills are valued at the market rate reported daily by Banque de France or treasury bill specialists.

UCIs held:

Units or shares of UCIs will be valued at the last known net asset value.

Securities financing transactions:

Securities received under repurchase agreements are recorded in assets in "receivables representing securities received under repurchase agreements" for the amount provided for in the contract plus accrued interest receivable.

Securities delivered under repurchase agreements are recorded in the long portfolio for their current value. Debt representing securities delivered under repurchase agreements is recorded in the short portfolio at the value set in the contract plus accrued interest payable.

Loaned securities are valued at their current value and are recorded in assets in "receivables representing loaned securities" at the current value plus accrued interest receivable.

Borrowed securities are recorded in assets in "borrowed securities" for the amount specified in the contract and in liabilities in "debts representing borrowed securities" for the amount specified in the contract plus accrued interest payable.

Forward financial instruments:

Forward financial instruments traded on a regulated or similar market:

Forward financial instruments traded on regulated markets are valued at the day's settlement price.

Forward financial instruments not traded on a regulated or similar market:

Swaps:

Interest rate and/or currency swaps are valued at their market value based on the price calculated by discounting future interest flows at the market interest and/or currency rates. This price is corrected for the risk of non-repayment.

Index swaps are valued on an actuarial basis based on a reference rate provided by the counterparty.

Other swaps are valued at their market value or at a value estimated according to the methods established by the Board of Directors.

Off-balance sheet commitments:

Forward contracts appear in off-balance sheet commitments for their market value at the price used in the portfolio.

Options are converted into the underlying equivalent.

Commitments on swaps are presented at their nominal value or, in the absence of a nominal value, for an equivalent amount.

Management fees

Management fees and running costs cover all costs related to the UCI: financial, administrative and accounting management, custodianship, distribution, audit fees, etc.

These fees are charged to the income statement of the UCI.

Management fees do not include transaction costs. Further details on the fees actually invoiced to the UCI can be obtained from the prospectus.

The fees are recorded prorata temporis each time the net asset value is calculated.

The total of these fees is within the maximum net asset fee rate, excluding UCIs, specified in the prospectus or fund regulations:

FR0007001581 - Share class R-CO THEMATIC GOLD MINING C EUR: Maximum rate of 2.39% incl. taxes Performance fee 20% of the outperformance relative to the change in the benchmark index, over the course of a financial year, provided that the absolute net asset value is higher than the net asset value at the end of the financial year. A provision is made for management fees each time the net asset value is calculated. In the event of underperformance, a provision write-back is carried out within the limit of the account balance. This provision for variable management fees is deducted by the management company at the end of each financial year.

Appropriation of distributable amounts

Definition of distributable amounts

Distributable amounts consist of the following:

Income:

The net income for the period is equal to the amount of interest, arrears, premiums and prizes, dividends, attendance fees, and any other income related to the securities comprising the portfolio, plus the income from any amounts temporarily available and minus management fees and borrowing costs.

The net income is increased by retained earnings and increased or reduced by the balance of the income equalisation account.

Capital gains and losses:

Capital gains, net of charges, minus capital losses, net of charges, recorded during the period, plus net capital gains of the same type recorded during earlier periods that have not been paid out or accumulated and minus or plus the balance of the capital gains equalisation account.

Methods for appropriating distributable amounts:

Share class(es)	Appropriation of net income	Appropriation of realised net capital gains or losses
Share class R-CO THEMATIC GOLD MINING C EUR	Accumulation	Accumulation

NOTES TO THE ANNUAL FINANCIAL STATEMENTS

1. Accounting rules and methods

The annual financial statements are presented in the form prescribed by ANC regulation 2014-01, as amended.

The general principles of accounting apply:

- true and fair view, comparability, going concern,
- accuracy, reliability,
- prudence,
- consistency of accounting methods from one period to the next.

Revenues from fixed income securities are recognised on the basis of interest actually received.

Acquisitions and disposals of securities are recorded excluding charges.

The reference currency for the portfolio's accounting is the euro.

The duration of the accounting period is 12 months.

Asset valuation rules

Financial instruments are recognised according to the historical cost method and included on the balance sheet at their current value, which is determined by the last-known market value or, if no market exists, by all external means or through the use of financial models.

Differences between the current values used during the calculation of the net asset value and the historical costs of the securities upon their entry into the portfolio are recorded in "valuation differentials" accounts. Values that are not in the portfolio's currency are measured in accordance with the principle set forth below then converted into the portfolio's currency according to the currency rates in effect on the day of the

Deposits:

assessment.

Deposits with a remaining life of 3 months or less are valued according to the straight-line method.

Equities, bonds and other securities traded on a regulated or similar market:

For the calculation of the net asset value, equities and other securities traded on a regulated or similar market are valued on the basis of the day's last market price.

Bonds and similar securities are valued at the closing price relayed by various providers of financial services. Interest accrued on bonds and equivalent securities is calculated until the net asset value trading date.

Equities, bonds and other securities not traded on a regulated or similar market:

Securities not traded on a regulated market are valued under the responsibility of the Board of Directors using methods based on the asset value and the yield, taking into consideration the prices used in recent significant transactions.

Negotiable debt securities:

Negotiable debt securities and similar securities that are not the subject of significant transactions are valued on an actuarial basis based on a reference rate defined below, plus, where applicable, a differential representative of the issuer's intrinsic characteristics.

- Negotiable debt securities with a maturity of 1 year or less: Euro interbank offered rate (Euribor);
- Negotiable debt securities with a maturity of more than 1 year: rate of normalised annual interest treasury bonds (BTAN) or fungible treasury bonds (OAT) with similar maturity for the longest maturities.

Negotiable debt securities with a remaining life of 3 months or less may be valued according to the straight-line method.

Treasury bills are valued at the market rate reported daily by Banque de France or treasury bill specialists.

UCIs held:

Units or shares of UCIs will be valued at the last known net asset value.

Securities financing transactions:

Securities received under repurchase agreements are recorded in assets in "receivables representing securities received under repurchase agreements" for the amount provided for in the contract plus accrued interest receivable.

Securities delivered under repurchase agreements are recorded in the long portfolio for their current value. Debt representing securities delivered under repurchase agreements is recorded in the short portfolio at the value set in the contract plus accrued interest payable.

Loaned securities are valued at their current value and are recorded in assets in "receivables representing loaned securities" at the current value plus accrued interest receivable.

Borrowed securities are recorded in assets in "borrowed securities" for the amount specified in the contract and in liabilities in "debts representing borrowed securities" for the amount specified in the contract plus accrued interest payable.

Forward financial instruments:

Forward financial instruments traded on a regulated or similar market:

Forward financial instruments traded on regulated markets are valued at the day's settlement price.

Forward financial instruments not traded on a regulated or similar market:

Swaps:

Interest rate and/or currency swaps are valued at their market value based on the price calculated by discounting future interest flows at the market interest and/or currency rates. This price is corrected for the risk of non-repayment.

Index swaps are valued on an actuarial basis based on a reference rate provided by the counterparty.

Other swaps are valued at their market value or at a value estimated according to the methods established by the Board of Directors.

Off-balance sheet commitments:

Forward contracts appear in off-balance sheet commitments for their market value at the price used in the portfolio.

Options are converted into the underlying equivalent.

Commitments on swaps are presented at their nominal value or, in the absence of a nominal value, for an equivalent amount.

Management fees

Management fees and running costs cover all costs related to the UCI: financial, administrative and accounting management, custodianship, distribution, audit fees, etc.

These fees are charged to the income statement of the UCI.

