"Pound Sterling" Income Shares of Vanguard Japan Stock Index Fund (the "Fund"), a subfund of Vanguard Investment Series Plc (ISIN: IE00B51KW525)

The Fund is managed by Vanguard Group (Ireland) Limited ("VGIL"), part of the Vanguard group of companies.

Objectives and investment policy

Objective

The Fund seeks to track the performance of the MSCI Japan Index (the "Index").

Investment policy

- The Index includes stocks of companies located in and traded on Japanese stock exchanges.
- The Fund attempts to:
 - Replicate the Index by investing in all, or substantially all, of the stocks that make up the Index, holding each stock in approximately the same proportion as its weighting in the Index.
 - Remain fully invested and hold small amounts of cash except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy.
- The Fund may invest in financial derivative instruments that could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value. Some derivatives give rise to increased potential for loss where the Fund's counterparty defaults in meeting its payment obligations.

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.
- Income from the Fund will be paid out.
- Shares in the Fund can be sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus) by submitting an application in writing or by telephone before 16:00 (Irish time) on the business day prior to the relevant dealing day, or, where you hold shares with a platform, by submitting an application seeking the sale of your shares before the dealing cut-off time of the respective platform, provided this is before the dealing cut-off time for the Fund. A full list of the days on which Shares in the Fund cannot be sold is available on <https://global.vanguard.com/content/documents/calendar.pdf>.

Risk and reward profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed to remain unchanged and may shift over time.
- This indicator does not measure the risk that you may lose the amount you have invested.
- The lowest category does not mean "risk free".
- The Fund is rated 6 as it invests in equities in a single market and is in a higher category as the values of those investments have experienced a higher rate of change in the past.

The indicator opposite does not take account of the following risks of investing in the Fund:

- Stock market risk. The value of investments may fall as well as rise, and you may not get back the money you invested.
- Investment style/sector risk. The Fund invests in a specific sector or investment style. These types of investments tend to go through cycles of doing better, or worse, than the stock market in general. These periods have, in the past, lasted for as long as several years.
- Country/political risk. The Fund's assets may be subject to uncertainties such as changes in a country's 1. government policies; 2. taxation; 3. restrictions on foreign investment; 4. currency decisions; 5. applicable laws and regulations which together with any natural disasters or political upheaval will weaken a country's stock markets.
- Currency risk. The Fund invests in overseas markets and the value of the Fund may fall or rise as a result of changes in exchange rates.
- Index tracking risk. The Fund is not expected to track or replicate the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
