MARKET REVIEW

The big sell-off at the beginning of the month pushed several market sentiment indicators to panic levels but subsequently the DJ Euro Stoxx 600 staged an impressive recovery, rallying by more than 6%. The benchmark index nevertheless ended the month with a negative performance of -0.3% after markets fell back again during the final week of trading. February was overshadowed by the uncertainty regarding public finances in Greece and other EU countries, which also kept the Euro on the defensive against the dollar. Several countries – Ireland, Portugal and Spain to name a few – have to refinance considerable amounts of debt within the next months. Meanwhile the US central bank increased its discount rate from 0.5% to 0.75% in mid-February, a move that can be seen as a precursor to an increase in its key overnight lending rate. Not until the situation on credit markets showed signs of improvement with narrowing CDS spreads on Greece and the other EU countries mentioned were stock markets able to march into higher territory.

The Fund ended the month unchanged (+0.04%), which was 0.3% (EUR / B shares) better than the benchmark performance. The best performing sectors in the index were food manufacturers, insurance companies and industrials while car manufacturers, construction companies and oil stocks were the weakest. RHI, Svenska Cellulosa, Coca-Cola Hellenic Bottling and Campari were the largest contributors to the Fund's performance while Pirelli, Songa Offshore and Abengoa detracted most.

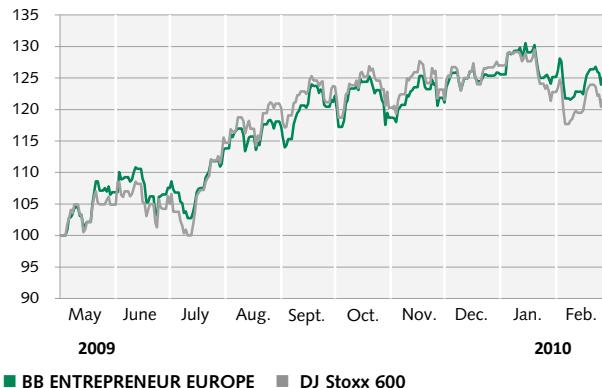

POSITIONING & OUTLOOK

A new position in Freenet already made a positive contribution to the Fund's performance. Freenet is playing an active role in the consolidation of Germany's mobile phone market and the resulting cost synergies make the stock look fundamentally inexpensive. The latest macroeconomic data show that clouds are gathering on the horizon again: In the USA consumer confidence fell from 56.5 to 46 and this news was followed by the first decline in a closely watched business confidence index in Europe since the depths of the recession in 2009. Our discussions with company executives also suggest that expectations of business activity across Europe in 2010 will most likely have to be scaled back a bit. The cyclicity of the portfolio was reduced after taking profits in Kazakhmys and Puma and by the stop loss triggered in Wacker Chemie. The Fund's cash allocation stands at 6.0% despite the new investments in Kudelski and Pirelli. We continue to concentrate on businesses in markets with structural growth and stable cash flows.

TOP 10 POSITIONS

Campari	5.7%
Andritz	5.3%
Rhi	4.5%
Fresenius Medical Care	4.3%
Coca Cola Hellenic B.	3.7%
Mayr-Melnhof	3.2%

Monthly News February 2010

INVESTMENT FOCUS

The Fund invests in listed owner-controlled companies in Europe where an entrepreneur or a founding family holds at least a stake of 20% of the company's voting rights, thereby exerting significant control and influence. The typical qualities of these companies – a focused business model, fast decision-making processes, sustainable business policies and a strong corporate culture – go hand in hand with efficient innovation, high product quality and strong customer loyalty. The corresponding impact on the share price is demonstrably positive. The Fund's Management Team offers a wealth of experience in this investment segment and has built up an extensive network with executives throughout the sector. It pursues a fundamental, bottom-up approach in identifying the most attractive founder-controlled companies while maintaining an investment portfolio of 30 to 40 stocks diversified by country and sub-sector.

INVESTMENT SUITABILITY

The Fund's investment objective is to generate attractive and competitive capital growth in the long term. It is therefore particularly suited to investors with an investment horizon of at least 5 years who want to enhance their portfolio diversification with investments in European founder-controlled companies. The Fund displays the typical risks associated with equity investments in Europe.

FIVE REASONS TO INVEST

- Founder and family-controlled companies think in generations, not quarters
- Their focus, sense of responsibility, strong identification with the company and personal financial commitment show a positive correlation to earnings and the share price performance
- The corporate culture is shaped by an entrepreneurial culture
- The Fund's Management Team has successfully invested in owner-managed companies for many years
- "Entrepreneurs for Entrepreneurs" – the Bellevue Group is itself an owner-managed company with a majority of shares held by the employees