Management fees do not include transaction costs. Further details on the fees actually invoiced to the UCI can be obtained from the prospectus.

The fees are recorded prorata temporis each time the net asset value is calculated.

The total of these fees is within the maximum net asset fee rate specified in the prospectus or fund regulations: FR0013387370 - Share class R-CO THEMATIC SILVER PLUS CL USD H: Maximum rate of 1.25% incl. taxes FR0010909531 - Share class R-CO THEMATIC SILVER PLUS C: Maximum rate of 1.50% incl. taxes FR0010906305 - Share class R-CO THEMATIC SILVER PLUS I: Maximum rate of 0.75% incl. taxes

FR0013293933 - Share class R-CO THEMATIC SILVER PLUS CLCL: Maximum rate of 1.25% incl. taxes Management fees paid to third parties (trailer fees) due are taken into account at each net asset value calculation. The amount is equal to the share of trailer fees payable over the period in question.

Appropriation of distributable amounts

Definition of distributable amounts

Distributable amounts consist of the following:

Income:

The net income for the period is equal to the amount of interest, arrears, premiums and prizes, dividends, attendance fees, and any other income related to the securities comprising the portfolio, plus the income from any amounts temporarily available and minus management fees and borrowing costs.

The net income is increased by retained earnings and increased or reduced by the balance of the income equalisation account.

Capital gains and losses:

Capital gains, net of charges, minus capital losses, net of charges, recorded during the period, plus net capital gains of the same type recorded during earlier periods that have not been paid out or accumulated and minus or plus the balance of the capital gains equalisation account.

Methods for appropriating distributable amounts:

Share class(es)	Appropriation of net income	Appropriation of realised net capital gains or losses
Share class R-CO THEMATIC SILVER PLUS C	Accumulation	Accumulation
Share class R-CO THEMATIC SILVER PLUS CLCL	Accumulation	Accumulation

NOTES TO THE ANNUAL FINANCIAL STATEMENTS

1. Accounting rules and methods

The annual financial statements are presented in the form prescribed by ANC regulation 2014-01, as amended.

The general principles of accounting apply:

- true and fair view, comparability, going concern,
- accuracy, reliability,
- prudence,
- consistency of accounting methods from one period to the next.

Revenues from fixed income securities are recognised on the basis of interest actually received.

Acquisitions and disposals of securities are recorded excluding charges.

The reference currency for the portfolio's accounting is the euro.

The duration of the accounting period is 12 months.

Asset valuation rules

Financial instruments are recognised according to the historical cost method and included on the balance sheet at their current value, which is determined by the last-known market value or, if no market exists, by all external means or through the use of financial models.

Differences between the current values used during the calculation of the net asset value and the historical costs of the securities upon their entry into the portfolio are recorded in "valuation differentials" accounts. Values that are not in the portfolio's currency are measured in accordance with the principle set forth below then converted into the portfolio's currency according to the currency rates in effect on the day of the assessment.

Deposits:

Deposits with a remaining life of 3 months or less are valued according to the straight-line method.

Equities, bonds and other securities traded on a regulated or similar market:

For the calculation of the net asset value, equities and other securities traded on a regulated or similar market are valued on the basis of the day's last market price.

Bonds and similar securities are valued at the closing price relayed by various providers of financial services. Interest accrued on bonds and equivalent securities is calculated until the net asset value trading date.

Equities, bonds and other securities not traded on a regulated or similar market:

Securities not traded on a regulated market are valued under the responsibility of the Board of Directors using methods based on the asset value and the yield, taking into consideration the prices used in recent significant transactions.

Negotiable debt securities:

Negotiable debt securities and similar securities that are not the subject of significant transactions are valued on an actuarial basis based on a reference rate defined below, plus, where applicable, a differential representative of the issuer's intrinsic characteristics.

- Negotiable debt securities with a maturity of 1 year or less: Euro interbank offered rate (Euribor);
- Negotiable debt securities with a maturity of more than 1 year: rate of normalised annual interest treasury bonds (BTAN) or fungible treasury bonds (OAT) with similar maturity for the longest maturities.

Negotiable debt securities with a remaining life of 3 months or less may be valued according to the straight-line method.

Treasury bills are valued at the market rate reported daily by Banque de France or treasury bill specialists.

UCIs held:

Units or shares of UCIs will be valued at the last known net asset value.

Securities financing transactions:

Securities received under repurchase agreements are recorded in assets in "receivables representing securities received under repurchase agreements" for the amount provided for in the contract plus accrued interest receivable.

Securities delivered under repurchase agreements are recorded in the long portfolio for their current value. Debt representing securities delivered under repurchase agreements is recorded in the short portfolio at the value set in the contract plus accrued interest payable.

Loaned securities are valued at their current value and are recorded in assets in "receivables representing loaned securities" at the current value plus accrued interest receivable.

Borrowed securities are recorded in assets in "borrowed securities" for the amount specified in the contract and in liabilities in "debts representing borrowed securities" for the amount specified in the contract plus accrued interest payable.

Forward financial instruments:

Forward financial instruments traded on a regulated or similar market:

Forward financial instruments traded on regulated markets are valued at the day's settlement price.

Forward financial instruments not traded on a regulated or similar market:

Swaps:

Interest rate and/or currency swaps are valued at their market value based on the price calculated by discounting future interest flows at the market interest and/or currency rates. This price is corrected for the risk of non-repayment.

Index swaps are valued on an actuarial basis based on a reference rate provided by the counterparty.

Other swaps are valued at their market value or at a value estimated according to the methods established by the Board of Directors.

The inflation swaps in the portfolio are valued based on prices calculated by the counterparty and then approved by the management company using mathematical financial models.

Off-balance sheet commitments:

Forward contracts appear in off-balance sheet commitments for their market value at the price used in the portfolio.

Options are converted into the underlying equivalent.

Commitments on swaps are presented at their nominal value or, in the absence of a nominal value, for an equivalent amount.

Management fees

Management fees and running costs cover all costs related to the UCI: financial, administrative and accounting management, custodianship, distribution, audit fees, etc.

These fees are charged to the income statement of the UCI.

Management fees do not include transaction costs. Further details on the fees actually invoiced to the UCI can be obtained from the prospectus.

The fees are recorded prorata temporis each time the net asset value is calculated.

The total of these fees is within the maximum net asset fee rate specified in the prospectus or fund regulations:

FR0013417532 - Share class R-CO VALOR BOND OPPORTUNITIES I EUR: Maximum rate of 0.45% incl. taxes FR0013417524 - Share class R-CO VALOR BOND OPPORTUNITIES C EUR: Maximum rate of 0.90% incl. taxes FR0014009K66 - Share class R-CO VALOR BOND OPPORTUNITIES P CHF H: Maximum rate of 0.60% incl. taxes FR0014009K58 - Share class R-CO VALOR BOND OPPORTUNITIES C CHF H: Maximum rate of 0.90% incl. taxes

Swing pricing

Net asset value adjustment method associated with swing pricing with a trigger threshold:

If, on a NAV calculation day, the total of net subscription/redemption orders from investors across all share classes of the sub-fund exceeds a threshold pre-established by the Management Company and determined on the basis of objective criteria as a percentage of the sub-fund's net assets, the NAV can be adjusted upwards or downwards in order to take into account the adjustment costs attributable to the net subscription/redemption orders respectively. The NAV of each share class is calculated separately, but any adjustment has, in percentage terms, an identical impact across all NAVs of the sub-fund's share classes.

The cost and trigger threshold parameters are determined by the Management Company and reviewed periodically, at least every six months. These costs are estimated by the management company on the basis of transaction costs, buy/sell spreads, as well as any taxes applicable to the sub-fund.

