

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

DPAM INVEST B Bonds Eur,

(a sub-fund of DPAM INVEST B SA, a public SICAV under Belgian law)

managed by DPAM SA

Class F - ISIN: BE0948508420

Objectives and investment policy

Objective

- The objective of the fund is to offer you exposure to debt securities denominated in euro. This is an actively managed fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

Investment policy

- The fund mainly invests (without any sectorial restrictions) in bonds and/or other debt securities, fixed or floating, denominated in euro and issued or guaranteed by EU Member States.

Benchmark: JPM EMU Government Bond Total Return.

Use of the benchmark: the benchmark is used to compare performance. The selection and weighting of the assets in the fund's portfolio may differ significantly from the composition of the benchmark.

Subscription/Redemption

- Subscription or redemption requests may be made every business day before 3 p.m. (Belgian time) to Banque Degroof Petercam SA.

Types of Units

- The units of the fund are capitalisation units, issued in the form of shares, which do not give right to a dividend. All income earned by the fund is reinvested. The shares are restricted to eligible investors (as defined under the legislation of the fund's Home Member State) and require a minimum initial subscription of EUR 25,000.

Derivatives

- The fund may, on an optional basis, use derivatives such as options and/or futures contracts ("futures" and/or "forwards") in order to achieve the investment objectives and/or for hedging purposes (hedging or exposure of/to interest rate and credit risks).

Investment holding period

- This fund may not be appropriate for investors who intend to withdraw their capital within 3 years of the initial investment.

Risk and reward profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- As any investment is risky by nature, the return (performance) thereof is potential only. The risk and reward profile of your investment is reflected by a synthetic indicator which ranks the fund over a risk/return scale from the lowest (1) to the highest (7) risk category.
- The computation of this risk/reward profile is based on the portfolio's net asset value fluctuations (volatility) recorded over the past 5 years (or on simulations based on an appropriate benchmark for funds or share classes of less than 5 years). It gives an indication of the fund's potential performance and of your capital risk exposure, but it does not guarantee that the risk/reward profile currently published will remain unchanged.
- Historical data, such as those used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the fund.
- The lowest risk/return category (level 1) does not mean a risk-free investment.
- The risk/return profile mentioned herein is essentially due the presence of government bonds in the portfolio.
- The capital invested in this fund is neither guaranteed nor protected. You may therefore lose all or part of your investment.

Certain risks are not (or not adequately) reflected in the risk and reward profile mentioned herein. Amongst those risks, the following could have a material impact on the risk and reward profile of the fund:

- Credit risk: a decrease in the prospect of the repayment of an issuer's obligations to its creditors may decrease the value of the securities issued by that issuer, thereby reducing the value of the portfolio's assets.
- Concentration risk: since the fund's portfolio mainly consists of debt securities issued and/or secured by EU-Member States, it is likely to be more specifically exposed to the economical development of this area.
- Inflation risk: the portfolio's assets are sensitive to inflation rate fluctuations. A hike in inflation may reduce the value of the portfolio's assets.
- Risks linked to derivatives: the derivatives in the fund's portfolio are likely to be more volatile than the underlying assets thereof.
- Sustainability risk: compliance with environmental, social and governance aspects is not systematically integrated for investment decisions. As a result, the fund may have greater exposure to companies that have a negative sustainability impact.

Charges

The charges are used to pay the costs of running the fund (including the marketing and distribution costs thereof). These costs reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge 1.00%