Given that this adjustment is related to the net balance of subscriptions/redemptions within the sub-fund, it is not possible to accurately predict whether swing pricing will be applied at a given time in the future. Therefore, it is not possible to accurately predict the frequency at which the Management Company will need to make such adjustments, which may not exceed 1.50% of the NAV.

Investors are informed that the volatility of the sub-fund's NAV may not reflect only that of the securities held in the portfolio because of the application of swing pricing.

Performance fee:

The method of calculating the performance fee will be as follows:

The performance fee is calculated over a maximum of three years by comparing the change in the sub-fund's assets (coupon reinvested and excluding variable management fees) with the assets of a reference fund.

- The starting value of the reference fund is the sub-fund's assets (i) at the close of the previous financial year if performance fees were deducted at that date or, failing that, (ii) at the close of the most recent financial year in which performance fees were charged during the last three financial years if performance fees were charged in one of these financial years or, failing that, (iii) at the close of the previous financial year if no performance fees were charged in the last two financial years or, failing that, (iv) on the date the sub-fund was established.
- The reference fund's value rises and falls in line with the daily performance of the benchmark, with the same inflows and outflows of funds from subscriptions and redemptions as the sub-fund.

If, at the close of the financial year, the sub-fund's assets (excluding variable management fees) are greater than the assets of the reference fund based on the starting value described above, a performance fee is charged that is equal to 15% (including taxes) of the difference in valuation between the sub-fund's assets and the reference fund.

A provision for these fees is made at each net asset value calculation and paid annually at the close of the financial year.

The provision is written back each time the difference between the two asset values decreases. In the event of underperformance (the sub-fund's assets are less than the reference fund's assets), the provision is written down to zero, excluding any accrued variable management fees.

At the end of the financial year, the provision for performance fees is paid to the Management Company, together with the proportion of fees derived from share redemptions during the financial year.

In addition, the Management Company does not receive any soft commission.

Research-related expenses within the meaning of Article 314-21 of the AMF's General Regulation can be charged to the sub-fund.

For any additional information, please refer to the SICAV's annual report.

Appropriation of distributable amounts

Definition of distributable amounts

Distributable amounts consist of the following:

Income:

The net income for the period is equal to the amount of interest, arrears, premiums and prizes, dividends, attendance fees, and any other income related to the securities comprising the portfolio, plus the income from any amounts temporarily available and minus management fees and borrowing costs.

The net income is increased by retained earnings and increased or reduced by the balance of the income equalisation account.

Capital gains and losses:

Capital gains, net of charges, minus capital losses, net of charges, recorded during the period, plus net capital gains of the same type recorded during earlier periods that have not been paid out or accumulated and minus or plus the balance of the capital gains equalisation account.

Methods for appropriating distributable amounts:

Share class(es)	Appropriation of net income	Appropriation of realised net capital gains or losses
Share class R-CO VALOR BOND OPPORTUNITIES C CHF H	Accumulation	Accumulation
Share class R-CO VALOR BOND OPPORTUNITIES C EUR	Accumulation	Accumulation
Share class R-CO VALOR BOND OPPORTUNITIES I EUR	Accumulation	Accumulation

NOTES TO THE ANNUAL FINANCIAL STATEMENTS

1. Accounting rules and methods

The annual financial statements are presented in the form prescribed by ANC regulation 2014-01, as amended.

The general principles of accounting apply:

- true and fair view, comparability, going concern,
- accuracy, reliability,
- prudence,
- consistency of accounting methods from one period to the next.

Revenues from fixed income securities are recognised on the basis of interest actually received.

Acquisitions and disposals of securities are recorded excluding charges.

The reference currency for the portfolio's accounting is the euro.

The duration of the accounting period is 12 months.

Asset valuation rules

Financial instruments are recognised according to the historical cost method and included on the balance sheet at their current value, which is determined by the last-known market value or, if no market exists, by all external means or through the use of financial models.

Differences between the current values used during the calculation of the net asset value and the historical costs of the securities upon their entry into the portfolio are recorded in "valuation differentials" accounts. Values that are not in the portfolio's currency are measured in accordance with the principle set forth below then converted into the portfolio's currency according to the currency rates in effect on the day of the assessment.

Deposits:

Deposits with a remaining life of 3 months or less are valued according to the straight-line method.

Equities, bonds and other securities traded on a regulated or similar market:

For the calculation of the net asset value, equities and other securities traded on a regulated or similar market are valued on the basis of the day's last market price.

Bonds and similar securities are valued at the closing price relayed by various providers of financial services. Interest accrued on bonds and equivalent securities is calculated until the net asset value trading date.

Equities, bonds and other securities not traded on a regulated or similar market:

Securities not traded on a regulated market are valued under the responsibility of the Board of Directors using methods based on the asset value and the yield, taking into consideration the prices used in recent significant transactions.

Negotiable debt securities:

Negotiable debt securities and similar securities that are not the subject of significant transactions are valued on an actuarial basis based on a reference rate defined below, plus, where applicable, a differential representative of the issuer's intrinsic characteristics.

- Negotiable debt securities with a maturity of 1 year or less: Euro interbank offered rate (Euribor);
- Negotiable debt securities with a maturity of more than 1 year: rate of normalised annual interest treasury bonds (BTAN) or fungible treasury bonds (OAT) with similar maturity for the longest maturities.

Negotiable debt securities with a remaining life of 3 months or less may be valued according to the straight-line method.

Treasury bills are valued at the market rate reported daily by Banque de France or treasury bill specialists.

UCIs held:

Units or shares of UCIs will be valued at the last known net asset value.

Securities financing transactions:

Securities received under repurchase agreements are recorded in assets in "receivables representing securities received under repurchase agreements" for the amount provided for in the contract plus accrued interest receivable.

Securities delivered under repurchase agreements are recorded in the long portfolio for their current value. Debt representing securities delivered under repurchase agreements is recorded in the short portfolio at the value set in the contract plus accrued interest payable.

Loaned securities are valued at their current value and are recorded in assets in "receivables representing loaned securities" at the current value plus accrued interest receivable.

Borrowed securities are recorded in assets in "borrowed securities" for the amount specified in the contract and in liabilities in "debts representing borrowed securities" for the amount specified in the contract plus accrued interest payable.

Forward financial instruments:

Forward financial instruments traded on a regulated or similar market:

Forward financial instruments traded on regulated markets are valued at the day's settlement price.

Forward financial instruments not traded on a regulated or similar market:

Swaps:

Interest rate and/or currency swaps are valued at their market value based on the price calculated by discounting future interest flows at the market interest and/or currency rates. This price is corrected for the risk of non-repayment.

Index swaps are valued on an actuarial basis based on a reference rate provided by the counterparty.

Other swaps are valued at their market value or at a value estimated according to the methods established by the Board of Directors.

Off-balance sheet commitments:

Forward contracts appear in off-balance sheet commitments for their market value at the price used in the portfolio.

Options are converted into the underlying equivalent.

Commitments on swaps are presented at their nominal value or, in the absence of a nominal value, for an equivalent amount.

Management fees

Management fees and running costs cover all costs related to the UCI: financial, administrative and accounting management, custodianship, distribution, audit fees, etc.

These fees are charged to the income statement of the UCI.

Management fees do not include transaction costs. Further details on the fees actually invoiced to the UCI can be obtained from the prospectus.

The fees are recorded prorata temporis each time the net asset value is calculated.

The total of these fees is within the maximum net asset fee rate specified in the prospectus or fund regulations: FR0013294063 - Share class R-CO CONVICTION CREDIT EURO MF EUR: Maximum rate of 0.45% incl. taxes

Swing pricing

If, on a NAV calculation day, the total of net subscription/redemption orders from investors across all share classes of the sub-fund exceeds a threshold pre-established by the Management Company and determined on the basis of objective criteria as a percentage of the sub-fund's net assets, the NAV can be adjusted upwards or downwards in order to take into account the adjustment costs attributable to the net subscription/redemption orders respectively. The NAV of each share class is calculated separately, but any adjustment has, in percentage terms, an identical impact across all NAVs of the sub-fund's share classes.

The cost and trigger threshold parameters are determined by the Management Company and reviewed periodically, at least every six months. These costs are estimated by the management company on the basis of transaction costs, buy/sell spreads, as well as any taxes applicable to the sub-fund.

Given that this adjustment is related to the net balance of subscriptions/redemptions within the sub-fund, it is not possible to accurately predict whether swing pricing will be applied at a given time in the future. Therefore, it is not possible to accurately predict the frequency at which the Management Company will need to make such adjustments, which may not exceed 1.50% of the NAV. Investors should note that, due to the application of swing pricing, the volatility of the sub-fund's NAV may not reflect solely that of the securities held in the portfolio.

Appropriation of distributable amounts

Definition of distributable amounts

Distributable amounts consist of the following:

Income:

The net income for the period is equal to the amount of interest, arrears, premiums and prizes, dividends, attendance fees, and any other income related to the securities comprising the portfolio, plus the income from any amounts temporarily available and minus management fees and borrowing costs.

The net income is increased by retained earnings and increased or reduced by the balance of the income equalisation account.

Capital gains and losses:

Capital gains, net of charges, minus capital losses, net of charges, recorded during the period, plus net capital gains of the same type recorded during earlier periods that have not been paid out or accumulated and minus or plus the balance of the capital gains equalisation account.

Methods for appropriating distributable amounts:

Share class(es)	Appropriation of net income	Appropriation of realised net capital gains or losses
Share class R-CO CONVICTION CREDIT EURO C CHF H	Accumulation	Accumulation
Share class R-CO CONVICTION CREDIT EURO C EUR	Accumulation	Accumulation

Share class R-CO CONVICTION CREDIT EURO C USD H	Accumulation	Accumulation
Share class R-CO CONVICTION CREDIT EURO D EUR	Paid out	Distribution (full or partial) on an annual basis and at the SICAV management's discretion.

NOTES TO THE ANNUAL FINANCIAL STATEMENTS

1. Accounting rules and methods

The annual financial statements are presented in the form prescribed by ANC regulation 2014-01, as amended.

The general principles of accounting apply:

- true and fair view, comparability, going concern,
- accuracy, reliability,
- prudence,
- consistency of accounting methods from one period to the next.

Revenues from fixed income securities are recognised on the basis of interest actually received.

Acquisitions and disposals of securities are recorded excluding charges.

The reference currency for the portfolio's accounting is the euro.

The duration of the accounting period is 12 months.

Asset valuation rules

Financial instruments are recognised according to the historical cost method and included on the balance sheet at their current value, which is determined by the last-known market value or, if no market exists, by all external means or through the use of financial models.

Differences between the current values used during the calculation of the net asset value and the historical costs of the securities upon their entry into the portfolio are recorded in "valuation differentials" accounts. Values that are not in the portfolio's currency are measured in accordance with the principle set forth below then converted into the portfolio's currency according to the currency rates in effect on the day of the

Deposits:

assessment.

Deposits with a remaining life of 3 months or less are valued according to the straight-line method.

Equities, bonds and other securities traded on a regulated or similar market:

For the calculation of the net asset value, equities and other securities traded on a regulated or similar market are valued on the basis of the day's last market price.

Bonds and similar securities are valued at the closing price relayed by various providers of financial services. Interest accrued on bonds and equivalent securities is calculated until the net asset value trading date.

Equities, bonds and other securities not traded on a regulated or similar market:

Securities not traded on a regulated market are valued under the responsibility of the Board of Directors using methods based on the asset value and the yield, taking into consideration the prices used in recent significant transactions.

Negotiable debt securities:

Negotiable debt securities and similar securities that are not the subject of significant transactions are valued on an actuarial basis based on a reference rate defined below, plus, where applicable, a differential representative of the issuer's intrinsic characteristics.

- Negotiable debt securities with a maturity of 1 year or less: Euro interbank offered rate (Euribor);
- Negotiable debt securities with a maturity of more than 1 year: rate of normalised annual interest treasury bonds (BTAN) or fungible treasury bonds (OAT) with similar maturity for the longest maturities.

Negotiable debt securities with a remaining life of 3 months or less may be valued according to the straight-line method.

Treasury bills are valued at the market rate reported daily by Banque de France or treasury bill specialists.

UCIs held:

Units or shares of UCIs will be valued at the last known net asset value.

Securities financing transactions:

Securities received under repurchase agreements are recorded in assets in "receivables representing securities received under repurchase agreements" for the amount provided for in the contract plus accrued interest receivable.

Securities delivered under repurchase agreements are recorded in the long portfolio for their current value. Debt representing securities delivered under repurchase agreements is recorded in the short portfolio at the value set in the contract plus accrued interest payable.

Loaned securities are valued at their current value and are recorded in assets in "receivables representing loaned securities" at the current value plus accrued interest receivable.

Borrowed securities are recorded in assets in "borrowed securities" for the amount specified in the contract and in liabilities in "debts representing borrowed securities" for the amount specified in the contract plus accrued interest payable.

Forward financial instruments:

Forward financial instruments traded on a regulated or similar market:

Forward financial instruments traded on regulated markets are valued at the day's settlement price.

Forward financial instruments not traded on a regulated or similar market:

Swaps:

Interest rate and/or currency swaps are valued at their market value based on the price calculated by discounting future interest flows at the market interest and/or currency rates. This price is corrected for the risk of non-repayment.

Index swaps are valued on an actuarial basis based on a reference rate provided by the counterparty.

Other swaps are valued at their market value or at a value estimated according to the methods established by the Board of Directors.

Off-balance sheet commitments:

Forward contracts appear in off-balance sheet commitments for their market value at the price used in the portfolio.

Options are converted into the underlying equivalent.

Commitments on swaps are presented at their nominal value or, in the absence of a nominal value, for an equivalent amount.

Management fees

Management fees and running costs cover all costs related to the UCI: financial, administrative and accounting management, custodianship, distribution, audit fees, etc.

These fees are charged to the income statement of the UCI.

Management fees do not include transaction costs. Further details on the fees actually invoiced to the UCI can be obtained from the prospectus.

The fees are recorded prorata temporis each time the net asset value is calculated.

The total of these fees is within the maximum net asset fee rate specified in the prospectus or fund regulations: FR0014006PL6 - Share class R-CO CONVICTION CREDIT SD EURO D EUR: Maximum rate of 0.60% incl. taxes

FR0011208073 - Share class R-CO CONVICTION CREDIT SD EURO I EUR: Maximum rate of 0.30% incl. taxes

FR0014006PM4 - Share class R-CO CONVICTION CREDIT SD EURO C EUR: Maximum rate of 0.60% incl. taxes

Swing pricing

If, on a NAV calculation day, the total of net subscription/redemption orders from investors across all share classes of the sub-fund exceeds a threshold pre-established by the Management Company and determined on the basis of objective criteria as a percentage of the sub-fund's net assets, the NAV can be adjusted upwards or downwards in order to take into account the adjustment costs attributable to the net subscription/redemption orders respectively. The NAV of each share class is calculated separately, but any adjustment has, in percentage terms, an identical impact across all NAVs of the sub-fund's share classes.

The cost and trigger threshold parameters are determined by the Management Company and reviewed periodically, at least every six months. These costs are estimated by the management company on the basis of transaction costs, buy/sell spreads, as well as any taxes applicable to the sub-fund.

Given that this adjustment is related to the net balance of subscriptions/redemptions within the sub-fund, it is not possible to accurately predict whether swing pricing will be applied at a given time in the future. Therefore, it is not possible to accurately predict the frequency at which the Management Company will need to make such adjustments, which may not exceed 1.50% of the NAV. Investors should note that, due to the application of swing pricing, the volatility of the sub-fund's NAV may not reflect solely that of the securities held in the portfolio.

Appropriation of distributable amounts

Definition of distributable amounts

Distributable amounts consist of the following:

Income:

The net income for the period is equal to the amount of interest, arrears, premiums and prizes, dividends, attendance fees, and any other income related to the securities comprising the portfolio, plus the income from any amounts temporarily available and minus management fees and borrowing costs.

The net income is increased by retained earnings and increased or reduced by the balance of the income equalisation account.

Capital gains and losses:

Capital gains, net of charges, minus capital losses, net of charges, recorded during the period, plus net capital gains of the same type recorded during earlier periods that have not been paid out or accumulated and minus or plus the balance of the capital gains equalisation account.

Methods for appropriating distributable amounts:

Share class(es)	Appropriation of net income	Appropriation of realised net capital gains or losses
Share class R-CO CONVICTION CREDIT SD EURO C EUR	Accumulation	Accumulation
Share class R-CO CONVICTION CREDIT SD EURO D EUR	Paid out	Accumulated and/or distributed and/or carried forward by decision of the SICAV management
Share class R-CO CONVICTION CREDIT SD EURO ID EUR	Paid out	Accumulated and/or distributed and/or carried forward by decision of the SICAV management
Share class R-CO CONVICTION CREDIT SD EURO I EUR	Accumulation	Accumulation

NOTES TO THE ANNUAL FINANCIAL STATEMENTS

1. Accounting rules and methods

The annual financial statements are presented in the form prescribed by ANC regulation 2014-01, as amended.

The general principles of accounting apply:

- true and fair view, comparability, going concern,
- accuracy, reliability,
- prudence,
- consistency of accounting methods from one period to the next.

Revenues from fixed-income securities are recognised on the basis of accrued interest.

Acquisitions and disposals of securities are recorded excluding charges.

The reference currency for the portfolio's accounting is the euro.

The duration of the accounting period is 12 months.

Asset valuation rules

Financial instruments are recognised according to the historical cost method and included on the balance sheet at their current value, which is determined by the last-known market value or, if no market exists, by all external means or through the use of financial models.

Differences between the current values used during the calculation of the net asset value and the historical costs of the securities upon their entry into the portfolio are recorded in "valuation differentials" accounts. Values that are not in the portfolio's currency are measured in accordance with the principle set forth below then converted into the portfolio's currency according to the currency rates in effect on the day of the assessment.

Deposits:

Deposits with a remaining life of 3 months or less are valued according to the straight-line method.

Equities, bonds and other securities traded on a regulated or similar market:

For the calculation of the net asset value, equities and other securities traded on a regulated or similar market are valued on the basis of the day's last market price.

Bonds and similar securities are valued at the closing price relayed by various providers of financial services. Interest accrued on bonds and equivalent securities is calculated until the net asset value trading date.

Equities, bonds and other securities not traded on a regulated or similar market:

Securities not traded on a regulated market are valued under the responsibility of the Board of Directors using methods based on the asset value and the yield, taking into consideration the prices used in recent significant transactions.

Negotiable debt securities:

Negotiable debt securities and similar securities that are not the subject of significant transactions are valued on an actuarial basis based on a reference rate defined below, plus, where applicable, a differential representative of the issuer's intrinsic characteristics.

- Negotiable debt securities with a maturity of 1 year or less: Euro interbank offered rate (Euribor);
- Negotiable debt securities with a maturity of more than 1 year: rate of normalised annual interest treasury bonds (BTAN) or fungible treasury bonds (OAT) with similar maturity for the longest maturities.

Negotiable debt securities with a remaining life of 3 months or less may be valued according to the straight-line method.

Treasury bills are valued at the market rate reported daily by Banque de France or treasury bill specialists.

UCIs held:

Units or shares of UCIs will be valued at the last known net asset value.

Securities financing transactions:

Securities received under repurchase agreements are recorded in assets in "receivables representing securities received under repurchase agreements" for the amount provided for in the contract plus accrued interest receivable.

Securities delivered under repurchase agreements are recorded in the long portfolio for their current value. Debt representing securities delivered under repurchase agreements is recorded in the short portfolio at the value set in the contract plus accrued interest payable.

Loaned securities are valued at their current value and are recorded in assets in "receivables representing loaned securities" at the current value plus accrued interest receivable.

Borrowed securities are recorded in assets in "borrowed securities" for the amount specified in the contract and in liabilities in "debts representing borrowed securities" for the amount specified in the contract plus accrued interest payable.

Forward financial instruments:

Forward financial instruments traded on a regulated or similar market:

Forward financial instruments traded on regulated markets are valued at the day's settlement price.

Forward financial instruments not traded on a regulated or similar market:

Swaps:

Interest rate and/or currency swaps are valued at their market value based on the price calculated by discounting future interest flows at the market interest and/or currency rates. This price is corrected for the risk of non-repayment.

Index swaps are valued on an actuarial basis based on a reference rate provided by the counterparty.

Other swaps are valued at their market value or at a value estimated according to the methods established by the Board of Directors.

Off-balance sheet commitments:

Forward contracts appear in off-balance sheet commitments for their market value at the price used in the portfolio.

Options are converted into the underlying equivalent.

Commitments on swaps are presented at their nominal value or, in the absence of a nominal value, for an equivalent amount.

Management fees

Management fees and running costs cover all costs related to the UCI: financial, administrative and accounting management, custodianship, distribution, audit fees, etc.

These fees are charged to the income statement of the UCI.

Management fees do not include transaction costs. Further details on the fees actually invoiced to the UCI can be obtained from the prospectus.

The fees are recorded prorata temporis each time the net asset value is calculated.

The total of these fees is within the maximum net asset fee rate specified in the prospectus or fund regulations: FR0012243947 - Share class R-co 4CHANGE MODERATE ALLOCATION MF: Maximum rate of 0.55% incl. taxes

Appropriation of distributable amounts

Definition of distributable amounts

Distributable amounts consist of the following:

Income:

The net income for the period is equal to the amount of interest, arrears, premiums and prizes, dividends, attendance fees, and any other income related to the securities comprising the portfolio, plus the income from any amounts temporarily available and minus management fees and borrowing costs.

The net income is increased by retained earnings and increased or reduced by the balance of the income equalisation account.

Capital gains and losses:

Capital gains, net of charges, minus capital losses, net of charges, recorded during the period, plus net capital gains of the same type recorded during earlier periods that have not been paid out or accumulated and minus or plus the balance of the capital gains equalisation account.

Methods for appropriating distributable amounts:

Share class(es)	Appropriation of net income	Appropriation of realised net capital gains or losses
Share class R-CO 4CHANGE MODERATE ALLOCATION C EUR	Accumulation	Accumulation
Share class R-co 4CHANGE MODERATE ALLOCATION D EUR	Paid out	Accumulated and/or distributed and/or carried forward by decision of the SICAV management

NOTES TO THE ANNUAL FINANCIAL STATEMENTS

1. Accounting rules and methods

The annual financial statements are presented in the form prescribed by ANC regulation 2014-01, as amended.

The general principles of accounting apply:

- true and fair view, comparability, going concern,
- accuracy, reliability,
- prudence,
- consistency of accounting methods from one period to the next.

Revenues from fixed income securities are recognised on the basis of interest actually received.

Acquisitions and disposals of securities are recorded excluding charges.

The reference currency for the portfolio's accounting is the euro.

The duration of the accounting period is 12 months.

Asset valuation rules

Financial instruments are recognised according to the historical cost method and included on the balance sheet at their current value, which is determined by the last-known market value or, if no market exists, by all external means or through the use of financial models.

Differences between the current values used during the calculation of the net asset value and the historical costs of the securities upon their entry into the portfolio are recorded in "valuation differentials" accounts. Values that are not in the portfolio's currency are measured in accordance with the principle set forth below then converted into the portfolio's currency according to the currency rates in effect on the day of the assessment.

Deposits:

Deposits with a remaining life of 3 months or less are valued according to the straight-line method.

Equities, bonds and other securities traded on a regulated or similar market:

For the calculation of the net asset value, equities and other securities traded on a regulated or similar market are valued on the basis of the day's last market price.

Bonds and similar securities are valued at the closing price relayed by various providers of financial services. Interest accrued on bonds and equivalent securities is calculated until the net asset value trading date.

Equities, bonds and other securities not traded on a regulated or similar market:

Securities not traded on a regulated market are valued under the responsibility of the Board of Directors using methods based on the asset value and the yield, taking into consideration the prices used in recent significant transactions.

Negotiable debt securities:

Negotiable debt securities and similar securities that are not the subject of significant transactions are valued on an actuarial basis based on a reference rate defined below, plus, where applicable, a differential representative of the issuer's intrinsic characteristics.

- Negotiable debt securities with a maturity of 1 year or less: Euro interbank offered rate (Euribor);
- Negotiable debt securities with a maturity of more than 1 year: rate of normalised annual interest treasury bonds (BTAN) or fungible treasury bonds (OAT) with similar maturity for the longest maturities.

Negotiable debt securities with a remaining life of 3 months or less may be valued according to the straight-line method.

Treasury bills are valued at the market rate reported daily by Banque de France or treasury bill specialists.

UCIs held:

Units or shares of UCIs will be valued at the last known net asset value.

Securities financing transactions:

Securities received under repurchase agreements are recorded in assets in "receivables representing securities received under repurchase agreements" for the amount provided for in the contract plus accrued interest receivable.

Securities delivered under repurchase agreements are recorded in the long portfolio for their current value. Debt representing securities delivered under repurchase agreements is recorded in the short portfolio at the value set in the contract plus accrued interest payable.

Loaned securities are valued at their current value and are recorded in assets in "receivables representing loaned securities" at the current value plus accrued interest receivable.

Borrowed securities are recorded in assets in "borrowed securities" for the amount specified in the contract and in liabilities in "debts representing borrowed securities" for the amount specified in the contract plus accrued interest payable.

Forward financial instruments:

Forward financial instruments traded on a regulated or similar market:

Forward financial instruments traded on regulated markets are valued at the day's settlement price.

Forward financial instruments not traded on a regulated or similar market:

Swaps:

Interest rate and/or currency swaps are valued at their market value based on the price calculated by discounting future interest flows at the market interest and/or currency rates. This price is corrected for the risk of non-repayment.

Index swaps are valued on an actuarial basis based on a reference rate provided by the counterparty.

Other swaps are valued at their market value or at a value estimated according to the methods established by the Board of Directors.

Off-balance sheet commitments:

Forward contracts appear in off-balance sheet commitments for their market value at the price used in the portfolio.

Options are converted into the underlying equivalent.

Commitments on swaps are presented at their nominal value or, in the absence of a nominal value, for an equivalent amount.

Management fees

Management fees and running costs cover all costs related to the UCI: financial, administrative and accounting management, custodianship, distribution, audit fees, etc.

These fees are charged to the income statement of the UCI.

Management fees do not include transaction costs. Further details on the fees actually invoiced to the UCI can be obtained from the prospectus.

The fees are recorded prorata temporis each time the net asset value is calculated.

The total of these fees is within the maximum net asset fee rate specified in the prospectus or fund regulations:

FR0013293966 - Share class R-CO CONVICTION CLUB MF EUR: Maximum rate of 0.95% incl. taxes FR0013293958 - Share class R-CO CONVICTION CLUB CD EUR: Maximum rate of 1.25% incl. taxes

FR0010523191 - Share class R-CO CONVICTION CLUB D EUR: Maximum rate of 1.495% incl. taxes

FR0013293941 - Share class R-CO CONVICTION CLUB CL EUR: Maximum rate of 1.25% incl. taxes FR0013111739 - Share class R-CO CONVICTION CLUB R EUR: Maximum rate of 2.30% incl. taxes

FR0011845692 - Share class R-CO CONVICTION CLUB P EUR: Maximum rate of 0.95% incl. taxes

FR0010537423 - Share class R-CO CONVICTION CLUB F EUR: Maximum rate of 1.90% incl. taxes

FR0010541557 - Share class R-CO CONVICTION CLUB C EUR: Maximum rate of 1.495% incl. taxes Performance fee:

The variable management fees are provisioned by the Management Company at each net asset value calculation. In the event of underperformance, a provision write-back is carried out within the limit of the account balance. This provision for variable management fees is definitively payable to the Management Company at the end of each financial year if the performance of the fund is positive over this period. The first performance fee, if any, will be charged for the 2015 financial year.

For redemptions, a share of the provision for variable management fees on assets under management recognised on the date of the most recent valuation is definitively allocated to a specific third-party account in proportion to the number of shares redeemed. This share of variable management fees is payable to the Management Company at the time of the redemption.

Appropriation of distributable amounts

Definition of distributable amounts

Distributable amounts consist of the following:

Income:

The net income for the period is equal to the amount of interest, arrears, premiums and prizes, dividends, attendance fees, and any other income related to the securities comprising the portfolio, plus the income from any amounts temporarily available and minus management fees and borrowing costs.

The net income is increased by retained earnings and increased or reduced by the balance of the income equalisation account.

Capital gains and losses:

Capital gains, net of charges, minus capital losses, net of charges, recorded during the period, plus net capital gains of the same type recorded during earlier periods that have not been paid out or accumulated and minus or plus the balance of the capital gains equalisation account.

Methods for appropriating distributable amounts:

Share class(es)	Appropriation of net income	Appropriation of realised net capital gains or losses
Share class R-CO CONVICTION CLUB CD EUR	Paid out	Accumulated and/or distributed and/or carried forward by decision of the SICAV management
Share class R-CO CONVICTION CLUB C EUR	Accumulation	Accumulation
Share class R-CO CONVICTION CLUB CL EUR	Accumulation	Accumulation

NOTES TO THE ANNUAL FINANCIAL STATEMENTS

1. Accounting rules and methods

The annual financial statements are presented in the form prescribed by ANC regulation 2014-01, as amended.

The general principles of accounting apply:

- true and fair view, comparability, going concern,
- accuracy, reliability,
- prudence,
- consistency of accounting methods from one period to the next.

Revenues from fixed income securities are recognised on the basis of interest actually received.

Acquisitions and disposals of securities are recorded excluding charges.

The reference currency for the portfolio's accounting is the euro.

The duration of the accounting period is 12 months.

Asset valuation rules

Financial instruments are recognised according to the historical cost method and included on the balance sheet at their current value, which is determined by the last-known market value or, if no market exists, by all external means or through the use of financial models.

Differences between the current values used during the calculation of the net asset value and the historical costs of the securities upon their entry into the portfolio are recorded in "valuation differentials" accounts. Values that are not in the portfolio's currency are measured in accordance with the principle set forth below then converted into the portfolio's currency according to the currency rates in effect on the day of the assessment.

Deposits:

Deposits with a remaining life of 3 months or less are valued according to the straight-line method.

Equities, bonds and other securities traded on a regulated or similar market:

For the calculation of the net asset value, equities and other securities traded on a regulated or similar market are valued on the basis of the day's last market price.

Bonds and similar securities are valued at the closing price relayed by various providers of financial services. Interest accrued on bonds and equivalent securities is calculated until the net asset value trading date.

Equities, bonds and other securities not traded on a regulated or similar market:

Securities not traded on a regulated market are valued under the responsibility of the Board of Directors using methods based on the asset value and the yield, taking into consideration the prices used in recent significant transactions.

Negotiable debt securities:

Negotiable debt securities and similar securities that are not the subject of significant transactions are valued on an actuarial basis based on a reference rate defined below, plus, where applicable, a differential representative of the issuer's intrinsic characteristics.

- Negotiable debt securities with a maturity of 1 year or less: Euro interbank offered rate (Euribor);
- Negotiable debt securities with a maturity of more than 1 year: rate of normalised annual interest treasury bonds (BTAN) or fungible treasury bonds (OAT) with similar maturity for the longest maturities.

Negotiable debt securities with a remaining life of 3 months or less may be valued according to the straight-line method.

Treasury bills are valued at the market rate reported daily by Banque de France or treasury bill specialists.

UCIs held:

Units or shares of UCIs will be valued at the last known net asset value.

Securities financing transactions:

Securities received under repurchase agreements are recorded in assets in "receivables representing securities received under repurchase agreements" for the amount provided for in the contract plus accrued interest receivable.

Securities delivered under repurchase agreements are recorded in the long portfolio for their current value. Debt representing securities delivered under repurchase agreements is recorded in the short portfolio at the value set in the contract plus accrued interest payable.

Loaned securities are valued at their current value and are recorded in assets in "receivables representing loaned securities" at the current value plus accrued interest receivable.

Borrowed securities are recorded in assets in "borrowed securities" for the amount specified in the contract and in liabilities in "debts representing borrowed securities" for the amount specified in the contract plus accrued interest payable.

Forward financial instruments:

Forward financial instruments traded on a regulated or similar market:

Forward financial instruments traded on regulated markets are valued at the day's settlement price.

Forward financial instruments not traded on a regulated or similar market:

Swaps:

Interest rate and/or currency swaps are valued at their market value based on the price calculated by discounting future interest flows at the market interest and/or currency rates. This price is corrected for the risk of non-repayment.

Index swaps are valued on an actuarial basis based on a reference rate provided by the counterparty.

Other swaps are valued at their market value or at a value estimated according to the methods established by the Board of Directors.

Off-balance sheet commitments:

Forward contracts appear in off-balance sheet commitments for their market value at the price used in the portfolio.

Options are converted into the underlying equivalent.

Commitments on swaps are presented at their nominal value or, in the absence of a nominal value, for an equivalent amount.

Management fees

Management fees and running costs cover all costs related to the UCI: financial, administrative and accounting management, custodianship, distribution, audit fees, etc.

These fees are charged to the income statement of the UCI.

Management fees do not include transaction costs. Further details on the fees actually invoiced to the UCI can be obtained from the prospectus.

The fees are recorded prorata temporis each time the net asset value is calculated.

The total of these fees is within the maximum net asset fee rate specified in the prospectus or fund regulations: FR0013294022 - Share class R-CO CONVICTION EQUITY VALUE EURO MF EUR: Maximum rate of 0.95% incl. taxes

FR0013076411 - Share class R-CO CONVICTION EQUITY VALUE EURO PB EUR: Maximum rate of 0.95%

incl. taxes

FR0011418342 - Share class R-CO CONVICTION EQUITY VALUE EURO ID EUR: Maximum rate of 0.75% incl. taxes

FR0013111754 - Share class R-CO CONVICTION EQUITY VALUE EURO R EUR: Maximum rate of 2.30% incl. taxes

FR0011845429 - Share class R-CO CONVICTION EQUITY VALUE EURO P EUR: Maximum rate of 0.95% incl. taxes

FR0011845411 - Share class R-CO CONVICTION EQUITY VALUE EURO M EUR: Maximum rate of 0.001% incl. taxes

Performance fee:

CL EUR, M EUR and R EUR shares: none

C EUR, F EUR, I EUR, ID EUR, MF EUR, P EUR and PB EUR shares: 15% of the sub-fund's annual outperformance, net of fees, relative to its benchmark (Euro Stoxx®, net dividends reinvested), according to the methodology described below (*).

The sub-fund uses a performance fee model based on a benchmark.

It ensures that any underperformance (over a maximum period of five years) of the sub-fund versus a reference fund generating a performance equal to that of the benchmark (the Euro Stoxx® net dividends reinvested) with the same subscription and redemption pattern is recovered before any performance fees become payable. If another year of underperformance occurs within this first five-year period and has not been recovered by the end of this first period, a new period of up to five years begins as a result of this new year of underperformance. The performance fee is calculated over a maximum of five years by comparing the change in the sub-fund's assets (coupons reinvested and excluding variable management fees) with the assets of a reference fund:

- The starting value of the reference fund is the value of the sub-fund's assets:
 - (i) at the close of the most recent financial year in which performance fees were charged during the last five financial years, if performance fees were charged in one of these financial years,
 - (ii) or, failing this, at the start of the earliest of the last four financial years for which underperformance has not been made up, or at the close of the previous financial year if no underperformance has to be made up in the last four financial years,
 - (iii) or, failing that, on 1 January 2022.
- The reference fund's value therefore rises and falls in line with the daily performance of the benchmark, with the same inflows and outflows of funds from subscriptions and redemptions as the sub-fund.

If, at the close of the financial year, the sub-fund's assets (excluding variable management fees) are greater than the assets of the reference fund based on the starting value described above, a performance fee is charged that is equal to 15% (including taxes) of the difference in valuation between the sub-fund's assets and the reference fund.

A performance fee may be charged where the sub-fund has outperformed the benchmark index but has recorded a negative performance for the year.

A provision for these fees is made at each net asset value calculation and paid annually at the close of the financial year.

The provision is written back each time the difference between the two asset values decreases. In the event of underperformance (the sub-fund's assets are less than the reference fund's assets), the provision is written down to zero, excluding any accrued variable management fees.

At the end of the financial year, the provision for performance fees is paid to the Management Company, together with the proportion of fees derived from share redemptions during the financial year.

The performance fee is calculated on the basis of the performance of each share class compared with that of the benchmark index. Shareholders of the sub-fund may consult the past performance of each share class against the benchmark index at the following address on the Management Company's website: am.eu.rothschildandco.com.

Appropriation of distributable amounts

Definition of distributable amounts

Distributable amounts consist of the following:

Income:

The net income for the period is equal to the amount of interest, arrears, premiums and prizes, dividends, attendance fees, and any other income related to the securities comprising the portfolio, plus the income from any amounts temporarily available and minus management fees and borrowing costs.

The net income is increased by retained earnings and increased or reduced by the balance of the income equalisation account.

Capital gains and losses:

Capital gains, net of charges, minus capital losses, net of charges, recorded during the period, plus net capital gains of the same type recorded during earlier periods that have not been paid out or accumulated and minus or plus the balance of the capital gains equalisation account.

Methods for appropriating distributable amounts:

Share class(es)	Appropriation of net income	Appropriation of realised net capital gains or losses
Share class R-CO CONVICTION EQUITY VALUE EURO C EUR	Accumulation	Accumulated and/or distributed and/or carried forward by decision of the SICAV management
Share class R-CO CONVICTION EQUITY VALUE EURO CL EUR	Accumulation	Accumulation

NOTES TO THE ANNUAL FINANCIAL STATEMENTS

1. Accounting rules and methods

The annual financial statements are presented in the form prescribed by ANC regulation 2014-01, as amended.

The general principles of accounting apply:

- true and fair view, comparability, going concern,
- accuracy, reliability,
- prudence,
- consistency of accounting methods from one period to the next.

Revenues from fixed income securities are recognised on the basis of interest actually received.

Acquisitions and disposals of securities are recorded excluding charges.

The reference currency for the portfolio's accounting is the euro.

The duration of the accounting period is 12 months.

Asset valuation rules

Financial instruments are recognised according to the historical cost method and included on the balance sheet at their current value, which is determined by the last-known market value or, if no market exists, by all external means or through the use of financial models.

Differences between the current values used during the calculation of the net asset value and the historical costs of the securities upon their entry into the portfolio are recorded in "valuation differentials" accounts. Values that are not in the portfolio's currency are measured in accordance with the principle set forth below then converted into the portfolio's currency according to the currency rates in effect on the day of the

Deposits:

assessment.

Deposits with a remaining life of 3 months or less are valued according to the straight-line method.

Equities, bonds and other securities traded on a regulated or similar market:

For the calculation of the net asset value, equities and other securities traded on a regulated or similar market are valued on the basis of the day's last market price.

Bonds and similar securities are valued at the closing price relayed by various providers of financial services. Interest accrued on bonds and equivalent securities is calculated until the net asset value trading date.

Equities, bonds and other securities not traded on a regulated or similar market:

Securities not traded on a regulated market are valued under the responsibility of the Board of Directors using methods based on the asset value and the yield, taking into consideration the prices used in recent significant transactions.

Negotiable debt securities:

Negotiable debt securities and similar securities that are not the subject of significant transactions are valued on an actuarial basis based on a reference rate defined below, plus, where applicable, a differential representative of the issuer's intrinsic characteristics.

- Negotiable debt securities with a maturity of 1 year or less: Euro interbank offered rate (Euribor);
- Negotiable debt securities with a maturity of more than 1 year: rate of normalised annual interest treasury bonds (BTAN) or fungible treasury bonds (OAT) with similar maturity for the longest maturities.

Negotiable debt securities with a remaining life of 3 months or less may be valued according to the straight-line method.

Treasury bills are valued at the market rate reported daily by Banque de France or treasury bill specialists.

UCIs held:

Units or shares of UCIs will be valued at the last known net asset value.

Securities financing transactions:

Securities received under repurchase agreements are recorded in assets in "receivables representing securities received under repurchase agreements" for the amount provided for in the contract plus accrued interest receivable.

Securities delivered under repurchase agreements are recorded in the long portfolio for their current value. Debt representing securities delivered under repurchase agreements is recorded in the short portfolio at the value set in the contract plus accrued interest payable.

Loaned securities are valued at their current value and are recorded in assets in "receivables representing loaned securities" at the current value plus accrued interest receivable.

Borrowed securities are recorded in assets in "borrowed securities" for the amount specified in the contract and in liabilities in "debts representing borrowed securities" for the amount specified in the contract plus accrued interest payable.

Forward financial instruments:

Forward financial instruments traded on a regulated or similar market:

Forward financial instruments traded on regulated markets are valued at the day's settlement price.

Forward financial instruments not traded on a regulated or similar market:

Swaps:

Interest rate and/or currency swaps are valued at their market value based on the price calculated by discounting future interest flows at the market interest and/or currency rates. This price is corrected for the risk of non-repayment.

Index swaps are valued on an actuarial basis based on a reference rate provided by the counterparty.

Other swaps are valued at their market value or at a value estimated according to the methods established by the Board of Directors.

Off-balance sheet commitments:

Forward contracts appear in off-balance sheet commitments for their market value at the price used in the portfolio.

Options are converted into the underlying equivalent.

Commitments on swaps are presented at their nominal value or, in the absence of a nominal value, for an equivalent amount.

Management fees

Management fees and running costs cover all costs related to the UCI: financial, administrative and accounting management, custodianship, distribution, audit fees, etc.

These fees are charged to the income statement of the UCI.

Management fees do not include transaction costs. Further details on the fees actually invoiced to the UCI can be obtained from the prospectus.

The fees are recorded prorata temporis each time the net asset value is calculated.

The total of these fees is within the maximum net asset fee rate specified in the prospectus or fund regulations: FR0013513124 – R-CO 4CHANGE GREEN BONDS D EUR shares: Maximum rate of 0.70% incl. taxes FR0013513165 – R-CO 4CHANGE GREEN BONDS P EUR shares: Maximum rate of 0.45% incl. taxes FR0013513140 – R-CO 4CHANGE GREEN BONDS IC EUR shares: Maximum rate of 0.35% incl. taxes

FR0013513132 - R-CO 4CHANGE GREEN BONDS C EUR shares: Maximum rate of 0.70% incl. taxes

Swing pricing

Net asset value adjustment method associated with swing pricing with a trigger threshold:

If, on a NAV calculation day, the total of net subscription/redemption orders from investors across all share classes of the sub-fund exceeds a threshold pre-established by the Management Company and determined on the basis of objective criteria as a percentage of the sub-fund's net assets, the NAV can be adjusted upwards or downwards in order to take into account the adjustment costs attributable to the net subscription/redemption orders respectively. The NAV of each share class is calculated separately, but any adjustment has, in percentage terms, an identical impact across all NAVs of the sub-fund's share classes.

The cost and trigger threshold parameters are determined by the Management Company and reviewed periodically, at least every six months. These costs are estimated by the management company on the basis of transaction costs, buy/sell spreads, as well as any taxes applicable to the sub-fund.

Given that this adjustment is related to the net balance of subscriptions/redemptions within the sub-fund, it is not possible to accurately predict whether swing pricing will be applied at a given time in the future. Therefore, it is not possible to accurately predict the frequency at which the Management Company will need to make such adjustments, which may not exceed 1.50% of the NAV. Investors should note that, due to the application of swing pricing, the volatility of the sub-fund's NAV may not reflect solely that of the securities held in the portfolio.

Appropriation of distributable amounts

Definition of distributable amounts

Distributable amounts consist of the following:

Income:

The net income for the period is equal to the amount of interest, arrears, premiums and prizes, dividends, attendance fees, and any other income related to the securities comprising the portfolio, plus the income from any amounts temporarily available and minus management fees and borrowing costs.

The net income is increased by retained earnings and increased or reduced by the balance of the income equalisation account.

Capital gains and losses:

Capital gains, net of charges, minus capital losses, net of charges, recorded during the period, plus net capital gains of the same type recorded during earlier periods that have not been paid out or accumulated and minus or plus the balance of the capital gains equalisation account.

Methods for appropriating distributable amounts:

Share class(es)	Appropriation of net income	Appropriation of realised net capital gains or losses
Share class R-CO 4CHANGE GREEN BONDS C EUR	Accumulation	Accumulation
Share class R-CO 4CHANGE GREEN BONDS D EUR	Paid out	Paid out
Share class R-CO 4CHANGE GREEN BONDS IC EUR	Accumulation	Accumulation
Share class R-CO 4CHANGE GREEN BONDS P EUR	Accumulation	Accumulation
